**CIVILIZATION** - Armand du Plessis  
2014-06-04

We witness step by step decay of civilization across the world, particularly in South Africa. As many others, I also want to arrest the decline. I thought I could reach the broad public by writing but after various persons had read the draft, I realized only independent thinkers could benefit from it, whilst it needlessly confuse those who are dependent on society for values. Those, who are content with society and their prospects, probably would not find use in this writing. Maintenance of civilization is of the very greatest concern to man and even to plant and animal, particularly threatened species. I cannot imagine anyone, who can read, would object to this axiom. But few know, that which we call civilization, was created by the Aryans and only this race and those who inherited sufficient of its characteristics, maintain civilization. On each of the legion subjects relating to civilization scholars already published documents but I have yet to find one revealing adequate role players to elucidate a total image covering both nature and

history, to enable us to find solutions for the preservation of Civilization.

Animals in Traditional Folk Medicine - Rômulo Alves  
2012-09-19

People have relied on medicinal products derived from natural sources for millennia, and animals have long been an important part of that repertoire; nearly all cultures, from ancient times to the present, have used animals as a source of medicine. Ingredients derived from wild animals are not only widely used in traditional remedies, but are also increasingly valued as raw materials in the preparation of modern medicines. Regrettably, the unsustainable use of plants and animals in traditional medicine is recognized as a threat to wildlife conservation, as a result of which discussions concerning the links between traditional medicine and biodiversity are becoming increasingly imperative, particularly in view of the fact that folk medicine is the primary source of health care for 80% of the world's population. This book discusses the role of animals in traditional folk medicine and its meaning for wildlife conservation. We hope to further stimulate further discussions about the use of biodiversity and its implications for wildlife conservation strategies.

**The History of the Devil** - Paul Carus  
2021-08-03

The History of the Devil (1900) is a philosophical study by Paul Carus. A lifelong Monist, Carus sought to apply a scientific analysis to the principles of humanity's religions. Credited with bridging the gap between Eastern and Western

beliefs, Carus believed that the dualism rampant in the West could be replaced in order to establish a more equitable world where difference and diversity would be accepted and nurtured, rather than suppressed. "This world of ours is a world of opposites. There is light and shade, there is heat and cold, there is good and evil, there is God and the Devil. The dualistic conception of nature has been a necessary phase in the evolution in human thought." Recognizing the need for dualism in the history of humanity, Carus sought to promote the principles of Monism in the West, believing it could lead to a universal worldview capable of uniting East and West. A positivist and pantheist, Carus believed that by pursuing "in religion the same path that science travels, [...] the narrowness of sectarianism [would] develop into a broad cosmical religion which shall be as wide and truly catholic as is science itself." To lay the groundwork for this "cosmical religion," he investigates the figure of the Devil and the historical evolution of the concept of evil, which he saw as predating belief in goodness and God. With a beautifully designed cover and professionally typeset manuscript, this edition of Paul Carus' *The History of the Devil* is a classic of philosophy reimagined for modern readers.

**Black Civilizations Of The Ancient World** -  
Anu M' Bantu 2022-05-16

Retake Your Fame - Aylmer von Fleischer  
2004-09

This revised and expanded edition is an invaluable source of information about the contributions of Blacks to world civilization, from ancient to modern times. Among the topics discussed are the ancient Black Hebrews, the Black Moors who invaded and occupied parts of Europe for centuries, great Blacks like Hannibal and Jesus Christ, and the forgotten Black civilizations of Europe, Egypt, Asia, and the Americas.

When the World was Black Part Two - Supreme  
understanding 2013-02-02

When the World Was Black: The Untold History of the World's First Civilizations (Volume Two of The Science of Self series) has been published in

TWO parts. Why two? Because there are far too many stories that remain untold. We had over 200,000 years of Black history to tell - from the southern tip of Chile to the northernmost isles of Europe - and you can't do that justice in a 300-page book. So there are two parts, each consisting of 360 pages of groundbreaking history, digging deep into the story of all the world's original people. Part One covers the Black origins of all the world's oldest cultures and societies, spanning more than 200,000 years of human history. Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20,000 years, up to the time of European contact. Each part has over 100 helpful maps, graphs, and photos, an 8-page full-color insert in the center, and over 300 footnotes and references for further research. "In this book, you'll learn about the history of Black people. I don't mean the history you learned in school, which most likely began with slavery and ended with the Civil Rights Movement. I'm talking about Black history BEFORE that. Long before that. In this book, we'll cover over 200,000 years of Black history. For many of us, that sounds strange. We can't even imagine what the Black past was like before the slave trade, much less imagine that such a history goes back 200,000 years or more." "Part Two covers history from 20,000 years ago to the point of European contact. This is the time that prehistoric cultures grew into ancient urban civilizations, a transition known to historians as the "Neolithic Revolution."

Reign of the Anunnaki - Jan Erik Sigdell  
2018-09-11

Reveals the ongoing alien manipulation of humanity and how we can break free • Explores how the Anunnaki have maintained invisible surveillance over us and how they control our development through religion, secret societies, and catastrophes • Reveals how they feed off our energies and how this ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control invisibly • Explains how they established religion to control us and how Gnostic Christianity--which came from Christ and not the Anunnaki--offers a way out of their matrix of control Cuneiform texts found on clay plates in Mesopotamia tell us about an extraterrestrial race, called the

Anunnaki, who came from space to exploit our planet. Through genetic manipulation, they created modern humans from existing earthly life forms to serve them as slaves. They physically left our planet millennia ago, but as Jan Erik Sigdell reveals, their influence and control over humanity is still pervasive and significant. Sigdell explains how the Anunnaki have maintained invisible surveillance over us as well as control over how humanity develops, setting limits on our evolution and holding back our development by means of manipulation and catastrophes, including the deluge immortalized in the Bible and many other ancient myths. He shows how they still manipulate our politics and affairs via secret societies, such as the Illuminati, and the political elite, such as the Bilderberg Group. Examining ancient descriptions of the Anunnaki as entities that resemble winged reptiles or amphibians, the author also explores their diet and how they feed off blood and the energies given off by lower life forms, such as humans, when they are expressing extreme negative emotions, having sex, or dying. This energy-feeding ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control invisibly. He explains how the Anunnaki established religions as tools for control, setting up the major religions with themselves as "gods" and playing them against each other to keep humanity's attention away from ongoing Anunnaki manipulation. They have also hidden from us the existence of the true highest creator, who created the cosmos as well as the Anunnaki themselves. The author reveals how the highest creator sent a messenger called Jesus to expose the Anunnaki and show us a way out of their matrix of control through a spirituality based on love, empathy, and sacred sexuality. But the "god" of the Anunnaki defeated this messenger and replaced him with a false Christ. This led to the development of Paulinian Christianity under Anunnaki influence, as well as other parallel religions such as Islam, and the suppression and elimination of the original Christianity, Gnostic Christianity. With the discovery of hidden Gnostic texts and teachings at Nag Hammadi in 1945, the way is now paved for our release from the reign of the Anunnaki.

Our African Unconscious - Edward Bruce Bynum

2021-09-07

• Examines the Oldawan, the Ancient Soul of Africa, and its correlation with what modern psychologists have defined as the collective unconscious • Draws on archaeology, DNA research, history, and depth psychology to reveal how the biological and spiritual roots of religion and science came out of Africa • Explores the reflections of our African unconscious in the present confrontation in the Americas, in the work of the Founding Fathers, and in modern psychospirituality The fossil record confirms that humanity originated in Africa. Yet somehow we have overlooked that Africa is also at the root of all that makes us human--our spirituality, civilization, arts, sciences, philosophy, and our conscious and unconscious minds. In this extensive look at the unfolding of human history and culture, Edward Bruce Bynum reveals how our collective unconscious is African. Drawing on archaeology, DNA research, depth psychology, and the biological and spiritual roots of religion and science, he demonstrates how all modern human beings, regardless of ethnic or racial categorizations, share a common deeper identity, both psychically and genetically--a primordial African unconscious. Exploring the beginning of early religions and mysticism in Africa, the author looks at the Egyptian Nubian role in the rise of civilization, the emergence of Kemetic Egypt, and the Oldawan, the Ancient Soul, and its correlation with what modern psychologists have defined as the collective unconscious. Revealing the spiritual and psychological ramifications of our shared African ancestry, the author examines its reflections in the present confrontation in the Americas, in the work of the Founding Fathers, and in modern Black spirituality, which arose from African diaspora religion and philosophy. By recognizing our shared African unconscious--the matrix that forms the deepest luminous core of human identity--we learn that the differences between one person and another are merely superficial and ultimately there is no real separation between the material and the spiritual.

*Beauty and Body Dysmorphic Disorder* - Neelam A. Vashi 2015-09-03

Over the decades, research has demonstrated that in categories of life deemed to be important, beautiful people achieve more desirable outcomes, are judged more favorably, and receive preferential treatment. An understanding of the historical aspects, science, and implications of what the human mind finds aesthetically pleasing is quintessential for dermatologists, plastic surgeons, and others who practice aesthetic medicine as the importance of beauty in today's society is what brings patients into clinics. While an element of dissatisfaction with one's appearance is commonplace, clinicians should remain vigilant for individuals who seek cosmetic procedures to quell excessive body image concerns that are out of proportion to objective physical findings. Body dysmorphic disorder (BDD) is a disorder of self-perception; it is the impairing preoccupation with a nonexistent or minimal flaw in appearance.

According to recent statistics, BDD occurs in 0.7-2.4% of the general population; however, multiple studies have suggested an incidence of 6-16% in patients seeking aesthetic medical treatments. Moreover, a vast majority will at some point seek dermatologic treatment and cosmetic surgery. Such patients are unlikely to be satisfied with corrective procedures, and only 15% of dermatologists surveyed thought that they could successfully treat BDD. Therefore, *Beauty and Body Dysmorphic Disorder* aims to assist dermatologists, plastic surgeons, and other aesthetic providers in recognizing key characteristics as well as providing treatment strategies to help in caring for those with BDD.  
*Casanova's Guide to Medicine* - Lisetta Lovett

2021-06-30

Forget the stereotype! Giacomo Casanova's (1725-1798) reputation as libertine has sadly eclipsed his talents as scholar, linguist, prolific writer and manqué doctor. Fortunately for us, he wrote his memoirs at the end of his life on the advice of his doctor to control his propensity to depression. Although these often have been harvested for information on political, cultural and social aspects of his time, the insights they give about medical practice and the lived experiences of illness have been largely neglected. This book addresses this deficiency through exploring in detail what Casanova wrote on a variety of conditions that include venereal disease and female complaints, duelling injuries, suicide, skin complaints and stroke and even piles. These descriptions provide alternately grim and amusing insights about public health measures, the doctor-patient relationship, medical etiquette and the dominant medical theories of the era. To help the reader understand the historical significance of the medical subjects covered, the author integrates throughout the book an extensive historical context drawn from contemporary sources of information and current history of medicine literature

**History in Black** - Yaacov Shavit 2013-11-12

The development of Afrocentric historical writing is explored in this study which traces this recording of history from the Hellenistic-Roman period to the 19th century. Afrocentric writers are depicted as searching for the unique primary source of "culture" from one period to the next. Such passing on of cultural traits from the "ancient model" from the classical period to the origin of culture in Egypt and Africa is shown as being a product purely of creative history.

Volume 2 examines the Bible's unique historiographic literary document, Genesis 10. On the basis of its genealogical structure, the identity of Hamites--Cushites, Egyptians, Putites, and Canaanites--are explained. (BlackLight Fellowship)

**The Sanctuary of Silence** - Israel Knohl 2007  
Scholar Israel Knohl offers a new perspective on the history and theology of the Priestly source of the Pentateuch. Knohl claims that groups associated with the Priestly Torah appear ensconced within the Temple, operating within a "Sanctuary of Silence", in contrast to the later Holiness School, which reached a loftier conception of God and a broader purview of faith, holiness, and practice.

**Afro Hair of the Ancient Egyptians and Blackheads, Africans of Mesopotamia** - Anu M'Bantu 2014-04-14

The Caucasian appearance of the hair on Egyptian mummies has been skilfully avoided by many Black scholars. Professor Diop appears to have been the only scholar to give it even a cursory treatment. We believe had he lived beyond 1986 he would have given the question the detail of attention it deserved. We conclude this because of the scientific pioneering spirit he showed in conducting the melanin dosage test is the same one that would have been required to solve this problem. This booklet deals with the contentious issue and puts it to rest. The ancient Egyptians had Afro hair! Professor Cheikh Anta Diop used the multi-disciplinary method to prove that the ancient Egyptians were Black. Now for the first time the ancient Mesopotamians are having the same multi-disciplinary approach applied to them. There is also a review of their political history and spiritual accomplishments. Art, anthropology, religion and history show the

Mesopotamians of ancient times were Black. This book was presented as a lecture alongside Dr Ben in October 2001 at the Dr Ben Memorial Lecture in London.

My Neeg'-Er - Caliph Zaphnathpaaneah El 2013-11-12

The intent of this book is to bring about awareness and restore a biblical identity to a people who are the only people in the history of mankind whose identity the world has concealed! It is time to challenge the assigned meaning of the word "NEEG'-ER" for two reasons: 1) It has been used to place a particular people in a singular distinct classification as the only people on the planet with a given identity that is false, and 2) It has been used as a weapon in the pseudo speciation, demoralization, stigmatization, and dehumanization of a people. It is through the bible that these questions finally find answers and relief. Those who contrived to cover up its meaning meant it for evil, but YAHWEH has turned it into something good.

**Wonderful Ethiopians of the Ancient Cushite Empire** - Drusilla Dunjee Houston 1985  
First published in 1926, Drusilla Dunjee Houston (a self-taught historian), describes the origin of civilization and establishes links among the ancient Black populations in Arabia, Persia, Babylonia, and India. In each case she concludes that the ancient Blacks who inhabited these areas were all culturally related.

**Historical Dictionary of Iraq** - Edmund A. Ghareeb 2004-03-18

**The Earth** - James Taylor 2013-10-30

This history of mankind has revealed he has produced great inventions, wonderful works of art, discoveries, and has created a fragile family unit. The Love of man has been revealed in our souls by; poetry, history and by his devotion to his God. Man efforts of love have slowly declined over his years on Earth. It needs to be motivated and patiently encouraged. This is my intent for writing this book; that one might grow in their love and touch the world that starving for Godly love. Godly love is not like Mans love; it has no expectations, no paybacks; but given freely without cause. I hope to motivate this Godly love within you. God created the world and made it a world of many colors. He beautified the world the colors of the rainbow. Everything that God created was colored to his perfection; including man. Man does not see the things created by God as perfect as they were created, because man only visualize with his eyes. God expected man to visualize the beauty that he created with all of his senses; including his spiritual sense; his heart.

The Sumerians - Samuel Noah Kramer  
2010-09-17

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of

texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology  
"An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

Pan-Africanism: Political Philosophy and Socio-Economic Anthropology for African Liberation and Governance - Kinni, Fongot Kiny-Yen  
2015-09-04

This Book is the outcome of a long project begun thirty years ago. It is a book on the makings of pan-Africanism through the predicaments of being black in a world dominated by being white. The book is a tribute and celebration of the efforts of the African-American and African-Caribbean Diaspora who took the initiative and the audacity to fight and liberate themselves from the shackles of slavery. It is also a celebration of those Africans who in their own way carried the torch of inspiration and resilience to save and reconstruct the Free Humanism of Africa. As a story of the rise from the shackles of slavery and poverty to the summit of Victors of their Renaissance Identity and Self-Determination as a People, the book is the story of African refusal to celebrate victimhood. The book also situates women as central actors in the Pan-African project, which is often presented as an exclusively masculine endeavour. It introduces a balanced gender approach and diagnosis of the Women actors of Pan-Africanism which was very much lacking. The problem of balkanisation of Africa on post-colonial affiliations and colonial linguistic lines has taken its toll on Africa's building of its common identity and personality. The result is that Africans are more remote to each other in their pigeon-hole-nation-states which put more restrictions for African inter-mobility, coupled by education and cultural affiliations, the communication and transportation and trading networks which are still tied more to their colonial masters than among themselves. This book looks into the problem of the new wave of Pan-Africanism and what strategies that can be

proposed for a more participatory Pan-Africanism inspired by the everyday realities of African masses at home and in the diaspora. This book is the first book of its kind that gives a comprehensive and multidimensional coverage of Pan-Africanism. It is a very timely and vital compendium.

**Twelve Years a Slave** - Solomon Northup

*The City in the Classical and Post-Classical World* - Claudia Rapp 2014-04-14

In its various incarnations, the Roman Empire survived until 1918, when the last two rulers to bear the title "Caesar" (Kaiser Wilhelm in Germany and Tsar Nicholas II of Russia) fell from power. This volume contains the thinking of an international team of twelve scholars who analyze two of the most important changes in political and religious identity brought about by that empire: a change from the Greek kinship- and polis-based system to the territorial system of imperial Rome, and the development of a universal religious consciousness that lasted from the adoption of Christianity in the fourth century to the development of the nation-state in modern times.

*Fruit Oils: Chemistry and Functionality* -  
Mohamed Fawzy Ramadan 2019-05-08

*Fruit Oils: Chemistry and Functionality* presents a comprehensive overview of recent advances in the chemistry and functionality of lipid bioactive phytochemicals found in fruit oils. The chapters in this text examine the composition, physicochemical characteristics and organoleptic attributes of each of the major fruit oils. The nutritional quality, oxidative stability, and potential food and non-food applications of these oils are also extensively covered. The potential health benefits of the bioactive lipids found in these fruit oils are also a focus of this text. For each oil presented, the levels of omega-9, omega-6 and omega-3 fatty acids are specified, indicating the level of health-promoting traits exhibited in each. The oils and fats extracted from fruits generally differ from one another both in terms of their major and minor bioactive constituents. The methods used to extract oils and fats as well as the processing techniques such as refining, bleaching and deodorization affect their major and minor constituents. In addition, different post-processing treatments of fruit oils and fats may alert or degrade important bioactive constituents. Treatments such as heating, frying, cooking and storage and major constituents such as sterols and tocopherols are extensively covered in this text. Although there have been reference works published on the composition and biological properties of lipids from oilseeds, there is currently no book focused on the composition and functionality of fruit oils. *Fruit Oils: Chemistry and Functionality* aims to fill this gap for researchers, presenting a detailed overview of the chemical makeup and functionality of all the important fruit oils.

**The Philistines and Other "Sea Peoples" in Text and Archaeology** - Ann E. Killebrew 2013-04-21

The search for the biblical Philistines, one of ancient Israel's most storied enemies, has long intrigued both scholars and the public. Archaeological and textual evidence examined in its broader eastern Mediterranean context reveals that the Philistines, well-known from biblical and extrabiblical texts, together with other related groups of "Sea Peoples," played a transformative role in the development of new ethnic groups and polities that emerged from the ruins of the Late Bronze Age empires. The essays in this book, representing recent research in the fields of archaeology, Bible, and history, reassess the origins, identity, material culture, and impact of the Philistines and other Sea Peoples on the Iron Age cultures and peoples of the eastern Mediterranean.
