Pretty Simple Lettering is the perfect book for any hand letterer, whether you're new to the art or an experienced designer looking to expand your skill. In the book, you will learn the basics of creating alphabets in many different styles, how to develop those styles into one that is uniquely your own, and how to turn your lettering into beautiful pieces of art. Learning the basics of hand lettering can be pretty simple! Whitney breaks down 10 individual alphabets in various lettering styles, including upper and lower case, showing you how to form each letter, turn those letters into words, and turn those words into works of art! Discover the tools, techniques, and tricks of the trade from a seasoned lettering artist who has been in the business since 2014. In the final sections of this book, learn how Whitney approaches every design as she leads you through a step-by-step tutorial outlining her process of composition. The last section of the book is filled with project pages for you to

create your own works of art to hang on your wall or gift to a friend! Every project is surrounded by gorgeous floral designs, adding a special touch of whimsy to your final creation!

organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of The Miracle Morning In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: \* TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. \* ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. \* PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked.

Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls "intentional living": making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. \*\*\* This book has been printed with three different

colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. \*\*\*

*The Ultimate Guide to Modern Calligraphy & Hand Lettering for Beginners* - June & Lucy

relief. In a charming, naively illustrated tale, we follow the adventures of Bunny - a version of all of us - as he encounters a series of obstacles we are in some ways liable to recognise from our own lives. Watching poor Bunny, we end up delighted we're not alone, and perhaps smiling darkly in sympathy with his sorrows. Children might even have the odd peek inside if they dare.

*Copperplate Script* - Paul Antonio 2018-05-15  
Copperplate Script - A Yin & Yang Approach by Paul Antonio, is an innovative, new technology applied to an historical script. The script presented in this manual is not

an historical hand, but a geometric construct to aid in a more exacting understanding of the script. This construct assists with writing a cleaner and more beautiful copperplate script. The Technology reintroduces a comprehensive terminology for the parts of the letters - words used by the English Writing Masters in their Copybooks, in the 16th, 17th and 18th centuries, as well as additional names augmented from the historical record. Geometry and physics are used to explain how a curve works and where it sits in relation to the baseline. This concept, then compares how a car or a bicycle tackles a roundabout. Learning the skeletal forms, similar to learning Roman Capitals, is a key part of the manual. The process begins with using a pencil first, followed by the nib. The over-arching concept of the technology utilises 4Fold Symmetry. There are four facets in the 4Fold Symmetry, all of which have 2 aspects; simple and complex. Angular Confinement is the first facet.

It shows how confining the curves, inside a plane sided figure (in this case a parallelogram), is like drawing a square to plot a circle. Additional pages of study include an extensive list of difficult-to-write practise words, exemplars of numbers and variations, ligatures of double letters and ampersands. Sections on Brush Copperplate, Flourishing and its rules, as well as a glossary, augment this fine body of work. This manual offers an extensive, in-depth study of Copperplate Script suitable for any level of ability and an extraordinary resource for the beginner, intermediate or advanced calligrapher.
