e alla difesa della reputazione di un soggetto, persona o organizzazione che sia.” (dalla prefazione di Toni Muzi Falconi)

The Secret Formula - Fabio Toscano
2020-05-19

The legendary Renaissance math duel that ushered in the modern age of algebra The Secret Formula tells the story of two Renaissance mathematicians whose jealousies, intrigues, and contentious debates led to the discovery of a formula for the solution of the cubic equation. Niccolò Tartaglia was a talented and ambitious teacher who possessed a secret formula—the key to unlocking a seemingly unsolvable, two-thousand-year-old mathematical problem. He wrote it down in the form of a poem to prevent other mathematicians from stealing it. Gerolamo Cardano was a physician, gifted scholar, and notorious gambler who would not hesitate to use flattery and even trickery to learn Tartaglia's

secret. Set against the backdrop of sixteenth-century Italy, The Secret Formula provides new and compelling insights into the peculiarities of Renaissance mathematics while bringing a turbulent and culturally vibrant age to life. It was an era when mathematicians challenged each other in intellectual duels held outdoors before enthusiastic crowds. Success not only enhanced the winner's reputation, but could result in prize money and professional acclaim. After hearing of Tartaglia's spectacular victory in one such contest in Venice, Cardano invited him to Milan, determined to obtain his secret by whatever means necessary. Cardano's intrigues paid off. In 1545, he was the first to publish a general solution of the cubic equation. Tartaglia, eager to take his revenge by establishing his superiority as the most brilliant mathematician of the age, challenged Cardano to the ultimate mathematical duel. A lively and compelling account of genius, betrayal, and all-too-human failings, The Secret Formula reveals the epic

rivalry behind one of the fundamental ideas of modern algebra.

Julius Caesar - Luciano Canfora 2007-02-05

This book is a splendid profile of an extraordinary man, and a radically new interpretation of one of the most controversial figures in history. Caesar played a leading role in the politics and culture of a world empire, dwarfing his contemporaries in ambition, achievement and appetite. For that, he has occupied a central place in the political imagination of Europe ever since. Yet he remains something of an enigma, struck down by his own lieutenants because he could be neither comprehended nor contained. In surviving evidence he emerges as incommensurate and nonpareil, just beyond the horizons of contemporary political thought and understanding. The result of Luciano Canfora's many years of research is a fascinating portrait of the Roman dictator, combining the evidence of political history and psychology. The product

of a comprehensive study of the ancient sources, it paints an astonishingly detailed portrait of a complex personality whose mission of 'Romanisation' lies at the root of modern Europe. Key Features* Easy, engaging and pleasurable to read* About 42 chronological studies of events create a full portrait of Caesar and the contemporary Roman background* Space is devoted to the details surrounding his assassination

Albert Einstein, The Human Side - Albert Einstein 2013-10-27

Modesty, humor, compassion, and wisdom are the traits most evident in this illuminating selection of personal papers from the Albert Einstein Archives. The illustrious physicist wrote as thoughtfully to an Ohio fifth-grader, distressed by her discovery that scientists classify humans as animals, as to a Colorado banker who asked whether Einstein believed in a personal God. Witty rhymes, an exchange with Queen Elizabeth of Belgium about fine music, and expressions of his devotion to Zionism are but some of the highlights found in this warm

and enriching book.

[Opera in Seventeenth-Century Venice](#) - Ellen Rosand 2007-10-09

"In this elegantly constructed study of the early decades of public opera, the conflicts and cooperation of poets, composers, managers, designers, and singers—producing the art form that was soon to sweep the world and that has been dominant ever since—are revealed in their first freshness."—Andrew Porter "This will be a

standard work on the subject of the rise of Venetian opera for decades. Rosand has provided a decisive contribution to the reshaping of the entire subject. . . . She offers a profoundly new view of baroque opera based on a solid documentary and historical-critical foundation. The treatment of the artistic self-consciousness and professional activities of the librettists, impresarios, singers, and composers is exemplary, as is the examination of their reciprocal relations. This work will have a positive effect not only on studies of 17th-century, but on the history of opera in general."—Lorenzo Bianconi

Robots can't do networking (yet). 12 takeaways on how to create and manage interpersonal relationships in the digital era - Gianfranco Minutolo 2021-09-06

"What counts is what's written on your curriculum vitae, what you've done." Until yesterday this was the rule that governed rising to the top in the professional world. The current

job market, on the other hand, seems to be increasingly interested in the so-called soft skills, the aptitude skills that make one profile more suitable than another. The "queen" of these soft skills, the one that will allow both young people and their elders to face the exponential social and technological changes that await us, is the ability to create and maintain interpersonal and professional relationships over time. In other words: networking. The book tells a personal story in a simple, passionate and detailed way so that readers can understand the dynamics that regulate the creation of an effective network of contacts. Real cases are dissected in clear, methodological takeaways and summed up by quotes that show how the fruits of forty years can be replicated and are within the reader's reach through training and good techniques. Death in Venice, Tonio Kroger, and Other Writings: Thomas Mann - Thomas Mann 1999-04-01

Thomas Mann (1875-1955) won the Nobel Prize for literature in 1929. This is a collection of his shorter works. "Death in Venice", later filmed by Lucion Visconti starring Dirk Bogarde, was published in 1911. It is a poetic meditation on art and beauty, where the dying composer Aschenbach (modelled on Gustav Mahler) becomes fixated by the young boy Tadzio. The other stories are: "Tonio Kroger"; the collection entitled "Tristan"; "The Blood of the Walsungs"; "Mario the Magician"; and "The Tables of the Law". A number of essays are also included.

The Stars of Galileo Galilei and the Universal Knowledge of Athanasius Kircher - Roberto

Buonanno 2014-01-31

In this fascinating book, the author traces the careers, ideas, discoveries, and inventions of two renowned scientists, Athanasius Kircher and Galileo Galilei, one a Jesuit, the other a sincere man of faith whose relations with the Jesuits deteriorated badly. The Author documents Kircher's often intuitive work in many areas, including translating the hieroglyphs, developing sundials, and inventing the magic lantern, and explains how Kircher was a forerunner of Darwin in suggesting that animal species evolve. Galileo's work on scales, telescopes, and sun spots is mapped and discussed, and care is taken to place his discoveries within their cultural

environment. While Galileo is without doubt the "winner" in the comparison with Kircher, the latter achieved extraordinary insights by unconventional means. For all Galileo's fine work, the author believes that scientists do need to regain the power of dreaming, vindicating Kirchner's view.

In Praise of Asclepius - Donald A. Russell
2016-08-01

In the middle decades of the second century AD the acclaimed orator Aelius Aristides wrote a number of prose hymns to traditional Greek gods and thereby demonstrated that the cults of these gods had not yet become obsolete and were more than just a topic of backward-looking *paideia*. This volume presents four of these texts, specifically those that focus on the god of healing, Asclepius, together with a new edition of the Greek text, a new English translation with commentary, and a number of essays shedding additional light on these texts from various perspectives. All in all, the volume wants to

show how in these texts of Aristides the author's rhetorical skills, his outlook on the world and his personal religiosity come together to form a remarkable whole.

Frederick II - David Abulafia 1992

Frederick II of Hohenstaufen, Holy Roman Emperor, King of Sicily, King of Jerusalem, has, since his death in 1250, enjoyed a reputation as one of the most remarkable monarchs in the

history of Europe. His wide cultural tastes, his apparent tolerance of Jews and Muslims, his defiance of the papacy, and his supposed aim of creating a new, secular world order make him a figure especially attractive to contemporary historians. But as David Abulafia shows in this powerfully written biography, Frederick was much less tolerant and far-sighted in his cultural, religious, and political ambitions than is generally thought. Here, Frederick is revealed as the thorough traditionalist he really was: a man who espoused the same principles of government as his twelfth-century predecessors, an ardent leader of the Crusades, and a king as willing to make a deal with Rome as any other ruler in medieval Europe. Frederick's realm was vast. Besides ruling the region of Europe that encompasses modern Germany, Czechoslovakia, Poland, eastern France, and northern Italy, he also inherited the Kingdom of Sicily and parts of the Mediterranean that include what are now Israel, Lebanon, Malta, and Cyprus. In addition,

his Teutonic knights conquered the present-day Baltic States, and he even won influence along the coasts of Tunisia. Abulafia is the first to place Frederick in the wider historical context his enormous empire demands. Frederick's reign, Abulafia clearly shows, marked the climax of the power struggle between the medieval popes and the Holy Roman Emperors, and the book stresses Frederick's steadfast dedication to the task of preserving both dynasty and empire. Through the course of this rich, groundbreaking narrative, Frederick emerges as less of the innovator than he is usually portrayed. Rather than instituting a centralized autocracy, he was content to guarantee the continued existence of the customary style of government in each area he ruled: in Sicily he appeared a mighty despot, but in Germany he placed his trust in regional princes, and never dreamed of usurping their power. Abulafia shows that this pragmatism helped bring about the eventual transformation of medieval Europe into modern nation-states.

The book also sheds new light on the aims of Frederick in Italy and the Near East, and concentrates as well on the last fifteen years of the Emperor's life, a period until now little understood. In addition, Abulafia has mined the papal registers in the Secret Archive of the Vatican to provide a new interpretation of Frederick's relations with the papacy. And his attention to Frederick's register of documents from 1239-40--a collection hitherto neglected--has yielded new insights into the cultural life of the German court. In the end, a fresh and fascinating picture develops of the most enigmatic of German rulers, a man whose accomplishments have been grossly distorted over the centuries.

[Decadent Genealogies](#) - Barbara Spackman
2018-03-15

Barbara Spackman here examines the ways in which decadent writers adopted the language of physiological illness and alteration as a figure for psychic otherness. By means of an

ideological and rhetorical analysis of scientific as well as literary texts, she shows how the rhetoric of sickness provided the male decadent writer with an alibi for the occupation and appropriation of the female body.

The Power of Concentration (Unabridged Edition) - William Walker Atkinson 2016-02-03
This carefully crafted ebook: "The Power of Concentration (Unabridged Edition)" is formatted for your eReader with a functional and detailed table of contents. William Walker Atkinson (1862-1932) was an attorney, merchant, publisher, and author, as well as an occultist and an American pioneer of the New Thought movement. He is also known to have been the author of the pseudonymous works attributed to Theron Q. Dumont and Yogi Ramacharaka. Excerpt: "We all know that in order to accomplish a certain thing we must concentrate. It is of the utmost value to learn how to concentrate. To make a success of

anything you must be able to concentrate your entire thought upon the idea you are working out. Do not become discouraged, if you are unable to hold your thought on the subject very long at first. There are very few that can. It seems a peculiar fact that it is easier to concentrate on something that is not good for us, than on something that is beneficial. This tendency is overcome when we learn to concentrate consciously. If you will just practice a few concentration exercises each day you will find you will soon develop this wonderful power."
