21st Century Anthropology: A Reference Handbook - H. James Birx 2010

Forgotten Bones - Lois Miner Huey 2015-08-01
Imagine you're watching a backhoe dig up the ground for a construction project when a round object rolls down a pile of dirt and stops at your feet. You pick it up, brush off some dirt, and realize you're holding a skull! This is exactly what happened in Albany, New York, in 2005. Workers were putting in new sewer line when a backhoe driver dug up a skull. After police declared the skull wasn't connected to any recent crimes, a team of archaeologists took a closer look. They determined the skull was from an African American who had died more than one hundred years earlier. Suddenly the construction site turned into an archaeological dig. Scientists excavated more bones and realized that they had located a long-lost slave cemetery. Slavery had been legal in the northern United States, including in New York State, in colonial times, but the stories of these slaves are largely unknown. This site became just the third slave cemetery ever to be excavated in the North. See how archaeologists pieced together the truth about these once forgotten bones.

Uncovering the Past - William H. Stiebing 1994
This study focuses on the development of archaeology as a discipline, tracing the

milestones in the evolution of systematic excavation. It covers the entire history of archaeology from the "heroic age" (1450-1925), to the advanced stages of archaeology beginning with **Herculaneum Uncovered** - Howard Burton 2021-01-12

This book is based on an in-depth filmed conversation between Howard Burton and Andrew Wallace-Hadrill, Director of Research and Honorary Professor of Roman Studies in the Faculty of Classics at the University of Cambridge. This wide-ranging conversation covers his fascinating archaeological work done in Herculaneum and Pompeii, the politics of excavation, and life in the ancient Roman world. This carefully-edited book includes an introduction, Historical Value, and questions for discussion at the end of each chapter: I. What We Know - History and geology II. Letting Sleeping Dogs Lie - Exploring historical motivations III. Exploring Roman Society - Housing, slavery, citizenship and status IV. Herculaneum vs. Pompeii - Different eyes on the past V. The Future of the Past - Excavation, preservation and spending effectively About Ideas Roadshow Conversations Series: This book is part of an expanding series of 100+ Ideas Roadshow conversations, each one presenting a wealth of candid insights from a leading expert through a focused yet informal setting to give

non-specialists a uniquely accessible window into frontline research and scholarship that wouldn't otherwise be encountered through standard lectures and textbooks. For other books in this series visit our website:

History - Peter Claus 2017-04-07

Demystifying the subject with clarity and verve, *History: An Introduction to Theory, Method and Practice* familiarizes the reader with the varied spectrum of historical approaches in a balanced, comprehensive and engaging manner. Global in scope, and covering a wide range of topics from the ancient and medieval worlds to the twenty-first century, it explores historical perspectives not only from historiography itself, but from related areas such as literature, sociology, geography and anthropology. Clearly written, accessible and student-friendly, this second edition is fully updated throughout to include: An increased spread of case studies from beyond Europe, especially from American and imperial histories. New chapters on important and growing areas of historical inquiry, such as environmental history and digital history Expanded sections on political, cultural and social history More discussion of non-traditional forms of historical representation and knowledge like film, fiction and video games. Accompanied by a new companion website (www.routledge.com/cw/claus) containing valuable supporting material for students and instructors such as discussion questions, further reading and web links, this book is an essential introduction for all students of historical theory and method.

What Was Stonehenge For? - Anita Croy 2017-07-15

Stonehenge is one of the archaeological mysteries of the world. Experts are not entirely certain why Stonehenge was built, but there are clues that have aided them in working toward discovering its true purpose. Readers will learn about some of the theories archaeologists have about Stonehenge's past and how there is not enough evidence to support their theories entirely. Maps, sidebars, and full-color photographs supplement information in the text to spark readers' interest in learning more about Stonehenge.

My Life in Ruins - Adam Ford 2015-07-01

Part memoir, part potted history of civilisation, *My Life in Ruins* is the account of a life lived in uncovering the past. Adam Ford is an archaeologist. Not only has he been on expeditions to unlock the mysteries of the past in the Caribbean, British Isles, Jordan, Syria, Israel, United Arab Emirates and Australia, he's also had heat stroke, hypothermia, and dysentery; been chased by camel spiders; walked on by scorpions and pestered by bugs big enough to ride. In more than 20 years roaming the globe, he's lived in some of the most remote locations in the world and suffered the back-breaking and soul-destroying monotony of shifting tonnes of dirt with a shovel. From Cold War bunkers in England to Bronze Age cities on the Euphrates, remote caves in the Jordan Valley, shipwrecks in Western Australia and burials in Barbados, Adam has dug, dived, abseiled and trekked his way into history. Part memoir, part potted history of civilisation, *MY LIFE IN RUINS* is the story of a life lived in uncovering the past.

Archaeology for Young Explorers - Patricia Samford 1995

Learn how archaeologists discover treasures in the ground and preserve them in the lab.

Archaeology for Kids - Richard Panchyk 2001

Archaeology - Kevin Greene 2002

A substantially revised and expanded edition of one of the most widely-used and respected general introductions to the field of archaeology.

Discovering the City of Sodom - Steven Collins 2016-03-15

The fascinating, true account of the quest for one of the Old Testament's most infamous cities. Like many Christians today in the academic world, Dr. Steven Collins felt pulled in different directions when it came to apparent conflicts between the Bible and scholarly research and theory—an intellectual crisis that inspired him to lay it all on the line as he set off to locate the lost city of Sodom. Recounting Dr. Collins's quest for Sodom in absorbing detail, this adventure-cum-memoir reflects the tensions that define biblical archaeology as it narrates a tale of discovery. Readers follow “Dr. C” as he tracks down biblical, archaeological, and geographical

clues to the destruction of Sodom and Gomorrah, narrowing the list of possible sites as he weighs evidence and battles skeptics. Finally, he arrives at a single location that looms as the only option: a massive ancient ruin called Tall el-Hammam in the Hashemite Kingdom of Jordan. Many scholars who were initially opposed to Dr. Collins's theory now concede that history books may need to be rewritten in light of his groundbreaking discovery. It—along with several other recent finds—is challenging the assumptions of academics and asserting a new voice in the controversy of biblical archaeology and the dispute over using the Bible as a credible historical source. *** From respected archaeologist Dr. Steven Collins and award-winning author Dr. Latayne C. Scott comes the fascinating, true account of the frustrating search and exciting excavation of the city the Bible calls Sodom, which scholars and others had “misplaced” for hundreds of years. Like many modern-day Christians, Dr. Collins struggled with what seemed to be a clash between his heritage of belief in the Bible and the research regarding ancient history and human evolution. This crisis of faith led him to embark on a quest to put both his archaeological education and the Bible to the test by seeking out the lost ancient city, an expedition that has led to one of the most exciting finds in recent archaeology. Challenging the assumptions of academics around the world, Discovering the City of Sodom may well inspire a revision of the history books. Dr. Collins has become a new voice in the controversy over using the Bible as a credible source of understanding the past—and opened a new chapter in the struggle over the soul of biblical archaeology.

Critical Approaches to Fieldwork - Gavin Lucas 2002-01-04

This work takes as its starting point the role of fieldwork and how this has changed over the past 150 years. The author argues against progressive accounts of fieldwork and instead places it in its broader intellectual context to critically examine the relationship between theoretical paradigms and everyday archaeological practice. In providing a much-needed historical and critical evaluation of current practice in archaeology, this book opens up a topic of debate which affects all

archaeologists, whatever their particular interests.

Lost Cities, Ancient Tombs - National Geographic 2021-11-30

Blending high adventure with history, this chronicle of 100 astonishing discoveries from the Dead Sea Scrolls to the fabulous "Lost City of the Monkey God" tells incredible stories of how explorers and archaeologists have uncovered the clues that illuminate our past. Archaeology is the key that unlocks our deepest history. Ruined cities, golden treasures, cryptic inscriptions, and ornate tombs have been found across the world, and yet these artifacts of ages past often raised more questions than answers. But with the emergence of archaeology as a scientific discipline in the 19th century, everything changed. Illustrated with dazzling photographs, this enlightening narrative tells the story of human civilization through 100 key expeditions, spanning six continents and more than three million years of history. Each account relies on firsthand reports from explorers, antiquarians, and scientists as they crack secret codes, evade looters and political suppression, fall in love, commit a litany of blunders, and uncover ancient curses. Pivotal discoveries include: King Tut's tomb of treasure Terracotta warriors escorting China's first emperor into the afterlife The glorious Anglo-Saxon treasure of Sutton-Hoo Graves of the Scythians, the real Amazon warrior women New findings on the grim fate of the colonists of Jamestown With a foreword from bestselling author Douglas Preston, *Lost Cities, Ancient Tombs* is an expertly curated and breath-taking panorama of the human journey.

Archaeology: A Very Short Introduction - Paul Bahn 2012-08-30

This entertaining Very Short Introduction reflects the enduring popularity of archaeology - a subject which appeals as a pastime, career, and academic discipline, encompasses the whole globe, and surveys 2.5 million years. From deserts to jungles, from deep caves to mountain tops, from pebble tools to satellite photographs, from excavation to abstract theory, archaeology interacts with nearly every other discipline in its attempts to reconstruct the past. In this new edition, Paul Bahn brings the text up to date, including information about new discoveries and interpretations in the field, and highlighting the impact of developments such as the potential use of DNA and stable isotopes in teeth, as well the effect technology and science are having on archaeological exploration. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Deep Time Dreaming - Billy Griffiths 2018-02-26

People would have known about Australia before they saw it. Smoke billowing above the sea spoke of a land that lay beyond the horizon. A dense cloud of migrating birds may have pointed the way. But the first Australians were voyaging into the unknown. Soon after Billy Griffiths joins his first archaeological dig as camp manager and

cook, he is hooked. Equipped with a historian's inquiring mind, he embarks on a journey through time, seeking to understand the extraordinary deep history of the Australian continent. *Deep Time Dreaming* is the passionate product of that journey. It investigates a twin revolution: the reassertion of Aboriginal identity in the second half of the twentieth century, and the uncovering of the traces of ancient Australia. It explores what it means to live in a place of great antiquity, with its complex questions of ownership and belonging. It is about a slow shift in national consciousness: the deep time dreaming that has changed the way many of us relate to this continent and its enduring, dynamic human history. John Mulvaney Book Award: Winner Ernest Scott Prize: Winner NSW Premier's Literary Awards: Winner - Book of the Year NSW Premier's Literary Awards: Winner - Douglas Stewart Prize for Non-fiction Victorian Premier's Literary Awards: Highly Commended Queensland Literary Awards: Shortlisted Prime Minister's Literary Awards: Shortlisted Educational Publishing Awards: Shortlisted Australian Book Industry Awards: Longlisted CHASS Book Prize: Longlisted 'What a revelatory work! If you wish to hear the voice of our continent's history before the written word, *Deep Time Dreaming* is a must read. The freshest, most important book about our past in years.' —Tim Flannery 'Once every generation a book comes along that marks the emergence of a powerful new literary voice and shifts our understanding of the nation's past. Billy Griffiths' *Deep Time Dreaming* is one such book. Deeply researched, creatively conceived and beautifully written, it charts the expansion of archaeological knowledge in Australia for the first time. No other book has managed to convey the mystery and intricacy of Indigenous antiquity in quite the same way. Read it: it will change the way you see Australian history.' —Mark McKenna, historian 'Billy Griffiths' *Deep Time Dreaming: Uncovering Ancient Australia* is a remarkable book, and one destined, I believe, to become a modern classic of Australian history writing. Written in vivid, evocative prose, this book will grip both the expert and the general reader alike.' —Iain McCalman, author of *The Reef: A Passionate History: The Great Barrier*

Reef from Captain Cook to Climate Change
Unearthing childhood - Robin Derricourt
2018-05-31

This is the first book to survey the 'hidden half' of prehistoric societies as revealed by archaeology - from Australopithecines to advanced Stone Age foragers, from farming villages to the beginnings of civilisation. Prehistoric children can be seen in footprints and finger daubs, in images painted on rocks and pots, in the signs of play and the evidence of first attempts to learn practical crafts. The burials of those who did not reach adulthood reveal clothing, personal adornment, possession and status in society, while the bodies themselves provide information on diet, health and sometimes violent death. This book demonstrates the extraordinary potential for the study of childhood within the prehistoric record, and will suggest to those interested in childhood what can be learnt from the study of the deep past.

Finding Sand Creek - Jerome A. Greene
2013-07-10

The 1864 Sand Creek Massacre is one of the most disturbing and controversial events in American history. While its historical significance is undisputed, the exact location of the massacre has been less clear. Because the site is sacred ground for Cheyenne and Arapaho Indians, the question of its location is more than academic; it is intensely personal and spiritual. In 1998 the National Park Service, under congressional direction, began a research program to verify the location of the Sand Creek site. The team consisted of tribal members, Park Service staff and volunteers, and local landowners. In *Finding Sand Creek*, the project's leading historian, Jerome A. Greene, and its leading archeologist, Douglas D. Scott, tell the story of how this dedicated group of people used a variety of methods to pinpoint the site. Drawing on oral histories, written records, and archeological fieldwork, Greene and Scott present a wealth of evidence to verify their conclusions. Greene and Scott's team study led to legislation in the year 2000 that established the Sand Creek Massacre National Historic Site.

The Dig - John Preston 2016-04-19

THE BASIS FOR THE NETFLIX FILM
STARRING CAREY MULLIGAN, RALPH

FIENNES, AND LILY JAMES A literary adventure that tells the story of a priceless buried treasure discovered in England on the eve of World War II In the long, hot summer of 1939, Britain is preparing for war, but on a riverside farm in Suffolk there is excitement of another kind. Mrs. Pretty, the widowed owner of the farm, has had her hunch confirmed that the mounds on her land hold buried treasure. As the dig proceeds, it becomes clear that this is no ordinary find. This fictional recreation of the famed Sutton Hoo dig follows three months of intense activity when locals fought outsiders, professionals thwarted amateurs, and love and rivalry flourished in equal measure. As the war looms ever closer, engraved gold peeks through the soil, and each character searches for answers in the buried treasure. Their threads of love, loss, and aspiration weave a common awareness of the past as something that can never truly be left behind.

National Parks - 2000-03

The flagship publication of the National Parks Conservation Association, *National Parks Magazine* (circ. 340,000) fosters an appreciation of the natural and historic treasures found in the national parks, educates readers about the need to preserve those resources, and illustrates how member contributions drive our organization's park-protection efforts. *National Parks Magazine* uses images and language to convey our country's history and natural landscapes from Acadia to Zion, from Denali to the Everglades, and the 387 other park units in between.

W.G. Sebald's Hybrid Poetics - Lynn L. Wolff
2014-04-02

This book offers a new critical perspective on the perpetual problem of literature's relationship to reality and in particular on the sustained tension between literature and historiography. The scholarly and literary works of W.G. Sebald (1944-2001) serve as striking examples for this discussion, for the way in which they demonstrate the emergence of a new hybrid discourse of literature as historiography. This book critically reconsiders the claims and aims of historiography by re-evaluating core questions of the literary discourse and by assessing the ethical imperative of literature in the 20th and 21st centuries. Guided by an inherently interdisciplinary framework, this book elucidates

the interplay of epistemological, aesthetic, and ethical concerns that define Sebald's criticism and fiction. Appropriate to the way in which Sebald's works challenge us to rethink the boundaries between discourses, genres, disciplines, and media, this work proceeds in a methodologically non-dogmatic way, drawing on hermeneutics, semiotics, narratology, and discourse theory. In addition to contextualizing Sebald within postwar literature in German, the book is the first English-language study to consider Sebald's oeuvre as a whole. Of interest for Sebald experts and enthusiasts, literary scholars and historians concerned with the problematic of representing the past.

The Case for Archaeology - John D. Currid 2020
"We gain encouragement and helpful background to Scripture in studying the land of the Bible (the "fifth gospel"). Archaeologist and biblical scholar John Currid overviews areas of inquiry and discovery"--

Practical Archaeology - Christopher Catling 2009

This book is a guide for all interested in archaeology. Readers can find a section on the archaeological periods, from pre-history to pre-Columbian, and the discoveries associated with them. Here the author also wants to give advice on how to get involved in local research projects, restoration initiatives and actual excavations. The book also intends to investigate the techniques associated with maritime archaeology, battlefields, facial reconstruction, astro-archaeology and more.

Motel of the Mysteries - David Macaulay 1979-10-11

It is the year 4022; all of the ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985. Imagine, then, the excitement that Howard Carson, an amateur archeologist at best, experienced when in crossing the perimeter of an abandoned excavation site he felt the ground give way beneath him and found himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, was clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries, including the remains of two bodies, one of them on a ceremonial bed facing an altar that appeared to be a means of communicating

with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber, permitted him to piece together the whole fabric of that extraordinary civilization.

Children of the Past - Lois Miner Huey 2017-01-01

Do you have much in common with kids from long ago? Sure, their clothes and homes looked different. They ate different food and might not have ever gone to school. But they also made art—just like you. They helped their families with chores—just like you. They played with friends and siblings, and they explored the world around them. Archaeologists know about the lives of children from the past because of what they left behind: toys, tools, clothes, and more. So get ready to travel back in time and check out the lives of kids—from European cave kids twenty thousand years ago to American Indian kids one thousand years ago.

Uncovering Southeast Asia's Past - European Association of Southeast Asian Archaeologists. International Conference 2006

The 36 chapters in this collection have been selected to give an overview of recent research into prehistoric and early historic archaeology in Southeast Asia. In the first chapter Her Royal Highness Princess Maha Chakri Sirindhorn of Thailand comments on the significance of the inscriptions from the important Khmer temple, Prasat Phnom Rung in northeastern Thailand. Following this, Professor Charles Higham gives an original and insightful survey of the prehistoric threads linking south China and the countries of modern Southeast Asia.

Archaeology for Kids - Richard Panchyk 2001-10

This activity book features 25 projects such as making a surface survey of a site, building a screen for sifting dirt and debris at a dig, tracking soil age by color, and counting tree rings to date a find, teaches kids the techniques that unearthed Neanderthal caves, Tutankhamun's tomb, the city of Pompeii, and Tenochtitlan, capital of the Aztec empire. Kids will delight in fashioning a stone-age tool, playing a seriation game with old photographs of cars, "reading" objects excavated in their own backyards, and using patent numbers to date modern artifacts as they gain an overview of human history and the science that brings it

back to life.

Archaeological Theory Today - Ian Hodder
2012-03-19

This title brings together some of the major exponents and innovators in the discipline to introduce their individual areas of specialism. It summarizes the latest developments in the field and looks to the future of the discipline.

The Connected Past - Tom Brughmans
2016-03-03

One of the most exciting recent developments in archaeology and history has been the adoption of new perspectives which see human societies in the past—as in the present—as made up of networks of interlinked individuals. This view of people as always connected through physical and conceptual networks along which resources, information, and disease flow, requires archaeologists and historians to use new methods to understand how these networks form, function, and change over time. The Connected Past provides a constructive methodological and theoretical critique of the growth in research applying network perspectives in archaeology and history, and considers the unique challenges presented by datasets in these disciplines, including the fragmentary and material nature of such data and the functioning and change of social processes over long timespans. An international and multidisciplinary range of scholars debate both the rationale and practicalities of applying network methodologies, addressing the merits and drawbacks of specific techniques of analysis for a range of datasets and research questions, and demonstrating their approaches with concrete case studies and detailed illustrations. As well as revealing the valuable contributions archaeologists and historians can make to network science, the volume represents a crucial step towards the development of best practice in the field, especially in exploring the interactions between social and material elements of networks, and long-term network evolution.

At Home with the Aztecs - Michael Smith
2016-03-02

At Home with the Aztecs provides a fresh view of Aztec society, focusing on households and communities instead of kings, pyramids, and human sacrifice. This new approach offers an opportunity to humanize the Aztecs, moving past

the popular stereotype of sacrificial maniacs to demonstrate that these were successful and prosperous communities. Michael Smith also engagingly describes the scientific, logistic and personal dimensions of archaeological fieldwork, drawing on decades of excavating experience and considering how his research was affected by his interaction with contemporary Mexican communities. Through first-hand accounts of the ways archaeologists interpret sites and artifacts, the book illuminates how the archaeological process can provide information about ancient families. Facilitating a richer understanding of the Aztec world, Smith's research also redefines success, prosperity and resilience in ancient societies, making this book suitable not only for those interested in the Aztecs but in the examination of complex societies in general. "

The Oxford Handbook of Southwest Archaeology - Barbara Mills 2017-08-15

The American Southwest is one of the most important archaeological regions in the world, with many of the best-studied examples of hunter-gatherer and village-based societies. Research has been carried out in the region for well over a century, and during this time the Southwest has repeatedly stood at the forefront of the development of new archaeological methods and theories. Moreover, research in the Southwest has long been a key site of collaboration between archaeologists, ethnographers, historians, linguists, biological anthropologists, and indigenous intellectuals. This volume marks the most ambitious effort to take stock of the empirical evidence, theoretical orientations, and historical reconstructions of the American Southwest. Over seventy top scholars have joined forces to produce an unparalleled survey of state of archaeological knowledge in the region. Themed chapters on particular methods and theories are accompanied by comprehensive overviews of the culture histories of particular archaeological sequences, from the initial Paleoindian occupation, to the rise of a major ritual center in Chaco Canyon, to the onset of the Spanish and American imperial projects. The result is an essential volume for any researcher working in the region as well as any archaeologist looking to take the pulse of contemporary trends in this key research tradition.

Uncovering Nevada's Past - John B. Reid
2004-04-01

Nevada's relatively brief history has been nonetheless remarkably eventful. From the activities of the first Euro-American explorers to the booms and busts of the mining industry, from the struggles and artistry of the Native Americans to the establishment of liberal divorce laws and such unique industries as legalized gambling and prostitution, from Cold War atomic tests to the civil rights movement, from the arrival of a diverse and rapidly growing urban population to the Sagebrush Rebellion, Nevada has played a part in the nation's development while following its own ruggedly independent path. In *Uncovering Nevada's Past*, historians John B. Reid and Ronald M. James have collected more than fifty major documents and visual images—some never before published—that define Nevada's colorful and complex development. Here are the words of such literary luminaries as Mark Twain, Sarah Winnemucca, and Arthur Miller; anonymous newspaper articles; public documents including Abraham Lincoln's proclamation of Nevada statehood and the probate records of murdered Virginia City prostitute Julia Bulette; personal letters; political speeches; and personal accounts of, among other subjects, the construction of Hoover Dam, life in a mining boomtown, racial segregation in Las Vegas, political careers, and atomic testing. Images include photographs of significant Nevada architecture, the masterpieces of renowned Paiute basketmaker Dat-so-la-lee, tree carvings by Basque shepherders, and tourism promotions. The collection ranges from the earliest descriptions of the region to the current debate on Yucca Mountain. The volume editors have provided an introduction and headnotes that set the documents into their historical and social context. *Uncovering Nevada's Past* is a vital, enlightening record of Nevada's history—in the words of the people who lived and made it—that makes for lively and engaging reading.

Uncovering the Germanic Past - Bonnie Effros
2012-06-14

This volume suggests how the slow genesis of Merovingian archaeology in France challenged

the prevailing views of the population's exclusively Gallic ancestry. A history of the first century of the discipline, Effros' interdisciplinary study looks at the important contributions of medieval archaeological finds to modern French identity.

The Archaeology of the Second World War - Gabriel Moshenska
2013-05-10

The Second World War transformed British society. Men, women and children inhabited the war in every area of their lives, from their clothing and food to schools, workplaces and wartime service. This transformation affected the landscapes, towns and cities as factories turned to war work, beaches were prepared as battlefields and agricultural land became airfields and army camps. Some of these changes were violent: houses were blasted into bombsites, burning aircraft tumbled out of the sky and the seas around Britain became a graveyard for sunken ships. Many physical signs of the war have survived a vast array of sites and artefacts that archaeologists can explore - and Gabriel Moshenska's new book is an essential introduction to them. He shows how archaeology can bring the ruins, relics and historic sites of the war to life, especially when it is combined with interviews and archival research in order to build up a clear picture of Britain and its people during the conflict. His work provides for the first time a broad and inclusive overview of the main themes of Second World War archaeology and a guide to many of the different types of sites in Britain. It will open up the subject for readers who have a general interest in the war and it will be necessary reading and reference for those who are already fascinated by wartime archaeology - they will find something new and unexpected within the wide range of sites featured in the book.

Hidden in the Sands - English - Frances Gillespie
2013-06-26

The first book of its kind to be published for a general readership from youngsters upwards, *Hidden in the Sands: Uncovering Qatar's Past* is the fascinating, fun and educational story of Qatar's heritage and the exciting discoveries being made by archaeologists. This informative and delightful book is published through the generosity of Maersk Oil as part of its programme to support education and unlock

Qatar's history and heritage. Hidden beneath the sand and sea and revealed on rocks are the clues which explain why this ancient land has been such a key region throughout history. Here you can follow the detective work of archaeologists and discover Qatar's rich past. In conjunction with a fully interactive website and also available in an Arabic edition, *Hidden in the Sands* describes in words and pictures the treasures uncovered by archaeologists, the methods they use, and the significance of their discoveries. Today, using state-of-the-art technology for excavation, dating and conservation, teams of experts are working all over Qatar to reconstruct its past. *Hidden in the Sands* is fully illustrated with photographs, maps and diagrams, and embellished by the vivid and evocative illustrations of the artist Norman MacDonald. Told simply and with in-depth and up-to-date detail, it leads readers through the fascinating world of archaeology. Like reconstructing an earthenware jar from a hundred little shards, this work pieces together the fragments of the past to produce a complete and beautiful whole.

Satellite Remote Sensing for Archaeology - Sarah H. Parcak 2009-03-31

This handbook is the first comprehensive overview of the field of satellite remote sensing for archaeology and how it can be applied to ongoing archaeological fieldwork projects across the globe. It provides a survey of the history and development of the field, connecting satellite remote sensing in archaeology to broader developments in remote sensing, archaeological method and theory, cultural resource management, and environmental studies. With a focus on practical uses of satellite remote sensing, Sarah H. Parcak evaluates satellite imagery types and remote sensing analysis techniques specific to the discovery, preservation, and management of archaeological sites. Case studies from Asia, Central America, and the Middle East are explored, including Xi'an, China; Angkor Wat, Cambodia and Egypt's floodplains. In-field surveying techniques particular to satellite remote sensing are emphasized, providing strategies for recording ancient features on the ground observed from space. The book also discusses broader issues

relating to archaeological remote sensing ethics, looting prevention, and archaeological site preservation. New sensing research is included and illustrated with the inclusion of over 160 satellite images of ancient sites. With a companion website (www.routledge.com/textbooks/9780415448789) with further resources and colour images, *Satellite Remote Sensing for Archaeology* will provide anyone interested in scientific applications to uncovering past archaeological landscapes a foundation for future research and study.

Time in Contemporary Intellectual Thought - P.J.N. Baert 1999-12-09

In this book, fifteen authors from a wide spectrum of disciplines (ranging from the natural sciences to the arts) offer assessments of the way time enters their work, the definition and uses of time that have proved most productive or problematic, and the lessons their subjects can offer for our understanding of time beyond the classroom and laboratory walls. The authors have tried, without sacrificing analytical rigour, to make their contribution accessible to a cross-disciplinary readership. Each chapter reviews time's past and present application in its respective field, considers the practical and logical problems that remain, and assesses the methods researchers are using to escape or resolve them. Particular attention is paid to ways in which the technical treatment of time, for problem-solving and model-building around specific phenomena, call on - or clash with - our intuitive perceptions of what time is and does. The spans of time considered range from the fractions of seconds it takes unstable particles to disintegrate to the millions of years required for one species to give way to another. Like all central conceptual words, time is understood on several levels. By inviting input from a broad range of disciplines, the book aims to provide a fuller understanding of those levels, and of the common ground that lurks at their base. Much agreement emerges - not only on the nature of the problems time presents to modern intellectual thought, but also on the clues that recent discoveries may offer towards possible solutions.
