## **Genoa, 'La Superba'** - Nicholas Walton 2015

Genoa has an incredible story to tell. It rose from an obscurity imposed by its harsh geography to become a merchant-pirate superpower that helped create the medieval world. It fought bitter battles with its great rival Venice and imprisoned Marco Polo, as the feuding city-states connected Europe to the glories of the East. It introduced the Black Death to Europe, led the fight against the Barbary Corsairs, bankrolled Imperial Spain, and gave the world Christopher Columbus and a host of fearless explorers. Genoa and Liguria provided the brains and the heroism behind the Risorgimento, and was the last place emigrants saw before building new lives across the Atlantic. It played host to writers and Grand Tourists, gave football to the Italians, and helped build modern Italy. Today, along with the glorious Riviera coast of Liguria, Genoa provides some of the finest places on earth to sip wine, eat pesto and enjoy spectacular views. This book brings the past to life and paints a portrait of a modern port city and region that is only now coming to terms with a past that is as bloody, fascinating and influential as any in Europe.

## **From Peking to Mandalay: A Journey from North China to Burma through Tibetan Ssuch'uan and Yunnan** - Sir Reginald Fleming Johnston 2020-09-28

The journey of which an account is given in the following pages was not undertaken in the special interests of geographical or other science nor in the service of any Government. My chief object was to gratify a long-felt desire to visit those portions of the Chinese Empire which are least known to Europeans, and to acquire some knowledge of the various tribes subject to China that inhabit the wild regions of Chinese Tibet and north-western Yunnan. Though nearly every part of the Eighteen Provinces has in recent years been visited and described by European travellers, my route between Tachienlu and Li-chiang was one which—so far as I am aware—no British subject had ever traversed before me, and of which no description in book-form has hitherto appeared in any European language. From the ethnological point of view the Chinese Far West—to which the greater part of this book is devoted—is one of the most interesting regions in the world, and presents problems the solution

of which would settle many of the vexed questions relating to the origin and inter-relations of the Asiatic peoples. As for its geographical interest, it may be sufficient to say here that the principalities of Chala and Muli contain what are probably the highest spots inhabited by man on the face of the globe, and that several of the passes crossed by my little caravan are loftier than the highest of the passes existing along the route traversed by the British expedition to Lhasa. My own contributions to geographical and ethnological lore are of the slenderest; but if I can persuade some of my readers that Tibetan Ssuch'uan and western Yunnan are worth visiting, be it only for the glory of their mountain scenery, I shall consider that my book has fulfilled the most useful purpose to which it aspires. For those who are seized by a craving to revert for a time to something like the nomadic life of our remote forefathers, or to pass like the old Hindu ascetics into "the homeless state," there can be no country in the world more full of charm than some of the wilder and less-peopled regions of the Chinese Empire. There are enormous areas in that country covered with primeval forests in which man's foot has never trod, lofty mountains whose peaks are crowned with sparkling diadems of eternal snow, grand and savage gorges in which Nature has carved for herself in indelible letters the story of the world's youth, and gloomy chasms through which rush the mighty rivers that carry to the Indian Ocean and the Pacific snows that melted on the white roof of the world. And amid all this magnificence and desolation there are lovely valleys and stretches of garden-land that might have been chosen as the Edens of a hundred mythologies, and which in historic times have been the homes of religious recluses and poets, who, like others of their kind in Western lands, found in silence and solitude a refuge from the bitterness and pain of the world, or a hermitage in which, amid scenes of perennial beauty, they could weave their flowers of thought into immortal garlands of human words.

## **Poland - Culture Smart!** - Greg Allen 2015-07-01

The changes in Polish life, culture, economics, and development have been remarkable. And the pace of change shows little sign of abating. Through twenty-five years of post-Communist transformation and ten years as a member of the European Union, some Polish cities, like Warsaw, Kraków, Poznan, and Wrocław, have experienced an economic

renaissance thanks largely to direct foreign investment, EU funds, and an influx of tourists. Much of the countryside, and cities like Łódź and Lublin, however, are shadows of their former selves. The mass emigration of Polish workers following European integration has had as significant an effect on Poland as it has on the destination countries, such as the UK. Despite a crisis of confidence in the country's direction, a swing toward political populism, and the tragic death of the Polish president in the Smolensk disaster of 2010, Poland is the only EU member not to have suffered economic contraction in the years following the 2007-08 global financial crisis. That Poland continues to develop in growth and influence is a testament to the legendary Polish resolve in the face of adversity. This new, updated edition of Culture Smart! Poland provides visitors with an insight into everyday life in today's Poland. From the country's rich and tragic history to the growth of a modern economy, from the rustic rural countryside to the Warsaw hipster scene, the reader will gain an appreciation of Polish culture much deeper than that to be found in conventional travel guides.

**Principles of Management** - Openstax 2022-03-25

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Leduc, James Madison University Joy Leopold, Webster University Jeffrey Muldoon, Emporia State University James S. O'Rourke, University of Notre Dame Mapping Chengde - Philippe Foret 2000-06-01

The imperial residence of Chengde was built by two powerful and ambitious Manchu emperors between 1703 and 1780 in the mountains of Jehol. This volume, the first scholarly publication in English on the Manchu summer capital, reveals how this unlikely architectural and landscape enterprise came to help forge a dynasty's multicultural identity and concretize its claims of political legitimacy. Using both visual and textual materials, the author explores the hidden dimensions of landscape, showing how geographical imagination shaped the aesthetics of Qing court culture while proposing a new interpretation of the mental universe that conceived one of the world's most remarkable examples of imperial architecture.

**Urban Religion** - Jörg Rüpke 2020-02-24

So far religion has been seen as cause for dramatic developments in the history of cities, it has contributed to the monumentalisation of centres

and or has given importance to ex-centric places. Very recently, anthropologists have been discovering religion in the contemporary global city. But still awaiting historical investigation is the specific urban character of religious ideas, practices and institutions and the role of urban space shaping this very 'religion' in the course of history. The time-span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of 'religion' and witnessed extended waves of urbanisation, Rome being central to this. In addressing this problem, this book fills a significant gap in the scholarship on urban religion across time. Taking seriously the proposition that space is condition, medium and outcome of social relations, the development of 'urban religion' in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism. The key thesis is that city-space engineered the major changes that revolutionised religions. »This stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present. -With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life, Rüpke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite.« Monica L. Smith, author of *Cities: The First 6,000 Years* »Jörg Rüpke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled. Urban Religion offers no single overarching thesis, but it is consistently thought-provoking and suggests many intriguing lines of investigation for the future.« Greg Woolf, Institute of Classical Studies, London

**Mapping in Architectural Discourse** - Marc Schoonderbeek 2021-11-30

This book explores the notion of mapping in architectural discourse. First locating, positioning and theorizing mapping, it then makes explicit the relationship between research and design in architecture through cartography and spatial analysis. It proposes three distinct modalities: tool, operation and concept, showing how these methods lead to discursive aspects of architectural work and highlighting mapping as an instrument in developing architectural form. It emphasizes the importance of place and time as fundamental terms with which to understand the role of mapping. An investigation into architectural discourse, this book will appeal to academics and researchers within the discipline with a particular interest in theory, history and cartography.

**Imaginary Cities** - Darran Anderson 2017-04-06

How can we understand the infinite variety of cities? Darran Anderson seems to exhaust all possibilities in this work of creative nonfiction. Drawing inspiration from Marco Polo and Italo Calvino, Anderson shows that we have much to learn about ourselves by looking not only at the cities we have built, but also at the cities we have imagined. Anderson draws on literature (Gustav Meyrink, Franz Kafka, Jaroslav Hasek, and James Joyce), but he also looks at architectural writings and works by the likes of Bruno Taut and Walter Gropius, Medieval travel memoirs from the Middle East, mid-twentieth-century comic books, Star Trek, mythical lands such as Cockaigne, and the works of Claude Debussy. Anderson sees the visionary architecture dreamed up by architects, artists, philosophers, writers, and citizens as wedded to the egalitarian sense that cities are for everyone. He proves that we must not be locked into the structures that exclude ordinary citizens--that cities evolve and that we can have input. As he says: "If a city can be imagined into being, it can be re-imagined as well."

**Labour in a Single Shot** - Schwartz GRUNDMANN 2021-11-04

The book both extends and reflects upon a large-scale, international art project that has taken the form of an online database and numerous exhibitions (including the Venice Biennale and other important venues). The essays explore the social, political, and ethical ramifications of documenting global labour with a roving camera that often operates in close proximity to its human subjects. The inclusion of Antje Ehmman's journal entries, translated for the first time into English, will offer a real-time account of the workshops that will complement the scholarly essays' accounts of the videos.

**Jutaku: Japanese Houses** - Naomi Pollock 2015-10-12

Quirky, surprising and entertaining - with more than 400 houses, Jutaku is architecture at the speed of Japan. Frenetic. Pulsating. Disorienting. Japan's contemporary culture is constantly in flux. In stark contrast to the centuries old imperial architecture of Kyoto, recent Japanese architectural practices have ushered in an era of continuous experimentation. With 400 houses, one house per page, one image per house, Jutaku: Japanese Houses is a fast-paced, "quick hit" shock to the system that shines a Harajuku-bright neon light on the sheer volume, variety and novelty of contemporary Japanese residential architecture. Featuring the work of many of Japan's most famous architects including Shigeru Ban, Sou Fujimoto, Toyo Ito, Kengo Kuma, Jun Igarishi, Shuhei Endo and dozens of up and coming and completely unknown young architects, Jutaku is organized geographically taking readers on a bullet train journey across Japan's architectural landscape. Essential reading for architects, designers and fans of contemporary Japanese culture.

**Conspicuous Compassion** - Patrick West 2004

"We live in an age of conspicuous compassion. We sport empathy ribbons, send flowers to recently deceased celebrities, weep in public over murdered children, apologize for historical misdemeanors, wear red noses for the starving, go on demonstrations to proclaim 'Drop the Debt' or 'Not in My Name.' We feel each other's pain. We desperately seek a common identity and new social bonds to replace those that have

withered in the post-war era - the family, the church, the nation and neighborhood. Mourning sickness is a religion for the lonely crowd that no longer subscribes to orthodox churches. Its flowers and teddies are its rites, its collective minutes' silences its liturgy and mass. This book's thesis is that such displays of empathy do not change the world for the better: they do not help the poor, diseased, dispossessed or bereaved. Our culture of ostentatious caring is about projecting your ego, and informing others what a deeply caring individual you are. It is about feeling good, not doing good, and illustrates not how altruistic we have become, but how selfish. And, as Patrick West shows in this witty but incisive monograph, sometimes it can be cruel."
