**La città medievale è la città dei frati? / Is the medieval town the city of the friars?** - Silvia Beltramo 2021-12-29

Fin dalla metà del XIII secolo la presenza degli Ordini mendicanti diventa elemento caratterizzante della città medievale. Questo fenomeno sempre più esteso, che si consolida progressivamente nei decenni seguenti, raggiungendo l'apice nel corso del Trecento, provoca un acceso dibattito all'interno delle comunità conventuali sull'opportunità o meno di erigere complessi duraturi e monumentali nei contesti urbani. La successiva costruzione di una rilevante moltitudine di conventi nella penisola italiana incide profondamente sulle scelte artistiche e architettoniche con soluzioni innovative che verranno replicate, con opportune declinazioni locali, in un ampio contesto territoriale. La crescita della città europea tra XIII e XIV secolo risentirà profondamente della presenza dei conventi mendicanti, determinando l'espansione di alcune aree, l'incremento residenziale e demografico in altre, la trasformazione del tessuto storico

prossimo ai principali poli urbani, religiosi e politici. Questo volume, esito del progetto di ricerca interdisciplinare e internazionale, La città medievale. La città dei frati | Medieval city. City of the friars, sostenuto da diversi enti e istituzioni, prospetta molteplici approcci e competenze utili a far luce sulla complessità e la ricchezza di una delle più significative esperienze religiose dell'età medievale e della prima età moderna.

**A New World in a Small Place** - Robert

Brentano 2022-03-25

Distinguished historian Robert Brentano provides an entirely new perspective on the character of the church, religion, and society in the medieval Italian diocese of Rieti from 1188 to 1378. Combing through a cache of previously ignored documents stored in a tower of the cathedral, he uses wills, litigation proceedings, fiscal accounts, and other records to reconstruct the daily life of the diocese. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's

mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994.

### **The Western Perception of Islam between the Middle Ages and the Renaissance -**

Marica Costigliolo 2017-10-27

In the Middle Ages, as Christian sources on the Islamic world show, Muslim culture was perceived as extremely threatening: there were many defenses of Christianity, like the treatise on the "mistakes" of the followers of Allah. This book shows, through an analysis of the works of Nicholas of Cusa and of other authors, that in the course of time this textual attitude was modified, as European authors aimed to point out the Christian truth in comparison with the "falsity" of Islamic theology, in order to reinforce Christian identity through the presupposition of its own absolute truth. The apologetic aim was gradually replaced by a systematic comparison based on partial translations of the Qur'an. The comparison with the "other" was also the basis for reinforcing identity, in order to demonstrate the truth and consequently the supremacy of one's own theoretical position.

[Mappa. Pisa in the Middle Ages](#) - Gabriele Gattiglia 2014-07-01

This volume represents the third edition of a work cycle that started in 2006 for my PhD thesis. The thesis was presented in 2010 (first

edition, Gattiglia 2010), partially published as a summary monograph in 2011 (second edition, Gattiglia 2011) or in articles (Gattiglia 2012, Gattiglia 2012a, Gattiglia 2011a), and now (third edition) takes the form of a more comprehensive publication in the light of new data. Over the past two years, the work study on Pisa, not only relating to the Middle Ages, continued within the MAPPA (Metodologie Applicate alla Predittività del Potenziale - Methodologies Applied to Archaeological Potential Predictivity) project, allowing a widespread collection of data thanks to which it was possible to explain more fully the hydro-geological, geomorphological and topographic context and to check (and in many cases change) part of the assumptions made. *La Chiesa nel Medioevo dal VII al XIII secolo* - Angelo Manfredi

*The Formation of a Medieval Church* - Maureen C. Miller 2018-09-05

In this provocative account, Maureen Miller challenges traditional explanations of the process that changed the nature of religious institutions—and religious life itself—in the diocese of Verona during the early and central Middle Ages. Building on substantial archival research, she shows how demographic expansion, economic development, and political change helped transform religious ideals and ecclesiastical institutions into a recognizably "medieval" church.

[Even the Dogs](#) - Cloe Taddei-Ferretti 2017

This is a historical excursus that describes female ministries in the early Church. It analyzes the disputed traces of women in the presbyteral ministry, diaconal ministry, and the differences in ordination rite and functions for deaconesses and deacons of the Byzantine Church.

Information is included on the gender balance of today's identical ordination rite and functions of deaconesses and deacons. The study also examines: the hypothetical possibility of female presbyteral ordination; belief in female subordination; the spousal symbol; Mary; woman and person; reciprocity; the incarnation of the Word; the impossibility of female presbyteral vocation; the value of doctrines; and the sacramental sign and substance of a sacrament. In conclusion, a prayer for female presbyteral ordination is proposed. (Series: Theology:

### **Clerical Households in Late Medieval Italy -**

Roisin Cossar 2017-03-20

Roisin Cossar examines how clerics managed efforts to reform their domestic lives in the decades after the Black Death. Despite reformers' desire for clerics to remain celibate, clerical households resembled those of the laity, and priests' lives included apprenticeships in youth, fatherhood in middle age, and reliance on their families in old age.

### **Social Mobility in Medieval Italy**

**(1100-1500) - AA. VV.**

2021-07-27T12:14:00+02:00

This volume aims to investigate the complex theme of social mobility in medieval Italy both by comparing Italian research to contemporary international studies in various European contexts, and by analysing a broad range of themes and specific case studies. Medieval social mobility as a European phenomenon, in fact, still awaits a systematic analysis, and has seldom been investigated *iuxta propria principia* in social, political and economic history. The essays in the book deal with a number of crucial problems: how is social mobility investigated in European and Mediterranean contexts? How did classic mobility channels such as the Church, officialdom, trade, the law, the lordship or diplomacy contribute to shaping the many variables at play in late medieval societies, and to changing - and challenging - inequality? How did movements and changes in social spaces become visible, and what were their markers? What were the dynamics at the heart of the processes of social mobility in the many territorial contexts of the Italian peninsula?

### **The Early Humiliati - Frances Andrews**

2000-01-27

This book is the first major study in English of a group of late twelfth-century religious enthusiasts, the early Humiliati, who were condemned by the Church as heretics in 1184. However, in a remarkable transition, they were reconciled seventeen years later and went on to establish a highly successful religious order in north Italy. The Humiliati have been accorded little attention in previous studies both because

of their local nature and because of the suppression of the Order in 1571, after one of their number made a disastrous attempt to murder Charles Borromeo. Using a combination of a wide range of sources, the nature of the early movement and its processes of institutional development are reconstructed. The book also includes a Bullarium Humiliatorum, a calendar of papal and episcopal letters and privileges, which will be of great use to scholars in the field.

### **Florence and Its Church in the Age of Dante -**

George W. Dameron 2013-05-27

By the early fourteenth century, the city of Florence had emerged as an economic power in Tuscany, surpassing even Siena, which had previously been the banking center of the region. In the space of fifty years, during the lifetime of Dante Alighieri, 1265-1321, Florence had transformed itself from a political and economic backwater—scarcely keeping pace with its Tuscan neighbors—to one of the richest and most influential places on the continent. While many historians have focused on the role of the city's bankers and merchants in achieving these rapid transformations, in *Florence and Its Church in the Age of Dante*, George W. Dameron emphasizes the place of ecclesiastical institutions, communities, and religious traditions. While by no means the only factors to explain Florentine ascension, no account of this period is complete without considering the contributions of the institutional church. In Florence, economic realities and spiritual yearnings intersected in mysterious ways. A busy grain market on a site where a church once stood, for instance, remained a sacred place where many gathered to sing and pray before a painted image of the Virgin Mary, as well as to conduct business. At the same time, religious communities contributed directly to the economic development of the diocese in the areas of food production, fiscal affairs, and urban development, while they also provided institutional leadership and spiritual guidance during a time of profound uncertainty.

Addressing such issues as systems of patronage and jurisdictional rights, Dameron portrays the working of the rural and urban church in all of its complexity. *Florence and Its Church in the Age of Dante* fills a major gap in scholarship and

will be of particular interest to medievalists, church historians, and Italianists.

Men in the Middle - Steffen Patzold 2016-05-24

This volume studies local priests as central players in small communities of early medieval Europe. As clerics living among the laity, priests played a double role within their communities: that of local representatives of the Church and religious experts, and that of owners of land and other goods. By virtue of their membership of both the ecclesiastical and the secular world, they can be considered as 'men in the middle': people who brought politico-religious ideas and ideals to secular communities, and who linked the local to the supra-local via networks of landownership. This book addresses both roles that local priests played by approaching them via their manuscripts, and via the charters that record transactions in which they were involved. Manuscripts once owned by local priests bear witness to their education and expertise, but also indicate how, for instance, ideals of the Carolingian reforms reached the lowest levels of early medieval society. The case-studies of collections of charters, on the other hand, show priests as active members of networks of the locally powerful in a variety of European

regions. Notwithstanding many local variations, the contributions to this volume show that local priests as 'men in the middle' are a phenomenon shared by the early medieval world as a whole.

Communities of Violence - David Nirenberg 2015-05-26

In the wake of modern genocide, we tend to think of violence against minorities as a sign of intolerance, or, even worse, a prelude to extermination. Violence in the Middle Ages, however, functioned differently, according to David Nirenberg. In this provocative book, he focuses on specific attacks against minorities in fourteenth-century France and the Crown of Aragon (Aragon, Catalonia, and Valencia). He argues that these attacks--ranging from massacres to verbal assaults against Jews, Muslims, lepers, and prostitutes--were often perpetrated not by irrational masses laboring under inherited ideologies and prejudices, but by groups that manipulated and reshaped the available discourses on minorities. Nirenberg shows that their use of violence expressed complex beliefs about topics as diverse as divine history, kinship, sex, money, and disease, and that their actions were frequently contested by competing groups within their own society. Nirenberg's readings of archival and literary sources demonstrates how violence set the terms and limits of coexistence for medieval minorities. The particular and contingent nature of this coexistence is underscored by the book's juxtapositions--some systematic (for example, that of the Crown of Aragon with France, Jew with Muslim, medieval with modern), and some suggestive (such as African ritual rebellion with Catalan riots). Throughout, the book questions the applicability of dichotomies like tolerance versus intolerance to the Middle Ages, and suggests the limitations of those analyses that look for the origins of modern European persecutory violence in the medieval past.

**The Social Fabric of Fifteenth-Century**

**Florence** - Alessia Meneghin 2019-10-02

The Arte dei rigattieri (merchants of second-hand goods in Florence) has never been the subject of a systematic study, even in scholarship devoted to the history of trades. Underpinned by a large collection of archival material, this book analyzes the social life and economic activity of rigattieri in fifteenth-century Florence. It offers invaluable information on issues such as the relationship between socio-political affiliations and economic interest as well as the structures of consumption and the spending power of different social groups. Furthermore, through the lens of the Arte dei Rigattieri, this work examines the connection between the development of the

political bureaucracy, the establishment of Medicean power, and contemporaneous processes of identity construction and social mobility.

A Life of Ill Repute - Maria Serena Mazzi 2020-03-19

Prostitution is often called the oldest profession in the world. Even in the Middle Ages, people believed that there would always be women willing to use their bodies for profit. But who were these women who offered themselves up to men? In *A Life of Ill Repute* Maria Serena Mazzi traces and reconstructs prostitution in the early fourteenth century, describing how in medieval European society women - often extremely poor and overwhelmed by debt, or victims either of predatory men full of duplicitous intentions or simply of rape - were traded as commodities. Prostitutes, according to Mazzi, were despised and condemned but considered necessary in an ambiguous and contradictory society that tolerated their sexual exploitation to safeguard the virtue of honest women and counter the vice of homosexuality, while allowing men to vent their own impulses. The theory of the lesser evil - encouraged by both the church and the state - is the grounds on which prostitution flourished in medieval Europe. In the Middle Ages prostitution was censured and considered disgraceful, but at the same time it was deemed inevitable and even necessary. *A Life of Ill Repute* uncovers the hypocrisy and speciousness of ecclesiastical, political, and social arguments for the justification of the existence of public prostitution.

*Holy Treasure and Sacred Song* - Benjamin David Brand 2014

This title explores the complex interplay between relic cults and the liturgy in medieval Tuscany. Drawing on documentary, literary and

*Rome, Ravenna, and Venice, 750-1000* -

Veronica West-Harling 2020-08-20

The richest and most politically complex regions in Italy in the earliest middle ages were the Byzantine sections of the peninsula, thanks to their links with the most coherent early medieval state, the Byzantine empire. This comparative study of the histories of Rome, Ravenna, and Venice examines their common Byzantine past, since all three escaped incorporation into the Lombard kingdom in the late 7th and early 8th centuries. By 750, however, Rome and Ravenna's political links with the Byzantine Empire had been irrevocably severed. Thus, did these cities remain socially and culturally heirs of Byzantium? How did their political structures, social organisation, material culture, and identities change? Did they become part of the Western political and ideological framework of Italy? This study identifies and analyses the ways in which each of these cities preserved the structures of the Late Antique social and cultural world; or in which they adapted each and every element available to them to their own needs, at various times and in various ways, to create a new identity based partly on their Roman heritage and partly on their growing integration with the rest of medieval Italy. It tells a story which encompasses the main contemporary narratives, documentary evidence, recent archaeological discoveries, and discussions on art history; it follows the markers of status and identity through titles, names, ethnic groups,

liturgy and ritual, foundation myths, representations, symbols, and topographies of power to shed light on a relatively little known area of early medieval Italian history.

*Mary Magdalene and Many Others* - Carla Ricci 1994

Italian philosopher and researcher Carla Ricci addresses an overlooked but significant presence in the Gospels--that of the women who followed Jesus. Citing Luke 8:1-3, Ricci describes a group of women who unswervingly followed Jesus from Galilee to Jerusalem, through his passion and death, to become messengers of the resurrection.

*The Two Latin Cultures and the Foundation of Renaissance Humanism in Medieval Italy* - Ronald G. Witt 2012-03-19

This book traces the intellectual life of the Kingdom of Italy, the area in which humanism began in the mid thirteenth century, a century or more before exerting its influence on the rest of Europe. Covering a period of over four and a half centuries, this study offers the first integrated analysis of Latin writings produced in the area, examining not only religious, literary, and legal texts. Ronald G. Witt characterizes the changes reflected in these Latin writings as products of the interaction of thought with economic, political, and religious tendencies in Italian society as well as with intellectual influences coming from abroad. His research ultimately traces the early emergence of humanism in northern Italy in the mid thirteenth century to the precocious development of a lay intelligentsia in the region, whose participation in the culture of Latin writing fostered the beginnings of the intellectual movement which would eventually revolutionize all of Europe.
