[The Trouble with Buddhism](#) - Robert M. Ellis
2011-03-13

This book is a critique of Buddhism by a philosopher with about 20 years' experience of practising Buddhism. It attempts to judge Buddhism by the standards of its own key insight of the Middle Way. This book argues that Buddhism has often abandoned the Middle Way

and allowed dogmatic metaphysical assumptions to take its place. The Buddha criticised appeals to metaphysics, yet many of the trappings of traditional Buddhism are built on it - whether these are karma and rebirth, the revelations of the enlightened and their scriptures, dependent origination, the interpretation of the Four Noble Truths, alienated idealisations of love, or rituals

that celebrate metaphysics rather than insight. This is not a purely negative book, but an attempt at a balanced appraisal of Buddhism with praise as well as criticism. In the West we have an opportunity to evaluate Buddhism anew and reform it so that it best applies its own insights.

Faith in the Fires of Criticism - Paul Avis
2006-03-01

Have the 'fires' of modern criticism melted away Christianity's claim to truth? Seminal thinkers such as Feuerbach, Marx, Nietzsche and Freud argued that religious belief is nothing more than an illusion, triggered by our own psychological and social needs. Jung claimed that traditional Christianity was a gross distortion of the divine. Paul Avis does not deny the reality of those human factors which shape our beliefs, but he argues that it is possible to take seriously both human distortions of religious truth and also the reality of the transcendent God. These in-depth studies of the most unsparing critics of

Christianity point to the possibility of a faith chastened and refined in the fires of criticism.

Psychedelic Mysteries of the Feminine -
Maria Papaspyrou 2019-04-30

An exploration of the connections between feminine consciousness and altered states from ancient times to present day • Explores the feminine qualities of the psychedelic self, ancient female roots of shamanism, and how altered states naturally tap into the female archetype • Discusses feminist psychedelic activism, female ecstasies, goddess consciousness, the dark feminine, and embodied paths to ecstasy • Includes contributions by Martina Hoffmann, Amanda Sage, Carl Ruck, and others Women have been shamans since time immemorial, not only because women have innate intuitive gifts, but also because the female body is wired to more easily experience altered states, such as during the process of birth. Whether female or male, the altered states produced by psychedelics and ecstatic trance

expand our minds to tap into and enhance our feminine states of consciousness as well as reconnect us to the web of life. In this book, we discover the transformative powers of feminine consciousness and altered states as revealed by contributors both female and male, including revered scholars, visionary artists, anthropologists, modern shamans, witches, psychotherapists, and policy makers. The book begins with a deep look at the archetypal dimensions of the feminine principle and how entheogens give us open access to these ancient archetypes, including goddess consciousness and the dark feminine. The contributors examine the female roots of shamanism, including the role of women in the ancient rites of Dionysus, the Eleusinian Sacrament, and Norse witchcraft. They explore psychedelic and embodied paths to ecstasy, such as trance dance, holotropic breathwork, and the similarities of giving birth and taking mind-altering drugs. Looking at the healing potential of the feminine and altered

states, they discuss the power of plant medicines, including ayahuasca, and the recasting of the medicine-woman archetype for the modern world. They explore the feminine in the creative process and discuss feminist psychedelic activism, sounding the call for more female voices in the psychedelic research community. Sharing the power of “femtheogenic” wisdom to help us move beyond a patriarchal society, this book reveals how feminine consciousness, when intermingled with psychedelic knowledge, carries and imparts the essence of inclusivity, interconnectedness, and balance our world needs to heal and consciously evolve.

Psychosis and Spirituality - Isabel Clarke
2010-10-26

The new edition of this successful text builds on the very latest research to present an original and unique exploration of the psychology of both spirituality and psychosis. The editor brings together fascinating perspectives from a broad

range of distinguished contributors. This new edition covers the most recent body of research, both qualitative and quantitative, in its exploration of the interface between psychosis and spirituality, and investigation into anomalous experiences Ten new chapters added and the remaining text completely updated New to this edition is an expanded clinical section, relevant to clinicians working with psychosis Offers a fundamental rethink of the concept of psychosis, and proposes new insights into spirituality Includes feature chapters from a distinguished list of contributors across a broad range of disciplines, including Peter Fenwick, Peter Chadwick, David Kingdon, Gordon Claridge, Neil Douglas Klotz and David Lukoff

Equine-Assisted Therapy and Learning with At-Risk Young People - Hannah Burgon 2014-04-23
This book provides an overview of the field of Equine-Assisted Therapy and Learning and gives a powerful account of a research study charting the experiences of seven 'at-risk' young people

attending a pioneering Therapeutic Horsemanship centre in the UK. The book includes a foreword from Leif Hallberg, author of *Walking the Way of the Horse* .

Jung in Contexts - Paul Bishop 1999

This is a unique collection of the most important essays on Jung and analytical psychology over the past two decades. The essays place Jung, the man and his work, in three important contexts: historical, literary and intellectual.

Frames of Mind - Luke Hockley 2007-10-01

Frames of Mind provides a fresh and stimulating introduction to the world of Post-Jungian film and television studies. To orientate the reader the book starts with an overview of analytical psychology and how it has been used to analyze films. From that starting point it broadens out to include topics such as: why we have genuine emotional responses to films which we know to be unreal; how and why we watch television; the unconscious motifs of advertising; and the psychological role that technology plays in

contemporary society. Film and television programmes considered in Frames of Mind include: Chinatown (Polanski) and Star Trek: The Next Generation. A number of television advertisements are also considered. This book will appeal to students, researchers, academics and practitioners interested in either media and, or, analytical psychology.

Treating Victims of Torture and Violence - Peter Elsass 1997-11

Torture is among the most disturbing and psychologically devastating of human behaviors. It dehumanizes its victims, leaving them with serious and lasting psychological wounds. Like other psychological trauma, torture frequently leaves in its wake denial and silence among both perpetrators and their victims. This communicative void creates a public and mental block that can make treatment of torture survivors very difficult. *Treating Victims of Torture and Violence* is the definitive manual for therapists treating victims of torture, prisoners

of war, and casualties of forced migration. Divided into five sections dealing with basic concepts of torture--violence and aggression, the torture syndrome, psychotherapeutic treatment, the cultural psychology of torture syndrome, and cultural psychological treatment-- *Treating Victims of Torture and Violence* employs both classic psychoanalytic and cognitive- behavioral methods. Realizing that torture victims are frequently from different cultures than those of their therapists, Peter Elsass provides in-depth aid to therapists dealing with a multicultural clientele.

Krapp Broken Vessels - Living in two Worlds: Some Aspects of Working with Clients with a Physical Disability by Kathrin Asper & Elizabeth Martigny

Vital Signs - Mary-Jayne Rust 2018-03-22

"Vital signs" are, of course, the basic physiological measures of functioning which health practitioners use to assess the gravity of a patient's predicament. This anthology focuses not so much on our physical predicament, with so many of the Earth's systems severely stressed and beginning to fail - there are plenty of other places to read about this. Instead we focus on our psychological predicament, as news of the situation slowly penetrates our defences and we struggle as individuals and as a society to find an adequate response. By "vital signs" we also mean signs that such a response is beginning to take shape: signs of hope, signs of healing. We feel that ecopsychology in Britain has a distinctive voice and unique contributions to make. In doing so, we hope to facilitate debate

and dialogue within the field, in the hope that this will lead eventually to more developed theory and practice.

God and the Creative Imagination - Paul Avis
2013-01-11

'A mere metaphor', 'only symbolic', 'just a myth' - these tell tale phrases reveal how figurative language has been cheapened and devalued in our modern and postmodern culture. In *God and the Creative Imagination*, Paul Avis argues the contrary: we see that actually, metaphor, symbol and myth, are the key to a real knowledge of God and the sacred. Avis examines what he calls an alternative tradition, stemming from the Romantic poets Blake, Wordsworth and Keats and drawing on the thought of Cleridge and Newman, and experience in both modern philosophy and science. *God and the Creative Imagination* intriguingly draws on a number of non-theological disciplines, from literature to philosophy of science, to show us that God is appropriately likened to an artist or poet and

that the greatest truths are expressed in an imaginative form. Anyone wishing to further their understanding of God, belief and the imagination will find this an inspiring work.

Breakfast With Socrates - Robert Rowland Smith
2010-08-06

What does it mean to be awake? What exactly is therapeutic about retail therapy? And what are you really working on when you're at your desk, in the gym, or having dinner? From getting ready in the morning, through heading to work, going to a party, having sex and falling back to sleep, *Breakfast with Socrates* provides an hour-by-hour commentary on what history's greatest philosophers have said about the meaning behind everything we do. A fascinating exploration of our daily lives, *Breakfast with Socrates* also draws on literature, art, politics and psychology to offer an informal introduction

to the history of ideas that will help anyone to think more healthily. Breakfast will never be the same again...

Art Therapy Theories - Susan Hogan 2015-12-22

Art therapists work with a range of distinct philosophical and theoretical underpinnings, but as yet there has been no single book to offer an overview of these theories. *Art Therapy Theories* provides an introductory, non-partisan overview of art therapy theories outlining the following therapy approaches: Cognitive Behavioural Art Therapy Solution-Focused Brief Therapy Psychoanalytical (Freudian) Art Therapy Analytical (Jungian) Art Therapy Gestalt Art Therapy Person-Centred or 'Rogerian' Art Therapy Mindfulness Art Therapy Integrative Art Therapy (the Group-Interactive Model) Feminist Art Therapy Art Therapy as Social Action Art Therapy as a Research Tool Each chapter provides a non-judgemental, yet analytical, synopsis of each approach. No detailed knowledge is necessary to understand the

different approaches, as the book explains them in clear and concise English. Difficult terms and concepts are explained as they arise, and a glossary of terms is also provided. *Art Therapy Theories* is aimed at trainee art therapists who need to demonstrate that they have a grasp of theory, as well as a sense of how the theory can translate into practice. It will also appeal to seasoned therapists, counsellors and to a wide range of professionals in the mental health field.

Understanding Gregory Bateson - Noel G. Charlton 2010-03-25

Information Society - Karamjit S. Gill 2012-12-06

Human-centredness: A Challenge to Post-industrial Europe? The key power in industrial society has been linked to the possession of capital and factory. In the "information society" it could be rather different. If one accepts that that the key power in the information society will

be linked not so much to the ownership of information but to human creativity nourished by that information, the productive force of today and tomorrow, could be more and more the human brain. Making use of one's intelligence is always accompanied by positive emotion, which in turn further activates the intelligence. But, unfortunately, under present conditions workers of all levels live in fear, anxiety and stress rather than desire and motivation. The question of "basic human ecology" (quality of life) is, therefore, a major strategic factor. It is precisely the opposite to the mechanisms of exclusion that currently dominate our society: exclusion of young people through joblessness - but also exclusion through technology, as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats. This is not idle theorizing, it corresponds to concrete facts. It is, for example, how some observers interpret the crisis at IBM. Because its

programs were less 'human-friendly', it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson.

Moshkel Gosha - Llewellyn Vaughan-Lee
2005-04-01

Through this ancient Persian story of a prickly-bush digger and his daughter who discover magical stones that bring wealth and disaster, this tale explores the different ways to nourish and care for the soul. As an invitation to the dimensions of love, power, and divine sustenance, Moshkel Gosha's magical story shows how to value and protect a deep longing for inner truth in the contemporary age. The accompanying commentary highlights the story and applies its principles to the spiritual needs and challenges of the contemporary world. "This little book is a priceless jewel. It is such a joy to read age-old truths set in the context of another language and other customs, and to have the essence of these truths translated so beautifully and powerfully into a language we can all

understand.” —Robert Johnson, author *He, She, Inner Work, and Balancing Heaven & Earth* “Moshkel Gosha is a mysterious Sufi story with different levels of meaning. This commentary gives many valuable insights into the hidden significance of this story. It shows how an ancient Sufi teaching story contains the answer to one of today's most important psychological and spiritual questions: how to let the healing and transformative power of the inner world become a part of our everyday life.” —Irina Tweedie, author, *Daughter of Fire: A Diary of a Spiritual Training with a Sufi Master* “Those seeking a rich inner life will find this little book deeply rewarding. Joseph Campbell showed us the power of myth to help us understand ourselves, now Llewellyn Vaughan-Lee guides us to the world within as revealed in a magical tale.” —Jonathan Young, PhD, Psychologist and Founding Curator, Joseph Campbell Archives Center for Story & Symbol

The Positive Psychology of Synchronicity -

Chris Mackey 2019-08-13

For all those interested in mental wellness as well as mental-health practitioners, this book makes the strongest case yet made that synchronicity and other forms of intuitive insights promote wellbeing and help us transform mental-health issues into personal growth. "A profound introduction to deep concepts of mind, meaning and the challenges of creating a life well lived for everyone." - Ernest Rossi, PhD, author of *The Psychobiology of Gene Expression and Creating Consciousness* Synchronicity is meaningful coincidence that connects our inner and outer worlds. This book reveals how it can guide us along our life path, helping us through challenging times and nudging us toward self-fulfilment. Psychologist Chris Mackey writes from personal experience, not only as a practitioner but also as a patient who has suffered serious mental illness. Formerly a rationalist with little time for non-scientific approaches, his own experiences and

those of his patients have convinced him that synchronicity has a key role to play in helping us to tap into our intuitive and spiritual selves and guiding us through life. He now passionately believes that we need to embrace transcendent experiences and explore the opportunities for personal development offered by depression and states of mind that are often dismissed as psychosis. This exciting new approach to synchronicity and the treatment of depression and other mental disorders will be of great interest to practitioners and patients alike, as well as to anyone interested in the opportunities offered by altered states of consciousness. The book includes: * Carl Jung's original description of synchronicity * Real-life case studies * Brain science * Practical ways to work with synchronicity including journaling, symbol analysis and dream interpretation.

Paths Between Head and Heart - Oliver C. Robinson 2018-08-31

Paths Between Head and Heart provides an

accessible but comprehensive account of how science and spirituality relate, not as enemies, but as partners in the quest for a truth that is greater than either one can understand alone. While many books have been written on science and religion, not many have looked at how spirituality and science exist as complementary parts of a larger whole, and how they relate specifically to the transitional challenges that define our era. '...explains the paradox of the unity of science and spirituality. Oliver Robinson shows that these two ways of looking at the world, so often seen as opposing forces, actually come from the same source...' Jennifer Kavanagh, author of The World is Our Cloister Hammer Films' Psychological Thrillers, 1950-1972 - David Huckvale 2014-02-28 Hammer Film's is justly famous for Gothic horror but the company also excelled in the psychological thriller. Influenced by Henri-Georges Clouzot and Alfred Hitchcock, Hammer created its own approach to this genre in some

of the company's very best films. This book takes a chronological, film-by-film approach to all of Hammer's thrillers. Well-known classics such as Seth Holt's *The Nanny* (1965) and *Taste of Fear* (1961) are discussed, together with less well known but equally brilliant films such as *The Full Treatment* (dir. Val Guest, 1960) and Michael Carreras' *Maniac* (1963). The films' literary ancestry, reflection of British society and relation to psychological theories of Freud and Jung, architectural metaphor, sexuality, religion, and even Nazi atrocities are all fully explored.

Middle Way Philosophy 3: The Integration of Meaning - Robert M. Ellis 2013-12-11

This third volume of the Middle Way Philosophy series applies the revolutionary view, taken from cognitive science, that meaning is found in our bodies rather than in a relationship between language and reality. The cognitive meaning found in dictionaries and the emotive 'meaning of life' cannot be separated. This approach reveals the basic error of the metaphysical views

that depend on absolute cognitive meaning. It also provides the basis for an account of how we can integrate meaning. Each new time we connect an experience to a symbol we extend meaning in a way that gives us more resources to develop more adequate beliefs. The practice of integrating meaning can be promoted by the arts, meditation and focusing, and can also involve working to resolve archetypes. Middle Way Philosophy was first developed by Robert M Ellis in a Ph.D. thesis, and he has now founded the Middle Way Society for the development and practice of the Middle Way beyond religious tradition.

[In the Company of Friends](#) - Llewellyn Vaughan-Lee 1994-08-08

The work of The Golden Sufi Center is to make available the teachings of the Sufi path. Weaving together dreams and spiritual stories, this "wise, rich, deeply moving, and significant book" (Andrew Harvey) explores the inner journey and the group's role in facilitating it.

Near-Death Experiences - Ornella Corazza

2008-06-30

Near death experiences fascinate everyone, from theologians to sociologists and neuroscientists.

This groundbreaking book introduces the phenomenon of NDEs, their personal impact and the dominant scientific explanations. Taking a strikingly original cross-cultural approach and incorporating new medical research, it combines new theories of mind and body with contemporary research into how the brain functions. Ornella Corazza analyses dualist models of mind and body, discussing the main features of NDEs as reported by many people who have experienced them. She studies the use of ketamine to reveal how characteristics of NDEs can be chemically induced without being close to death. This evidence challenges the conventional 'survivalist hypothesis', according to which the near death experience is a proof of the existence of an afterlife. This remarkable book concludes that we need to move towards a

more integrated view of embodiment, in order to understand what human life is and also what it can be. Ornella Corazza is a NDE researcher at the School of Oriental and African Studies (SOAS), University of London. In 2004-5 she was a Member of the 21st Century Centre of Excellence (COE) 'Program on the Construction of Death and Life Studies' at the University of Tokyo.

Synchronicity - Chris Mackey 2015-09-15

Synchronicity: the uncanny and fortuitous timing of events that seems to go beyond pure chance. Synchronicity can act as a guide along our life path, helping us through challenging times and nudging us toward self-fulfillment. Psychologist Chris Mackey offers astounding case studies, alongside a lucid explanation of the brain science underlying synchronicity and many practical suggestions for working with it, from journaling and symbol analysis to dream interpretation and ideas for accessing flow. He is convinced that synchronicity has a crucial role to

play in helping us “go within” and tap into our intuitive and spiritual selves. This book is also a passionate call for a new, more optimistic “positive psychiatry” that embraces our transcendent experiences. A 21st-century take on Jung’s legacy, this exciting new approach to synchronicity will appeal to anyone interested in the opportunities for personal development offered by altered states of consciousness. “A profound introduction to deep concepts of mind, meaning and the challenges of creating a life well lived for everyone.” --Ernest Rossi, Ph.D., author of *The Psychobiology of Gene Expression* and *Creating Consciousness*

Burning All Illusions - David Edwards 1996
This is a book about freedom. Above all about the idea that there is often no greater obstacle to freedom than the assumption that it has already been attained. What prison, after all, could be more secure than that deemed to be “the world,” where boundaries of action and thought are assumed to define not the limits of

the permissible, but the limits of the possible. In the past we have been prisoners of tyrants and dictators, and consequently have needed to win our freedom in very concrete, physical terms. We now need to free ourselves not from a slave ship or a concentration camp, but from many of the illusions fostered in our democratic society. “[A] wise and acute analysis of the way our minds are controlled, not in a totalitarian state, but in a 'democratic' one. Edwards also suggests how we can escape this control in a self-help book which, unlike other books of this genre, connects our inner world of alienation with the world outside.”—Howard Zinn “[A] treatise on what freedom truly means.... *Burning All Illusions* is an important philosophical and psychology text that should be on every political science curriculum reading list!”—Wisconsin Book Watch

A Concise Companion to Psychoanalysis, Literature, and Culture - Laura Marcus
2014-03-31

This concise companion explores the history of psychoanalytic theory and its impact on contemporary literary criticism by tracing its movement across disciplinary and cultural boundaries. Contains original essays by leading scholars, using a wide range of cultural and historical approaches Discusses key concepts in psychoanalysis, such as the role of dreaming, psychosexuality, the unconscious, and the figure of the double, while considering questions of gender, race, asylum and international law, queer theory, time, and memory Spans the fields of psychoanalysis, literature, cultural theory, feminist and gender studies, translation studies, and film. Provides a timely and pertinent assessment of current psychoanalytic methods while also sketching out future directions for theory and interpretation

[Migglism: A Beginner's Guide to Middle Way Philosophy](#) - Robert M. Ellis 2014-09-19

'Migglism' is a short term for Middle Way Philosophy, a practical philosophical approach

developed by Robert M. Ellis in a Ph.D. thesis and a series of books. Middle Way Philosophy brings together insights from Buddhism, philosophy and psychology to offer a framework of thinking for a range of integrative practices. This book aims to introduce these ideas in an accessible way. 'The Middle Way' is not a compromise, but a process of navigating between dogmatic extremes. By avoiding either positive or negative claims that go beyond experience, we can find a new way of thinking, valuing and practising. "The middle is the chaotic and confusing place between the extremes. While the extremes are simpler and more attractive, it is the mess in the middle where the interesting and creative activities occur - it is where we should be. Robert sets out a foundation for a way of thinking about the middle ground as a place to move towards." Ed Catmull, President of Pixar and Walt Disney *An Introduction to Jungian Coaching* - Avi Goren-Bar 2021-11-10

Based on the psychology of Carl Jung, this illuminating new book invites coaches to extend their toolbox with deep, creative, and efficient professional methods that derive from a new perspective on coaching. In using the unconscious archetypes as a practical active psychological database for change, the Jungian coach can contribute significant modification in the coachee's expected behavior. Jungian Coaching can be applied in evaluating the coachee, the team, and the corporation. This book translates Jungian psychology into simple comprehensive concepts. Each chapter translates theoretical concepts and rationale to the practice of coaching. Illustrated with practical examples from the corporate world and life coaching, it offers Jungian Coaching tools and techniques. By integrating the Gestalt psychology principle of the "here and now" into Jungian concepts, the author develops a new coaching tool that enables an activation of archetypes as a useful and empowering coaching

experience. A valuable introductory resource for all those involved in coaching relationships, this book can empower coachees and serve as a compass for personal growth. It will be of great interest to practicing coaches, executives, human resource managers, consultants, and psychotherapists.

Television and Psychoanalysis - Caroline Bainbridge 2018-05-01

Despite the prominence of television in our everyday lives, psychoanalytic approaches to its significance and function are notoriously few and far between. This volume takes up perspectives from object relations theory and other psychoanalytic approaches to ask questions about the role of television as an object of the internal worlds of its viewers, and also addresses itself to a range of specific television programmes, ranging from Play School, through the plays of Jack Rosenthal to recent TV blockbuster series such as In Treatment. In addition, it considers the potential

of television to open up new public spaces of therapeutic experience. Interviews with a TV producer and with the subject of a documentary expressly suggest that there is scope for television to make a positive therapeutic intervention in people's lives. At the same time, however, the pitfalls of reality programming are explored with reference to the politics of entertainment and the televisual values that heighten the drama of representation rather than emphasising the emotional experience of reality television participants and viewers.

Memories, Dreams, Reflections - Carl Gustav Jung 1995

"In the spring of 1957, when he was eighty-one years old, C. G. Jung undertook the telling of his life story. At regular intervals he had conversations with his colleague and friend Aniela Jaffé, and collaborated with her in the preparation of the text based on these talks. On occasion, he was moved to write entire chapters of the book in his own hand, and he continued to

work on the final stages of the manuscript until shortly before his death on June 6, 1961." -- Amazon web site.

Healing Arts - Susan Hogan 2001

As well as providing an authoritative history of art therapy, it covers such diverse topics as the philosophy of art therapy, the way attitudes to insanity have changed, the role of art therapy in the context of post-war rehabilitation and the treatment of tuberculosis patients, Surrealism, and Britain's first therapeutic community.

The Sacred Revival - Kingsley L. Dennis 2017-10-24

The Sacred Revival is a thought-provoking examination of the social, cultural, and personal development that is part of a new and unfolding era in our history. Its central thesis is that a new form of energy has entered our post-industrial (post-mechanical) epoch, and that this energy will be more conducive to a respect for feminine attributes and organization and our inward "interior search and gaze." The author predicts

there will be a healing of life on the planet from an emerging new planetary ecosystem that will be physical-digital-biological and a greater drive toward a coherent cosmic consciousness. He explains that one of our greatest needs is for a connection with the transcendent.

Twentieth-Century European Drama - Brian Docherty 1993-11-12

This volume offers critical and theoretical perspectives on some of the major figures in European drama in the twentieth century. There are thirteen essays covering Luigi Pirandello, Bertolt Brecht, Stanislaw Witkiewicz, Samuel Beckett, Antonin Artaud, Eugene Ionesco, Jean Anouilh, Fernando Arrabal, Jean Genet, Peter Weiss, Vaclav Havel, contemporary German theatre, and Dario Fo and Franca Rame. These specially commissioned essays combine contemporary theory with a discussion of the dramatic work of the playwrights who created modern drama in Europe.

Middle Way Philosophy: Omnibus Edition -

Robert M. Ellis 2017-11-21

“A departure at right angles to thinking in the modern Western world. An important, original work, that should get the widest possible hearing” (Iain McGilchrist, author of *The Master and his Emissary*) Middle Way Philosophy is not about compromise, but about the avoidance of dogma and the integration of conflicting assumptions. To rely on experience as our guide, we need to avoid the interpretation of experience through unnecessary dogmas. Drawing on a range of influences in Buddhist practice, Western philosophy and psychology, Middle Way Philosophy questions alike the assumptions of scientific naturalism, religious revelation and political absolutism, trying to separate what addresses experience in these doctrines from what is merely assumed. This Omnibus edition of Middle Way Philosophy includes all four of the volumes previously published separately: 1. The Path of Objectivity, 2. The Integration of Desire, 3. The Integration

of Meaning, and 4. The Integration of Belief.

Born Bad - James Boyce 2015-05-15
"Original sin is the Western world's creation story." According to the Christian doctrine of original sin, humans are born inherently bad, and only through God's grace can they achieve salvation. In this captivating and controversial book, acclaimed historian James Boyce explores how this centuries-old concept has shaped the Western view of human nature right up to the present. Boyce traces a history of original sin from Adam and Eve, St. Augustine, and Martin Luther to Adam Smith, Sigmund Freud, and Richard Dawkins, and explores how each has

contributed to shaping our conception of original sin. Boyce argues that despite the marked decline in church attendance in recent years, religious ideas of morality still very much underpin our modern secular society, regardless of our often being unaware of their origins. If today the specific doctrine has all but disappeared (even from churches), what remains is the distinctive discontent of Western people—the feelings of guilt and inadequacy associated not with doing wrong, but with being wrong. In addition to offering an innovative history of Christianity, Boyce offers new insights in to the creation of the West. *Born Bad* is the sweeping story of a controversial idea and the remarkable influence it still wields.

The Gift of Alzheimer's - Maggie La Tourelle
2015-04-28

What is dementia? Does it have a deeper meaning? As a loved-one slips away for us, is she or he entering a higher plane? In her groundbreaking book, *The Gift of Alzheimer's*,

Maggie chronicles her beautiful journey with her late mother who suffered from Alzheimer's. Miraculously, instead of destroying the lives of her family, the disease strengthened their bonds and revealed something incredible—the ability of Alzheimer's to connect those it touches with another world. Including the latest research into neuroscience and altered states of consciousness, the book offers hope and a way forward for those affected by this devastating disease. What follows is the extraordinary story of healing, love, and soul-searching undertaken by Maggie and Pat that will make you rethink everything you believe about Alzheimer's. In a disease that so many find distressing, the La Tourelle family found peace, renewal, and spiritual growth. This revolutionary book not only changes how we perceive Alzheimer's, but is also a window into the amazing powers of the human psyche and soul. With *The Gift of Alzheimer's*, La Tourelle explores the potential for Alzheimer's patients and their families to find

wisdom and meaning in the midst of tragedy and demonstrates how love, above all else, can heal.

Inclusive Organizational Transformation - Rica Viljoen 2016-05-23

Globalization, consumerism, legislation and human rights issues impact on workplace demographics, changing the very nature thereof.

It is of strategic importance to ensure that the benefits of diverse viewpoints and stakeholders are leveraged. However the underlying worldviews of economists, business leaders and consultants are often informed from a Western paradigm and solutions proposed and interventions facilitated are not integrated, integral, systemic or congruent with the containing environment or ecology. In Inclusive Organizational Transformation, Dr Rica Viljoen acknowledges that diversity of thought presents both gifts and challenges to leadership in multinational organizations. The existential question with which an individual is confronted impacts on his or her worldview. By continuously

applying a specific worldview, certain gifts manifest. These are called Human Niches. Here, Inclusivity is positioned as a radical transformational methodology with the purpose of unleashing the benefits of engagement and diversity of thought. The process of Inclusivity enables organizations to optimize the gifts of and contributions from a diverse workforce and unleash tacit knowledge. Case studies from Ghana, South Africa, and one where the same strategy had to be implemented in Australia, Peru and Tanzania are included and insights gained from the dynamics observed are shared. A synthesis of Inclusivity is presented in a model, meta-insights are derived and the prerequisites for Inclusivity on individual, group and organizational domain are illustrated.

Reflections on Learning, Life and Work -

Maureen Ryan 2012-10-26

This book records the stories of doctoral study experiences of the twenty-two writers. These research degree experiences are embedded in the lives and careers of the writers and the twenty-two distinctive projects draw from those individual lives and careers. The authors write about meeting the continuing demands of older and younger family members and of their struggles with ill health and work place demands while working through their studies. There is also the joy of coming to see themselves and being seen as research scholars and supporting and celebrating with others as they move

through candidature proposals and ethics applications to graduation. Apart from the stories that bring the writers to their particular projects and that colour their individual journeys, storying methodology is most often selected for the research, all of which is undertaken within the arts, humanities and education. Phenomenology, narrative, ethnography are central to most of the studies and the detailed accounts of each research topic, methods and outcomes locate each of the research projects in rich bodies of knowledge. Valued writers and readers in these fields, Mary Beattie and Elaine Martin have read each reflection and provided in turn a foreword and an afterword which bookend the volume and further enrich these reflections on learning, life and work.
