British Foreign Policy since 1870 - Will Podmore 2008-10-13

This book survey Britain's foreign policy since 1870. Conventional accounts stress the rulers' benevolent rhetoric: I present the evidence that refutes this superficial, liberal view. Britain's economy is the key to understanding its foreign policy: capitalism causes a conflict-ridden

foreign policy. The rulers' focus has been on seizing profits from abroad, for which they have sacrificed the welfare of the British people. British governments - Conservative, Liberal and Labour alike - have represented the tiny minority who own the means of production, and have opposed the great majority who have to work for a living. The ruling class's external focus has also damaged relations with other countries and helped to produce the two recurring types of war - wars between rival empires and wars against national liberation.

Class Act - Ben Harker 2007-10-20

Sometimes described as 'the British Brecht', Ewan MacColl (1915-1989) was a major twentieth-century political artist. This is the first biography of MacColl, and was prepared with the authorisation of his collaborator and widow, Peggy Seeger. MacColl became a communist at fourteen and spent six decades at the cultural forefront of numerous political struggles, producing plays, songs and radio programmes on subjects ranging from the Spanish Civil War to the Poll Tax. Charting his involvement in radical theatre, his ground breaking radio work in the UK

and the USA, as well as his musical influences and legacy, his three marriages, and his relationship with his songwriter daughter Kirstie MacColl, this is a lively account of a much-loved icon of 20th century folk music. Drawing on extensive research, *Class Act* is a freshly conceived and energetically written account of a highly creative and controversial activist.

East Wind - Tom Buchanan 2012-04-19

East Wind offers the first complete, archive-based account of the relationship between China and the British Left, from the rise of modern Chinese nationalism to the death of Mao Tse tung. Beginning with the "Hands Off China" movement of the mid-1920s, Tom Buchanan charts the mobilisation of British opinion in defence of China against Japanese aggression, 1931-1945, and the role of the British left in relations with the People's Republic of China after 1949. He shows how this relationship was placed under stress by the growing unpredictability of Communist China, above all by the Sino-Soviet dispute and the Cultural Revolution, which meant that by the 1960s China was actively supported only by a dwindling group of enthusiasts. The impact of the suppression of the student protests in Tiananmen Square (June 1989) is addressed as an epilogue. *East Wind* argues that the significance of the left's relationship with China has been unjustly overlooked. There were many occasions, such as the mid-1920s, the late 1930s and the early 1950s, when China demanded the full attention of the British left. It also argues that there is nothing new in the current fascination with China's emergence as an economic power. Throughout these decades the British left was aware of the immense, unrealised potential of the Chinese economy, and of how China's economic growth could transform the world. In addition to analysing the role of the political parties and pressure groups of the left, Buchanan sheds new light on the activities of many well-known figures in support of China, including intellectuals such as Bertrand Russell, R H Tawney and Joseph Needham. Many other interesting stories emerge, concerning less well-known figures, which show the complexity of personal links between Britain and China during the twentieth century.

Walking in the Shadow of a Political Agitator - Book 1 Apprentice - Richard Etheridge 2016-11-20

This is the story of a father seen through the eyes of a son who grew up in his shadow. A father who in late 1940 was quite suddenly thrust into notoriety consequent upon the vagaries of a congenital heart condition and a Luftwaffe bomb; this shunted him from *Nuevo Riche* café owner's son to shop floor worker at the Austin Motor Company. Ironically fate interceded once again when shortly after completing National Service the son joined him there in 1957 working on the other side of the fence, after motor magnate Sir Leonard Lord sponsored him as an undergraduate trainee at the Austin.

Blood, Sweat, and Toil - Geoffrey G. Field 2011-11-03

Blood, Sweat, and Toil is the first scholarly history of the British working class in the Second World War. It integrates social, political, and labour history, and reflects the most recent scholarship and debates on social class, gender, and the forging of identities. Geoffrey G. Field examines the war's impact on workers in the varied contexts of the family, military service, the workplace, local communities, and the nation. Previous studies of the Home Front have analysed the lives of civilians, but they have neglected the importance of social class in defining popular experience and its centrality in public attitudes, official policy, and the politics of the war years. Contrary to accounts that view the war as eroding class divisions and creating a new sense of social unity in Britain, Field argues that the 1940s was a crucial decade in which the

deeply fragmented working class of the interwar decades was "remade," achieving new collective status, power, and solidarity. He criticizes recent revisionist scholarship that has downplayed the significance of class in British society. Extensively researched, using official documents, diaries and letters, the records of trade unions, and numerous other institutions, *Blood, Sweat, and Toil* traces the rapid growth of trade unionism, joint consultation, and strike actions in the war years. It also analyses the mobilization of women into factories and the uniformed services and the lives of men conscripted into the army, showing how these experiences shaped their social attitudes and aspirations. Using opinion polls and other evidence, Field traces the evolution of popular political attitudes from the evacuation of 1939 and the desperate months of late 1940 to the election of 1945, opposing recent claims that the electorate was indifferent or apathetic at the war's end but also eschewing blanket assumptions about popular radicalization. Labour was an active agent in fashioning itself as both a national progressive party and the representative of working-class interests in 1945; far from a mere passive beneficiary of anti-Tory feeling, it gave organizational form to the idealism and the demand for significant change that the war had generated.

[The Communist Party of Great Britain Since 1920](#) - J. Eaden 2002-05-10
A new single volume history of the Communist Party of Great Britain examining the party from its foundations in 1920 to its demise in the early 1990s. Drawing on original research and a reading of specialist texts, the authors analyze the rise and fall of the party and evaluate its role on the left of British politics. Whilst sympathetic to the ideals and commitment of many British communist activists, the book is sharply critical of much of the actual practice of the party.

The Subverters of Liberty - Joseph Bernard Hutton 1972

[The British Communist Party and the Trade Unions, 1933-1945](#) - Nina Fishman 2021-02-28

This is a pathbreaking book, essential reading for students of interwar political and social history. Previous histories of the period have underestimated the crucial role which Communists played in trade union organisation from top to bottom. Despite its relatively small size the Communist Party occupied a strategic place in the trade union movement: the leaders of the movement, notably Ernest Bevin, refused to acknowledge this at the time. Thanks to her extensive research and numerous interviews, and to the 'opening of the books' of the Communist Party, Nina Fishman has been able to uncover a fascinating story, one which official Communist historians have never told, and which other historians could only recount in fragments. The main protagonists are the Communist Party General Secretary, Harry Pollitt, and the Editor of the *Daily Worker*, Johnny Campbell. The book brings to vivid life the work of activists on the shop floor and in the coalmines during the Depression and the Second World War. The book includes the first comprehensive analysis of Communist activity in key sectors of the British economy, notably in engineering shop stewards' movements and among London busmen. It concludes with an authoritative review of Communists' part in the British war economy and a vigorous challenge to the conventional wisdom about the effect of Communist Party changes of line on the war on activists' abilities to incite and lead strikes.

The Great Betrayal - Hyde C. Burton 1963

The Fifth Estate - Robert Taylor 2018-12-07

First published in 1978. Britain's unions were blamed by many people for

the country's post-war economic decline. Portrayed as greedy wreckers who wanted to run the country, they had become scapegoats for the state of the nation. This anatomy of Britain's diverse and complex trade union movement sets out to question that widespread opinion. The main argument advanced in the study is that unions in Britain were too weak, not too strong. From the 1940s until the 1970s, Robert Taylor believes, they had failed to achieve the constructive influence over British society that union movements elsewhere in western Europe had managed to gain. Considering the major and medium-sized unions separately, he examines the sudden and rapid growth of unionisation in Britain, the structure of the unions, their effectiveness, the influence they had, their international record, and the nature of trade union democracy.

The Long Death of British Labourism - Willie Thompson 1993

The author argues that the hierarchical and disciplined structure of organizations within the British labour movement prevented it from ever becoming a real threat to the Establishment. He suggests it was its willingness to accommodate the status quo that led to its slow decline.

Workers of the Empire, Unite - Yann Béliard 2021

In most studies of British decolonisation, the world of labour is neglected, the key roles being allocated to metropolitan statesmen and native elites. Instead this volume focuses on the role played by working people, their experiences, initiatives and organisations, in the dissolution

of the British Empire, both in the metropole and in the colonies. How central was the intervention of the metropolitan Left in the liquidation of the British Empire? Were labour mobilisations in the colonies only stepping stones for bourgeois nationalists? To what extent were British labour activists willing and able to form connections with colonial workers, and vice versa? Here are some of the complex questions on which this volume sheds new light. Though convergences were fragile and temporary, this book recapture the sense of uncertainty that accompanied the final decades of the British Empire, a period when radical minorities hoped that coordinated efforts across borders might lead not only to the destruction of the British Empire but to that of capitalism and imperialism in general. Exploiting rare primary sources and adopting a resolutely transnational approach, our collection makes an original contribution to both labour history and imperial studies.

Against the grain - Evan Smith 2014-12-01

Against the grain is the first general history of the British far left to be published in the twenty-first century. Its contents cover a range of organisations beyond the Labour Party, bringing together leading experts on British left-wing politics to examine issues of class, race and gender from 1956 to the present day. The essays collected here are designed to highlight the impact made by the far left on British politics and society. Though the predicted revolution did not come, organisations

such as the International Socialists, the International Marxist Group and Militant became household names in the 1970s and 1980s. Taken as a whole, the collection demonstrates the extent to which the far left has weaved its influence into the political fabric of Britain.

The War Against the Working Class - Will Podmore 2015-05-29

This book traces the history of revolutions and counterrevolutions since 1917, in Russia, Korea, Vietnam, China, the countries of Eastern Europe, and Cuba. I present the evidence of their achievements and describe the wars they were forced to fight in self-defence. We can learn from the efforts and the errors of the pioneers, even though their conditions of being pre-industrial and dependent societies were very different from Britain's today. The hope is that this book will provoke thought about the future of our nation in order to help us to decide what we need to do, not to copy but to create.
