The Tale of Sinuhe and Other Ancient Egyptian Poems, 1940-1640 BC - 1998

"This anthology contains all the substantial surviving works from the golden age of Ancient Egyptian fictional literature (c.1940-1640 B.C.). Composed by an anonymous author in the form of a funerary autobiography, the Tale tells how the courtier Sinuhe flees Egypt at the death of his king. His adventures bring wealth and happiness, but his failure to find meaningful life abroad is only redeemed by the new king's sympathy, and he finally returns to the security of his homeland. Other works from the Middle Kingdom include a poetic dialogue between a man and his soul on the problem of suffering and death, a teaching about the nature of wisdom

which is bitterly spoken by the ghost of the assassinated King Amenemhat I, and a series of light-hearted tales of wonder from the court of the builder of the Great Pyramid."--Jacket.

Historical Painting

Techniques, Materials, and Studio Practice - Arie Wallert

1995-08-24

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators

worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam.

Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical

sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Count Like an Egyptian - David Reimer 2014-04-27

A lively collection of fun and challenging problems in ancient Egyptian math. The mathematics of ancient Egypt was fundamentally different from our math today. Contrary to what people might think, it wasn't a primitive forerunner of modern mathematics. In fact, it can't be understood using our current computational methods. Count Like an Egyptian provides a fun, hands-on introduction to the intuitive and often-surprising art of ancient Egyptian math. David Reimer guides you step-by-step through addition, subtraction, multiplication, and more. He even shows you how fractions and decimals may have been calculated—they technically

didn't exist in the land of the pharaohs. You'll be counting like an Egyptian in no time, and along the way you'll learn firsthand how mathematics is an expression of the culture that uses it, and why there's more to math than rote memorization and bewildering abstraction. Reimer takes you on a lively and entertaining tour of the ancient Egyptian world, providing rich historical details and amusing anecdotes as he presents a host of mathematical problems drawn from different eras of the Egyptian past. Each of these problems is like a tantalizing puzzle, often with a beautiful and elegant solution. As you solve them, you'll be immersed in many facets of Egyptian life, from hieroglyphs and pyramid building to agriculture, religion, and even bread baking and beer brewing. Fully illustrated in color throughout, *Count Like an Egyptian* also teaches you some Babylonian computation—the precursor to our modern system—and compares ancient Egyptian mathematics to today's math,

letting you decide for yourself which is better.

The Mummy Makers of Egypt - Tamara Bower 2016-06-07

A gorgeously illustrated story about a family of Egyptian embalmers that will enthrall kids with its mummy-making details and brilliantly painted pages. From artist and Egypt specialist Tamara Bower comes her third, gorgeous book about Ancient Egypt. Using the classic style of Egyptian art, the book is painstakingly accurate in facts and illustrative style. Artifacts, funerary customs, kid-loving gory details of the mummification process,

hieroglyphs, and details of life in ancient Egypt are told through the eyes of Ipy, whose father is embalmer to the King. Yuya, father of the Queen, has died and Ipy must help his father in the mummification process. Yuya is an actual mummy and the discovery of his tomb is an entertaining story in itself, with the archaeologist Theodore Davis fainting at the sight of so much gold, and the portly Gaston Maspero getting stuck while trying to climb into the tomb. Yuya's tomb was a spectacular discovery in the Valley of the Kings that was later overshadowed only by the discovery of King Tut, Yuya's great-grandson. The book features sidebars of hieroglyphs and their meanings, a map, and an afterword telling more about the life of Yuya, of the burial process, and ancient Egypt in general. While there are a number of children's books on mummies, none are told from the point of view of the embalmers themselves, and none are illustrated with the

meticulous eye of Tamara Bower.

Egyptian Life Stickers - A. G. Smith 1997-07-18

The Conservation of Cave 85 at the Mogao Grottoes,

Dunhuang - Neville Agnew

2014-02-01

The Mogao Grottoes, a World Heritage Site in northwestern China, are located along the ancient caravan routes—collectively known as the Silk Road—that once linked China with the West. Founded by a Buddhist monk in the late fourth century, Mogao flourished over the following millennium, as monks, local rulers, and travelers commissioned hundreds of cave temples cut into a mile-long rock cliff and adorned them with vibrant murals. More than 490 decorated grottoes remain, containing

thousands of sculptures and some 45,000 square meters of wall paintings, making Mogao one of the world's most significant sites of Buddhist art. In 1997 the Getty Conservation Institute, which had been working with the Dunhuang Academy since 1989, began a case study using the Late-Tang dynasty Cave 85 to develop a methodology that would stabilize the deteriorating wall paintings. This abundantly illustrated volume is the definitive report on the project, which was completed in 2010.

Ancient Egyptian Design Coloring Book - Ed Sibbett 1978

Gold glints from the tomb of Tutankhamen ? gold and the thousand shades of the Nile lotus. These 39 authentic pictures are designs taken from Tut's tomb and other shrines in Thebes, from the 18th?20th Dynasties (c. 1567?1085 B.C.) as rendered

by noted designer Ed Sibbett, Jr. They can be colored in the manner of the Egyptian painters (as on the covers) or any way your imagination suggests. Some of these motifs, taken from tomb ceilings, murals, wood sculpture, vases, and papyrus paintings, have been featured in the traveling Tutankhamen exhibit. Motifs include the winged Isis, Osiris, Buto the Cobra-goddess, various Pharaohs, scarabs, and animal deities; scenes of daily life (hunting, boating, banqueting, masters, and servants), and decorative ornament ? lotus, ibis, falcon, lion, snake, barbarian. Identifying captions with historical information accompany each drawing, and a brief introduction and glossary of gods complete this coloring book, a fine source of ancient Egyptian pictorial design, and a pleasure to color in any medium.

The Quest for Artificial Intelligence - Nils J. Nilsson
2009-10-30
Artificial intelligence (AI) is a field within computer science

that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is already embedded in face-recognizing cameras, speech-recognition software, Internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries.
