Dettingen 1743 - Michael McNally 2020-08-20

The death of the Emperor Charles VI in 1741 was the catalyst for a conflict ostensibly about the female inheritance of the Hapsburg patrimony but, in reality, about the succession to the Imperial Throne. The great European powers were divided between those, such as Britain, who supported the Pragmatic Sanction and the rights of the Archduchess Maria-Theresa, daughter of Charles VI, and those who challenged it, including Bavaria which were supported by France. The conflict quickly escalated into what is now known as the War of the Austrian Succession, and a series of turbulent political events brought the crisis to a head on the road to Hanau, near Dettingen.

There, the French moved to put into place a complex manoeuvre which had the potential to end the war at a single stroke. A column of French troops would cross the Main near Dettingen and block the road to Hanau, their orders being to simply hold their ground and bar the route of the Allied British and Hanovarian advance. A second column would cross the Main behind the enemy and then follow their line of march northwards. The bulk of the army would use a combination of bridges and pontoon-bridges to cross the Main and engage the enemy from the flank as they were strung out on the line of march. However, the plan relied heavily on the blocking force, and command of this crucial sector fell to an inexperienced nobleman Louis-Auguste, Duc de Grammont, who chose to attack rather than hold his position. Consequently, the manoeuvre failed and the French broke, fleeing for the Main and safety, with the Gardes Francaises famously swimming the river. Supported by specially commissioned

artwork including maps and battleplates, this title explores the battle in depth, detailing its build-up, events, and aftermath, as well as analysing the strengths and weaknesses of the commanders, armies, and tactics of both sides.

Diese Studie illuminiert kritisch die folgen- und verlustreichsten Kriege, die Preußen/Deutschland, England, Frankreich, Amerika und die Sowjetunion - oftmals direkt gegeneinander - führten. Besonderes Augenmerk wird - neben den beiden Weltkriegen - auf den Kalten Krieg sowie seine Heißen Stellvertreterkriege in Korea und Vietnam gelegt, ebenso auf die modernen Kriege im Mittelmeerraum. Ein eigenes Kapitel ist dem namenlosen und offenbar - wie der Krieg selbst - unausrottbaren Grauen gewidmet, das Frauen - nicht allein - im Zuge des unheimlichen Phänomens „Krieg“ über sich ergehen lassen müssen. Zu Wort kommen u. a. Kriegis-

Philosophen (Sun-Tze, C. v. Clausewitz), Soldaten-Schriftsteller (Friedrich der Große, Th. Körner, E. Jünger, E. Hemingway), Reformen (K. Marx, F. Engels), Anthropologen (C. Darwin, S. Pinker) und Abenteurer (J. London, T. Heyerdahl, R. Messner). Der Autor, Dr. phil. M. A., geb. 1967 in München, beschäftigt sich bereits seit Jahrzehnten mit politisch-pädagogischen sowie historisch-anthropologischen Themen. Die umfangreichen Studien „Erziehung im Nationalsozialismus“ (2012), „Helden“ (2015), „Söldner, Schädel und Soldaten“ (2018) sind Beleg für ein ebenso breit wie tief angelegtes Interesse an diesem Gesamtkontext.

Cold War Gone Hot - Ambush Alley Ambush Alley Games 2011-11-20

"My fellow Americans, I'm pleased to tell you today that I've signed legislation that will outlaw Russia forever. We begin bombing in five minutes.†? - Ronald Reagan, 1984. With these words, spoken as a sound check to a radio

broadcast, President Reagan came dangerously close to igniting the long-simmering Cold War. Although Soviet forces were placed on alert following reports of this comment, the full-scale conflict between the West and the Soviet Bloc did not break out. Cold War Gone Hot, the latest companion volume for Force on Force, looks at the 44-year history of the Cold War and asks: "what if??" With the orders of battle, vehicle stats and missions included in this volume, Force on Force players can simulate the advance of Soviet tanks across Western Europe, a thrust into Alaska, or any number of other plausible scenarios where history took a slightly different path.

The British Battleship 1906-1946 - Norman Friedman 2015-09-30

The British battleship is one of the most intensely studied of all naval topics, but it is also among the most popular. Norman Friedman is one of the most highly regarded of all naval writers, with an avid following for his work.

Therefore, a new book on British battleships by Friedman is a major event, and has been eagerly awaited ever since knowledge of the project began to circulate among enthusiasts. Friedman has the ability to bring new ideas to even the most over-worked subjects, based on extensive original research and a talent for explaining technology in the wider context of politics, economics and strategy. His latest book covers the development of Royal Navy capital ships, including battlecruisers, from the pre-history of the revolutionary Dreadnought of 1906 to the last of the line, HMS Vanguard in 1946. Replete with original insights, the story that emerges will enlighten and surprise even the most knowledgeable. The attraction of the book is enhanced by sets of specially commissioned plans of the important classes by John Roberts and A D Baker III, both renowned experts in their own right, plus a colour section featuring the original Admiralty draughts, including a spectacular double gatefold. For many with an

interest in warships, this will be the book of the year.

The Battles of Coronel and the Falklands, 1914 - Geoffrey Bennett 2014-03-31

The defeat that Rear-Admiral Sir Christopher Cradock suffered at Coronel in 1914 at the hands of Maximilian Graf von Spee, one of Germany's most brilliant naval commanders, was the most humiliating blow to British naval prestige since the eighteenth century and a defeat that had to be avenged immediately. On 8 December 1914, the German squadron steamed towards Port Stanley, unaware that in the harbour lay two great British battle-cruisers, the

'Invincible' and 'Inflexible'. Realizing this, Spee had no option but to turn and flee. Hour by hour during that long day, the British ships closed in until, eventually, Spee was forced to confront the enemy. With extraordinary courage, and against hopeless odds, the German cruisers fought to the bitter end. At five-thirty that afternoon, the last ship slowly turned and rolled to the bottom. Cradock and Britain had been avenged.

British Ironclads 1860-75 - Angus Konstam
2018-09-20

In November 1859, the French warship La Gloire was launched. She was the world's first seagoing ironclad - a warship built from wood, but whose hull was clad in a protective layer of iron plate. Britain, not to be outdone, launched her own ironclad the following year - HMS Warrior - which, when she entered service, became the most powerful warship in the world. Just like the Dreadnought half a century later, this ship changed the nature of naval warfare

forever, and sparked a frantic arms race. The elegant but powerful Warrior embodied the technological advances of the early Victorian era, and the spirit of this new age of steam, iron and firepower. Fully illustrated with detailed cutaway artwork, this book covers the British ironclad from its inception and emergence in 1860, to 1875, a watershed year, which saw the building of a new generation of recognisably modern turreted battleships.

1982 Uncovered: The Falklands War

Mapping Project - Timothy Clack 2022-11-03
War and its legacy are traumatic to individuals, communities, and landscapes. The impacts last long beyond the events themselves and shape lives and generations. Archaeology has a part to play in the recording of, and recovery from, such trauma. This volume delivers the first intensive archaeological survey of the battlefields of the Falklands War.

Santa Cruz 1942 - Mark Stille 2012-09-20

Despite myth, the Japanese carrier force was not destroyed at Midway but survived to still prove a threat in the Pacific Theater. Nowhere was this clearer than in the battle of Santa Cruz of October 1942. The stalemate on the ground in the Guadalcanal campaign led to the major naval forces of both belligerents becoming inexorably more and more involved in the fighting, each seeking to win the major victory that would open the way for a breakthrough on land as well. The Japanese were able to gain a tactical victory at Santa Cruz and came very close to scoring a

strategic victory, but they paid a very high price in aircraft and aircrew that prevented them from following up their victory. In terms of their invaluable aircrew, the battle was much more costly than even Midway and had a serious impact on the ability of the Japanese to carry out carrier warfare in a meaningful manner.

[Across an Angry Sea](#) - Cedric Delves 2019-01-01

In early summer 1982--winter in the South Atlantic--Argentina's military junta invades the Falklands. Within days, a British Royal Navy Task Force is assembled and dispatched. This is the story of D Squadron, 22 SAS, commanded by Cedric Delves. The relentless tempo of events defies belief. Raging seas, inhospitable glaciers, hurricane-force winds, helicopter crashes, raids behind enemy lines--the Squadron prevailed against them all, but the cost was high. Eight died and more were wounded or captured. Holding fast to their humanity, D Squadron's fighters were there at the start and end of the Falklands War, the first to raise a Union Jack

over Government House in Stanley. Across an Angry Sea is a chronicle of daring, skill and steadfastness among a tight-knit band of brothers; of going awry, learning fast, fighting hard, and winning through.

The Mystery of Easter Island - Katherine Routledge 2020-04-12

"All the seashore is lined with numbers of stone idols, with their backs turned towards the sea, which caused us no little wonder, because we saw no tool of any kind for working these figures." So wrote, a century and a half ago, one of the earliest navigators to visit the Island of Easter in the South-east Pacific. Ever since that day passing ships have found it incomprehensible that a few hundred natives should have been able to make, move, and erect numbers of great stone monuments, some of which are over thirty feet in height; they have marvelled and passed on. As the world's traffic has increased Easter Island has still stood outside its routes, quiet and remote, with its

story undeciphered. What were these statues of which the present inhabitants know nothing?... Whence came the people who reached this remote spot? Did they arrive from South America, 2,000 miles to the eastward? Or did they sail against the prevailing wind from the distant islands to the west?...

Intelligence in War - John Keegan 2003-10-28
A masterly look at the value and limitations of intelligence in the conduct of war from the premier military historian of our time, John Keegan. Intelligence gathering is an immensely complicated and vulnerable endeavor. And it often fails. Until the invention of the telegraph and radio, information often traveled no faster than a horse could ride, yet intelligence helped defeat Napoleon. In the twentieth century, photo analysts didn't recognize Germany's V-2 rockets for what they were; on the other hand, intelligence helped lead to victory over the Japanese at Midway. In *Intelligence in War*, John Keegan illustrates that only when paired with

force has military intelligence been an effective tool, as it may one day be in besting al-Qaeda.

Coronel and Falklands 1914 - Michael McNally 2012-10-23

Admiral von Spee's German East Asia Cruiser Squadron of World War I stand out amidst the annals of 20th century surface naval warfare. Upon the outbreak of war in August 1914, the British Royal Navy was deployed globally, whilst aside from a small number of local vessels, the Imperial German Navy was concentrated in two areas - Home Waters (i.e. the North Sea and the Baltic) and Tsingtao in China, the home port of the crack East Asia Cruiser Squadron which, under the command of Admiral Reichsgraf von Spee contained some of Germany's most modern cruisers. As it was clear that Spee's relatively small force would be quickly overwhelmed by superior enemy numbers, the Admiralty in Berlin immediately ordered him to weigh anchor and return to Germany, a mission that many were to describe as a Himmelfahrtskommando or suicide

mission. Whether Spee made it or not, the main consideration was that he would tie down a large number of enemy warships and thus prevent their deployment in other areas. This Raid title details all aspects of the exciting mission.

The German Secret Service in America - John Price Jones 1918

Sober Men and True - Christopher McKee 2002

McKee scours sailors' diaries, letters, memoirs, and oral interviews to uncover the lives and secret thoughts of British men of the lower deck. From working-class childhoods to the hardships of finding civilian employment after leaving the navy, the former sailors speak with candor about the naval life. Illustrations.

US Navy Ships vs Japanese Attack Aircraft - Mark Stille 2020-09-17

The striking power of the Imperial Japanese Navy's carrier-based attack aircraft was established at Pearl Harbor, and the IJN's

carrier-based torpedo and dive-bombers showed their prowess again at the Battle of Coral Sea when they sank the US Navy carrier USS Lexington and damaged the carrier USS Yorktown. Even at the disastrous Battle of Midway, the relatively small number of IJNAF attack- and torpedo-bombers that were launched against the US fleet proved that they remained a potent force by heavily damaging Yorktown again, which allowed an IJN submarine to sink the carrier. At Guadalcanal, IJNAF carrier-based aircraft sank the carrier USS Hornet and badly damaged USS Enterprise twice. However, throughout 1942, US Navy ship defences brought down an increasing number of attacking IJNAF aircraft. The final major battle of the year, the Battle of Santa Cruz, exacted crippling losses on the IJN, setting the stage for the eclipse of the IJNAF's highly trained and effective aviation attack forces. Packed with illustrations and contemporary photographs, this engrossing volume details the design, tactics,

and operational records of both the US Navy ships and the IJNAF aircraft which attacked them over the year following Pearl Harbor.

The Falklands 1982 - Gregory Fremont-Barnes
2012-05-20

On 3 April 1982 British Prime Minister Margaret Thatcher announced that Argentine armed forces had landed on British sovereign territory; had captured the men of Royal Marine detachment NP8901; had run up the Argentine flag; and had declared the islands and their population to be Argentine. An immediate response was required and a task force was rapidly assembled to retake the islands. From this point until the Argentine surrender on 14 June, the British forces fought what was in many ways a 19th-century style colonial campaign at the end of extended supply lines some 8,000 miles from home. This volume will detail the major stages of the land campaign to retake the islands, focusing on the San Carlos landings, the battle for Darwin and Goose Green, and the final

battles for Mt Longdon, Tumbledown and Wireless Ridge, the mountains that surrounded the island's capital, Stanley.

War at Sea - James P. Delgado 2019

"From an author who has spent four decades in the quest for lost ships, this lavishly illustrated history of naval warfare presents the latest archaeology of sunken warships. It provides a unique perspective on the evolution of naval conflicts, strategies, and technologies, while vividly conjuring up the dangerous life of war at sea"--

The Sea Devil - Sam Jefferson 2017-09-21

In 1916, a three-masted windjammer bearing Norwegian colours sailed out of a quiet anchorage in Germany, loaded with cargo and apparently bound for Australia. Her true mission was quite different. The ship was, in fact, the SMS Seeadler, commanded by swashbuckling German aristocrat Felix von Luckner. Over an epic voyage, he used cunning and deception to destroy fourteen merchant ships, all the while

evading the utterly foxed and infuriated British Admiralty in a daring game of cat and mouse. This rip-roaring World War I story depicts a life of espionage, counterespionage and piracy of the most gentlemanly kind.

Coronel and Falklands 1914 - Michael McNally 2012-10-20

Upon the outbreak of war, the British Royal Navy was deployed globally, whilst the Imperial German Navy was concentrated in two areas - Home Waters and Tsingtao, the home port of the crack East Asia Cruiser Squadron which, under the command of Admiral von Spee contained some of Germany's most modern cruisers. As Spee made his way to the Chilean port of Valparaiso, he met the British 4th Cruiser Squadron which had been ordered to engage and defeat the German force. This resulted in the battle of Coronel where the antiquated British warships proved no match for Spee's modern cruisers. It was the first naval defeat suffered by the Royal Navy in over 100 years.

When news reached London, panic reigned and two ships HMS Inflexible and Invincible were sent to lead the force against Spee. When bad weather delayed the German arrival, Spee knew that he had to stand and fight, unaware that amongst the ships opposing him were two modern battlecruisers which outclassed any of his own squadron's ships. Given the presence of Inflexible and Invincible, the result of the battle had an inevitable outcome and after several hours hard combat, Spee's ships were defeated.

Jutland 1916 - Charles London 2000-08-18

The only major fleet engagement of World War I (1914-1918), the Battle of Jutland (1916) has been surrounded by controversy ever since. The British public felt Admiral Jellicoe had failed – a reaction rooted in a hundred years of the 'Nelson cult', a conviction that anything short of a Trafalgar-style annihilation was letting the side down. True, the German Fleet had sunk more ships and suffered fewer casualties, but the British had forced them to disengage and run for port and were still cruising off Denmark spoiling for a fight. This title recounts in detail how on an early summer's evening in 1916, the two fleets clashed head to head: the events that followed would spark a polemic that still rages today.

Atlantic Ocean - H. G. R. King 1985

Photius Coutsoukis provides a 2001 profile of the Atlantic Ocean. The profile contains information about the area's natural resources, geography, transportation, international issues, and economic activity. Links to Web sites that offer maps of the Atlantic Ocean are available.

Naval Operations - Julian S. Corbett 2003-05-01

This volume is mainly concerned with the Dardanelles operations from their inception as a naval diversion to their development into a major combined operation and its failure.

Although the narrative is related from a naval

point of view it is necessarily concerned with military movements, but they have been dealt with only in so far as seemed essential to make clear the navy's part in supporting the army. Purely naval operations treated include the raid on the Yorkshire coast in December 1914 and the Dogger Bank action on 24th January 1915. In a separate cover are ten maps/plans accompanying the text.

British Submarine vs Italian Torpedo Boat -

David Greentree 2016-06-16

As the war in North Africa escalated, Axis war efforts became increasingly dependent on supply lines across the Mediterranean. To try to cut off these lines of supply the British deployed submarines from the besieged island of Malta with the directive to sink as much merchant convoy tonnage as possible. Italy responded by sending her Torpedo boats to protect and escort Axis convoys. Featuring specially commissioned full-colour artwork and carefully chosen archive photographs, this engaging study assesses the

evolving battle between Britain's submarines and Italy's torpedo boats in the struggle for primacy in the Mediterranean at the height of World War II.

Maritime Legacies and the Law - Craig

Forrest 2019-10-18

The recent centenary of WWI has prompted a shift in the way attention is focused on legacy shipwrecks. This timely book considers the development of the laws that apply to these wrecks and the issues that surround them, and deftly analyses the adequacy of the existing legal framework to fulfil its promise of protecting legacy wrecks for future generations as historical and archaeological resources, memorials and, most importantly, as maritime

war graves. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

2014-01-09

A definitive, transnational account of the military, political and cultural history of the First World War.

Falklands 1914 - Richard Hough 2003

This naval history tells the dramatic story of the destruction of Germany's East Asiatic Squadron in the opening weeks of the World War I. This crack force of armoured cruisers, led by Vice-Admiral von Spee, had the potential to be a menace to Allied shipping in the Pacific.

SAS South Georgia Boating Club - Tony Shaw
2022-04-21

Many aspire to serve with the Special Air Service, arguably the world's most prestigious regiment, but few achieve their aim. In this inspiring memoir the author describes how he left school without any qualifications and

embarked on a 30 year career much of it spent in Hereford, including four years in "The Regiment". Against the odds he rose through the ranks before being commissioned and eventually retiring as a Major. Initially attached to 22 SAS as a signaller, he volunteered for and passed "Selection", the most gruelling and demanding of tests. He was posted to D Squadron Boat Troop with whom he saw active service in the Falklands War, Northern Ireland and the UK counter-terrorist team. Thanks to the diary he kept during the Falklands War, the reader is treated to a gripping first-hand account of the intense action that he and his colleagues experienced, including recces, diversionary attacks, raids and ambushes both on South Georgia and the Falklands Islands. Later he commanded the Royal Signals troop supporting D Squadron, 22 SAS before commissioning and later on pursuing a second career as a security consultant in various Middle Eastern hotspots. It is a privilege to read this commendably modest

account of one man's unique career which

provides a fascinating insight into elite special forces soldiering.
