Affective Health and Masculinities in South Africa - Hans Reihling 2020-04-24

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

[Finally Out](#) - Loren A. Olson 2017-04

Dr. Loren A. Olson has frequently been asked two questions: How could you not know that you were gay until the age of forty? Wasn't your marriage just a sham to protect yourself at your wife's expense? In *Finally Out*, Dr. Olson answers these questions by telling the inspiring story of his evolving sexuality, into which he intelligently weaves psychological concepts and gay history. This book is a powerful exploration of human sexuality, particularly the sexuality of mature men who, like Dr. Olson, lived a large part of their lives as straight men--sometimes long after becoming aware of their same-sex attractions. Readers will come to understand: - That there is no universal model for coming out - Why many older LGBTQ men came out late, do not come out at all, or come out to varying degrees in different environments - How stigma has created mental health problems for isolated and closeted men who have sex with men, particularly in geographical areas and cultures where there is little or no acceptance of homosexuality - How sexual function changes but perhaps even improves for older men - That aging creates opportunities that one has never had and may never have again, e.g., freedom from the tyranny of ambition - That some people consistently prefer an older sexual partner and this can lead to stable, intergenerational relationships - How same-sex sexual activity was considered prior to the Stonewall uprising in 1969 contrasted with the way it is perceived after Stonewall - How age, culture, geographical

location, heterosexual marriage, and children impact a person's decision to come out - Why "conversion therapy" does not work and may be harmful - The difference between homophobia and homonâveté - The archetypes of self-identified straight men who seek occasional or regular sex with other men - How to overcome the shame and guilt experienced by men who are sexually attracted to other men

Progressively Worse - Robert Peal 2014

Letters to Zerky - Bill Raney 2011-11-01

A buoyant, bittersweet and often plaintively gorgeous travel memoir by Raney, writer and founder of the famous Nickelodeon Theatre in Santa Cruz, California. Raney's debut book follows the arc of a year-long expedition around the world, launched in 1967, at the height of "the summer of love in a summer of death". In San Francisco, where the author lived with his wife JoAnne, hippies and beatniks flooded the streets, and new reports arrived every day from the bloody conflict in Vietnam. The couple decided to decamp for Europe, where the dollar was

strong and the possibilities seemed endless. Along for the ride is Tarzan, a fiery dachshund, and a baby boy named Eric Xerxes Raney, known as Zerky. For a while, this quirky little family made its way across the Continent, camping in open fields, cavorting on beaches and scrambling through the Swiss Alps. The narrative is built on letters Raney wrote to Zerky who would presumably be too young to remember the breadth of these adventures -- and diary entries by JoAnne, a fastidious chronicler of the far-flung. "That there might be a world beyond Europe, a world you could drive to, was something that never occurred to us until six months later", the author remembers, near the beginning of the book. Soon enough, the Raney family caterwauled through Turkey, Pakistan, India and Iran -- a journey that would prove difficult, if not impossible, to duplicate in these pitched political times. In Kabul, Afghanistan, they vividly pick their "way through random passageways and alleyways that were left between buildings at the time of their construction". In Eastern Turkey, they face down a gaggle of armed and angry soldiers. The adventure quotient here is high, but the main ballast of the book is emotional. Shortly after returning from the expedition, JoAnne, pregnant with her second child, died of an aneurism, and within a year, Zerky was killed while playing near his family's home. The book remains as a testament to the power of the human spirit -- to wander, endure and remember. A chronicle of travels through a bygone world.

Meet the Georgians - Robert Peal 2022-07-07

'The way Robert Peal describes Georgian England, you'd be mad not to want to live there yourself' GUARDIAN Anne Bonny and Mary Read, pirate queens of the Caribbean Tipu Sultan, the Indian ruler who kept the British at bay Olaudah Equiano, the former slave whose story shocked the world Mary Wollstonecraft, the feminist who fought for women's rights Ladies of Llangollen, the lovers who built paradise in a Welsh valley 'Mad, bad and dangerous to know' is how Lord Byron, the poet who drank wine from a monk's skull and slept with his half-sister, was described by one of his many lovers. But 'mad, bad and dangerous' serves as a good description for the entire Georgian period: often neglected, the hundred or so years between the coronation of George I in 1714 and the death of George IV in 1830 were years when the modern world was formed, and changes came thick and fast. Across this century, new foods - pineapples, coffee and pepper - suddenly became available in the shops. Fashion exploded into a riot of colour, frilly shirts and wigs. Gin was drunk like it was water. Demands for women's rights were heard, and it became possible to question the existence of God without fear of prompt execution. These exciting new developments came, of course, from the expanding British Empire. Britain's wealth and its sudden access to chocolate, chillies and spices, was entirely bound up with the conquest of overseas territories and the miserable suffering of enslaved workers. This is the backdrop to Robert Peal's new book, which introduces the Georgian era through the diverse lives of twelve 'magnificent - if not moral' people who defined it.

Wars of the Roses - Ian Dawson 2012-03-01

Think more deeply and work more independently at A level History through a carefully thought-out enquiry approach from SHP. Enquiring History: It makes you think! The OFSTED report on school history suggests that the current generation of A Level students have been poorly served by exam-based textbooks which spoon-feed students while failing to enthuse them or develop deeper understanding of History. The Schools History Project has risen to this challenge with a new series for the next generation. Enquiring History is SHP's fresh approach to Advanced Level History that aims: - To motivate and engage readers - To help readers think and gain independence as learners - To encourage enquiry, and deeper understanding of periods and the people of the past - To engage with current scholarship - To prepare A Level students for university. Key features of each Student book: - Clear compelling narrative - books are designed to be read cover to cover - Structured enquiries - that explore the core content and issues of each period - 'Insights' (Feature panels between enquiries) provide context, overview, and extension - Full colour illustrations throughout. The Wars of the Roses This title covers the political history of England from 1450-1485. The content is gathered into ten discrete enquiries, for example - Why was London full of rebels in 1450? - Was Edward IV a success second time round? - How certain can we be about why Richard III took the crown?) which together help examine the fundamental paradox of this period: People at the time did not want civil war, and for the nobles loyalty to the monarch was all important...yet wars happened and kings were deposed. So the central question is 'If loyalty was so important and people in England did not want civil war, why did the Wars of the Roses happen?' which is a question worth answering! Web-based support includes - lesson planning tools and guidance for teachers available from the SHP website
