Midwestern Native Shrubs and Trees - Charlotte Adelman 2017-03-30

In this companion volume to the bestselling *The Midwestern Native Garden: Native Alternatives to Nonnative Flowers and Plants*, Charlotte Adelman and Bernard L. Schwartz offer another indispensable guide to replacing nonnative plants with native alternatives. This time, their subject is the native woody species that are the backbone of our gardens and landscapes. Among other ecological benefits, native shrubs and trees provide birds and butterflies with vital food and reproductive sites that nonnative species cannot offer. And they tend to be hardier and easier to maintain. The authors provide a comprehensive selection of native woody alternatives that, season by season, provide effects similar to those of nonnative shrubs and trees used for ornamental purposes and shade. These plants are suitable for all garden styles, provide blooms and fall color,

and have the same cultivation requirements as their nonnative counterparts. Nature notes alert readers to the native species' unique ecological roles. Unlike other gardening guides, *Midwestern Native Shrubs and Trees* goes beyond mere suggestion to provide gardeners with the tools they need to make informed, thoughtful choices. Knowing which native species to plant for desired effects empowers landscapers and gardeners to take on a greater role in protecting our midwestern environment.

The Garden Journal, Planner and Log Book - Joy Kieffer 2015-11-28

For the gardener who wants to enjoy the benefits of gardening, without the frustrations. FOR THE COST OF ONE SIMPLE GARDEN TOOL, you can OWN

THE MOST VALUABLE GARDEN TOOL OF ALL; one that will save you hundreds and perhaps thousands of dollars in mistakes. Even more valuable than your favorite garden trowel or spade is a written record of what works in your garden. WHILE GARDENING BOOKS AND THE INTERNET ARE FULL OF GREAT ADVICE, THEY CAN'T REPLACE PERSONAL EXPERIENCE. Your garden is in your micro-climate, with your soil. Perennials in one part of the country aren't perennials in another. There are simply too many plants and too many variables for anyone to remember from year to year what worked where and what didn't and why. You need to remember WHAT WORKS FOR YOU-IN YOUR GARDEN. Every gardener faces repeat attacks of pests or disease and needs to remember which treatment worked and which did more harm than good. Every gardener has weeded out emerging perennials, forgetting what they planted where. Every gardener needs a

memory! THE GARDEN JOURNAL, PLANNER & LOG BOOK is a book of garden forms with the flexibility needed to personalize your style of record keeping. With this one book you can track your purchases from store to harvest to propagation, and never waste money and labor again. What really makes the difference between a great and a mediocre garden is how well the gardener keeps track of all the information needed to enhance success and avoid repeated failures. GARDENING IS AN ART, BUT IT'S ALSO A SCIENCE. THE GARDEN JOURNAL , PLANNER & LOG BOOK is designed to make record-keeping simple and easy. Every form is designed to include all the pertinent information needed, while minimizing the amount of time required to record that information. Just on the individual plant pages alone, there are over fifty possible check boxes for each plant. Use as many or as few as you desire, and record as much or as little as you wish in the

spaces for other information. * Fill out log pages for annuals, biennials and perennials, with the location of each plant * Keep track of the lifecycle of all your flowers, herbs, vines, etc. on log pages. * Fill in the times to prune, trim and tidy which plants by season, depending on your area. * Make a plan for up to four years on the planning pages. * Draw out garden plots for twenty beds on graph paper with notes on the pages opposite. * Keep records of hardscaping, weather, formulas, pests and diseases, cultivation and propagation, bloom and harvest times, flowers, bulbs, fruit, vegetables, herbs, vines, shrubs and trees. * Keep a diary for all the things you simply must write out using sentences or drawings, because as much as gardening is a science, it is an art above all. YOUR GARDEN WILL LOOK LIKE ART; but you will know that THE GARDEN JOURNAL, PLANNER & LOG BOOK is the science behind your success. Author's note: The book binding is hinged on

the 11" top edge, to open like a calendar. Due to the fact that the printing company does not have in place protocols to handle an 11" landscape spine layout, the result is an incorrectly rotated image on the sales page.

how "The Gardening Girl", Joy Bloom, the author who is writing these journals & notebooks for Infinitely Publishing is using these types of garden journals to get the maximum out of her garden experience. "Everywhere that I go to my garden, my gardening planner goes with me. A tiny thing, but powerful! Another advantage of a small log book like this is that it fits into any of my pockets." Instead of writing out long, complicated & boring gardening stories into a so-called diary on a daily basis, you just use the easier version of a prompted log book and planner which includes prompts to organize your gardening experience and outcome. Things like temperature, light, water supply, prices of supplies, and so on. It is a less structured & more creative and fun process. Once you start achieving your daily planning and outcome logging goals then you can replicate the entire process all over again if you slip back into lazy and unproductive mode. Customers of Infinitely are

applying a daily gardening planning ritual to become a better, more experienced, excited, resourceful, inspired & creative gardener.
