John Nash - John Nash 2004-03-31

John Nash (1752-1835) was the most successful and fashionable architect of his time. Architect, town-planner, landscape designer, bridge-builder, engineer and entrepreneur, Nash outlived his principal patron, George IV, by five years. After a disheartening start, when his first speculative buildings in Bloomsbury failed and left him bankrupt, Nash moved to Wales to rebuild his career, eventually returning to London in 1796. He had made a remarkable recovery and went on to become the most successful and fashionable architect of the period. His buildings reflect a variety of styles, including neo-classical, Tudor and Gothic, with a strong emphasis on the Picturesque. His Metropolitan Improvements - Regent's Park, Regent Street, Trafalgar Square - were the most comprehensive developments ever carried out in London, even until recent times.

Saying No - Asha Phillips 2008

Asha Phillips writes as both a child psychotherapist and a mother, using case studies as well as informal anecdotes from family and friends as illustrations. She strips away the negative associations surrounding the word 'no' and celebrates change and setting limits as essential ingredients in development. In a new introduction, Asha Phillips explains why the idea of limits and boundaries have become ever more pertinent since the book was first published. Now with a new chapter on illness in the family, *Saying No* can continue to build confidence and self-esteem in both children and parents.

La sicurezza nelle gallerie in costruzione - Augusto Isola 2005

The Transformation of Democracy - Robert Kelley 2017-07-28

Combining a thorough introduction to the work of nineteenth and early twentieth-century Italian social theo-rist Vilfredo Pareto with a highly read-able English translation of Pareto's last monograph, "Generalizations," origi-nally published in 1920, this work illus-trates precisely how and why demo-cratic forms of government undergo decay and are eventually re-invigo-rated. More than any other social scien-tist of his generation, Pareto offers a well-developed, articulate, and com-pelling theory of change based on a Newtonian vision of science and an en-gineering model of social equilibrium. In his introduction, Powers focusses on Pareto's intellectual maturation and on his overall theory of society. Powers describes the various stages of Pareto's development as engineer, economist, political scientist, and finally as sociol-ogist. He explains how Pareto consid-ered himself the Einstein of social sci-ence and how he introduced the con-cept of relativity into the social sci-ences. Even if such self-claims were rarely widely shared, the sense of Pareto's originality is doubted by few, if any, contemporary scholars. This last, and in many ways most penetrat-ing, of Pareto's briefer works, warns of the dangers which can befall demo-cratic order. It is important because, as his final attempt to clarify his ideas, it places his earlier works in perspective. Pareto generates a comprehensive the-ory of complex social phenomena.

Original Sins - Jeff Lemire 2019-04

In the series that writer MARK MILLAR (HIT GIRL) called "the best comic of 2018", rural mystery and urban horror collide in the second volume of the runaway best-selling series by JEFF LEMIRE and ANDREA SORRENTINO, the acclaimed creative duo behind Green Arrow and Old Man Logan. The lives of a reclusive young man obsessed with a conspiracy in the city's trash, and a washed up Catholic Priest arriving in a small town full of dark secrets become dangerously intertwined around the mysterious legend of The Black Barn -- an otherworldly building that is alleged to have appeared in both the city and the small town, throughout history, leaving death and madness in its wake. Collects GIDEON FALLS #7-11

From Pain to Violence - Felicity de Zulueta 2006-05-01

Violence is all around us; yet, despite its widespread prevalence, we remain unclear about its causes. In this book Felicity de Zulueta - begins by defining "violence" as distinct from "aggression", and then attempts to trace its origins, highlighting the polarization between those who believe mankind to be innately violent and those who see violence as the outcome of man's life experiences. As a result of her investigations, the author suggests that the current high level of violence may well be linked to the effects of childhood and adult trauma which appear to be far more widespread than has hitherto been acknowledged. These findings are relevant to understanding why "normal" people can become violent in certain conditions. This is a second edition and has been fully updated. A new chapter on terrorism has been added.

Major Incident Medical Management and Support - Advanced Life Support Group (ALSG) 2018-10-03

The new edition of Major Incident Medical Management and Support is a vital component in the blended learning course from Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the preparation, management and support elements of dealing with casualties in a major incident. Split into five sections, each focuses on the elements requisite in preparing for, and responding, to a major incident. The first section discusses the epidemiology and incidences of major incidents and the structured approach to the hospital response. The second section contains the preparation required in planning for major incidents, including equipment and training. The third section covers the management of a major incident, concentrating on the clinical, nursing and management hierarchies. The fourth includes the various stages of support in a major incident, including declaring an incident and activating the plan, the reception, triage, definitive care and recovery phases of an incident. The final section focuses on special incidents which require additional consideration, including those involving hazardous chemicals, burns and children. Written in collaboration with the National Emergency Planning, Major Incident Medical Management and Support is an invaluable reference in the emergency department and beyond for staff needing to prepare for the rare, but inevitable, hospital major incidence response.

Breast Cancer - Heinz Bohmert 1989

Faith and Freedom - Teresa Forcades 2016-11-28

Teresa Forcades, Spanish Benedictine nun, theologian, physician and political activist, is one of Europe's leading radical thinkers. Marrying her Catholic faith with a passion for social justice, she came to prominence for her eloquent condemnation of the abuses of some of the world's biggest pharmaceutical companies. She has gone on to found a leading Catalonian anti-capitalist independence movement and is one of the leading voices in the world today against the injustices of capitalism and the patriarchy of modern society and of her own church. In Faith and Freedom, her first book written in English, she skilfully weaves together her personal experiences with a reflection on morality, religion and politics to give a trenchant account of how the Christian faith can be a dynamic force for radical change. Placing herself in a powerful tradition of Catholic social doctrine and Liberation Theology, she applies her perspective to the issues most precious to her: freedom and love, social justice and political engagement, public health, feminism, faith and forgiveness. Structured around the five canonical hours that give its peculiar rhythm to the monastic day, this book is a thoughtful and bold polemic against the exploitation and injustice of the status quo. Its call for liberty, love and justice will resonate with anyone disaffected with a savage and destructive political and economic system that marginalises and murders the poor and undermines the very fabric of social life.

The Day The Martians Came - Frederik Pohl 1989-11-15

Henry Steegman is hardly "Mr. Personality" aboard the Mars-bound Algonquin 9. Yet it is he who bungles upon the spectacular Macy's-like city beneath the Red Planet's crust. For better or worse, the name Steegman will be immortalized by a discovery that will transform millions of lives. For a struggling screenwriter, the Martian beings could mean a big story, big bucks, headlines...and more women than any many his size has ever known... For an exiled Russian rocket man, there are a possible route to America's space program, and the land of opportunity... For a flying-saucer faker of flickering fame, the possibilities are out of this world. In a brilliant near-future look at the human condition, Frederick Pohl has honed his satire-sharp science fiction to a steely new edge.

Childhood and After - Susan Sutherland Fairhurst Isaacs 1999

Conflicting Identities and Multiple Masculinities takes as its focus the construction of masculinity in Western Europe from the early Middle Ages until the fifteenth century, crossing from pre-Christian Scandinavia across western Christendom. The essays consult a broad and representative cross section of sources including the work of theological, scholastic, and monastic writers, sagas, hagiography and memoirs, material culture, chronicles, exempla and vernacular literature, sumptuary legislation, and the records of ecclesiastical courts. The studies address questions of what constituted male identity, and male sexuality. How was masculinity constructed in different social groups? How did the secular and ecclesiastical ideals of masculinity reinforce each other or diverge? These essays address the topic of medieval men and, through a variety of theoretical, methodological, and disciplinary approaches, significantly extend our understanding of how, in the Middle Ages, masculinity and identity were conflicted and multifarious.
