Fanon, Phenomenology, and Psychology - Leswin Laubscher

2021-11-10

Fanon, Phenomenology, and Psychology is the first edited collection dedicated to exploring the explicitly phenomenological foundations underlying Frantz Fanon's most important insights. Featuring contributions from many of the world's leading scholars on Fanon, this volume foregrounds a series of crucial phenomenological topics - inclusive of the domains of experience, structure, embodiment, and temporality - pertaining to the analysis and interrogation of racism and anti-Blackness. Chapters highlight and expand Fanon's ongoing importance to the discipline of psychology while opening compelling new perspectives on psychopathology, decolonial praxis, racialized time, whiteness, Black subjectivity, the "racial ontologizing of the body," systematic structures of racism and resulting forms of trauma, Black Consciousness, and Africana phenomenology. In an era characterized by resurgent forms of anti-Blackness and racism, this book is essential reading for students, scholars, and activists who remain inspired by Fanon's legacy.

Matters of the Mind - William Lyons 2020-11-25

This book presents a popular and authoritative account of the dramatically different ways in which philosophers have thought about the mind over the last hundred years. It explores the effect of the major turning points in recent western philosophy as well as the influence of the leading figures.

Interpretive Archaeology - Julian Thomas 2001-01-01

New forms of archaeology are emerging which position the discipline firmly within the social and cultural sciences. These approaches have been described as "post processual" or "interpretive" archaeology, and draw on a range of traditions of enquiry in the humanities, from Marxism and critical theory to hermeneutics, feminism, queer theory, phenomenology and post-colonial thinking. This volume gathers together a series of the canonical statements which have defined an interpretive archaeology. Many of these have been unavailable for some while, and others are drawn from inaccessible publications. In addition, a number of key articles are included which are drawn from other disciplines, but which have been influential and widely cited within archaeology. The collection is put into context by an editorial introduction and thematic notes for each section.

Nietzsche's Women - Carol Diethel 1996-01-01

In der Reihe werden herausragende monographische Interpretationen von Nietzsches Werk im Ganzen oder von spezifischen Themen und Aspekten aus unterschiedlichen wissenschaftlichen Perspektiven veröffentlicht, vor allem aus philosophischer, literatur- und kommunikationswissenschaftlicher, soziologischer und historischer Sicht. Die Publikationen repräsentieren den aktuellen Stand. Jeder Band ist peer-reviewed.

African American Christian Ethics - Samuel K. Roberts 2008-09-01

In African American Christian Ethics, Samuel K. Roberts builds an ethic upon a Trinitarian foundation and explores scripture, tradition, human experience, and reason as sources for such an ethic. Using this framework he examines critical issues, including human sexuality and family life, medicine and bio-ethics, and the pursuit of justice.

Sigmund Freud - Michael Jacobs 2003-04-03

In refreshing contrast to most other books on Sigmund Freud, this is a highly accessible account of his life and ideas, which focuses on the

relevance of Freud's work for contemporary approaches to counselling and psychotherapy.

The Metaphysics of Self-realisation and Freedom - Colin Tyler

2017-03-22

This first part of Colin Tyler's new critical assessment of the social and political thought of T.H. Green (1836-1882) explores the grounding that Green gives to liberal socialism. Tyler shows how, for Green, ultimately, personal self-realisation and freedom stem from the innate human drive to construct a bedrock of fundamental values and commitments that can define and give direction to the individual's most valuable potentials and talents. This book is not only a significant contribution to British idealist scholarship. It highlights also the enduring philosophical and ethical resources of a social democratic tradition that remains one of the world's most important social and political movements, and not least across Britain, Europe, North America, India and Australia. Dr Colin Tyler is Reader in Politics at the University of Hull and joint convenor of the Centre for British Idealism.

Archaeology After Structuralism - Ian Bapty 2014-10-24

Most practising archaeologists have preferred to leave the deep theories of what lies behind their methods and perceptions on one side. Now archaeologists have faced up to the difficult task of making (or not making) the connections between the past, interpretation and the present. The writers of this volumes address the problems of archaeology, sometimes warily and sometimes with enthusiasm. The connections are not easy to accomplish: a great deal of theory seems of little relevance to the everyday practice of archaeology, and much of post-structuralism refers exclusively back to itself rather than to the more specific concerns of a historical discipline. But where the junction between post-structuralism and archaeology can be made, the results are innovative and enriching. Originally published in 1990.

Two short accounts of psycho-analysis - Sigmund Freud 1963

The Word of Truth - Dale Moody 1990

Bringing together the insights of several disciplines — biblical theology, modern science, biblical criticism (textual, source, form, redaction), historical theology, and the history of doctrine — Moody develops a systematic theology that is biblically grounded and ecumenically oriented. Thoroughly indexed.

Disciplines of Education - Ivor Morrish 2019-08-13

First published in 1967, this book suggests that educational problems should not, and indeed cannot, be solved in isolation, but that we need to bring all our disciplines and resources to bear upon them. It explores in turn philosophical, psychological and sociological approaches to educational theory and examines great thinkers such as Plato, R
Two Short Accounts of Psycho-analysis - Sigmund Freud 1991
When Sigmund Freud was invited to lecture in America in 1909 he expounded, for the first time at any length, the results of his work in Vienna over many years. He described in these Five Lectures on Psycho-Analysis his abandonment of hypnosis and his adoption, in order to disclose repressed complexes, of free association, the interpretation of dreams and the reason for apparently haphazard actions and errors. He devoted one lecture to the fundamental subject of sexuality and spoke of transference in analysis.

From the Erotic to the Demonic : On Critical Musicology - Derek B. Scott Chair of Music University of Salford 2003-03-11

From the Erotic to the Demonic: On Critical Musicology demonstrates how different musical styles construct ideas of class, sexuality, and

ethnic identity. This book will serve as a model for musicologists who want to take a postmodern approach to their inquiries. The clear and lively arguments are supported by ninety musical examples taken from such diverse sources as opera, symphonic music, jazz, and nineteenth- and twentieth-century popular songs. Derek Scott offers new insights on a range of "high" and "low" musical styles, and the cultures that produced them.

The Trauma Question - Roger Luckhurst 2013-06-17

In this book, Roger Luckhurst both introduces and advances the fields of cultural memory and trauma studies, tracing the ways in which ideas of trauma have become a major element in contemporary Western conceptions of the self. The Trauma Question outlines the origins of the concept of trauma across psychiatric, legal and cultural-political sources from the 1860s to the coining of Post-Traumatic Stress Disorder in 1980. It further explores the nature and extent of 'trauma culture' from 1980 to the present, drawing upon a range of cultural practices from literature, memoirs and confessional journalism through to photography and film. The study covers a diverse range of cultural works, including writers such as Toni Morrison, Stephen King and W. G. Sebald, artists Tracey Emin, Christian Boltanski and Tracey Moffatt, and film-makers David Lynch and Atom Egoyan. The Trauma Question offers a significant and fascinating step forward for those seeking a greater understanding of the controversial and ever-expanding field of trauma research.

The Culture of Confession from Augustine to Foucault - Chloe Taylor 2010-05-26

Drawing on the work of Foucault and Western confessional writings, this book challenges the transhistorical and commonsense views of confession as an innate impulse resulting in the psychological liberation of the confessing subject. Instead, confessional desire is argued to be contingent and constraining, and alternatives to confessional subjectivity are explored.

Self-in-Relationship Psychotherapy - Augustine Meier 2022-07-29

In this innovative book, the authors set out their theory of Self-in-Relationship Psychotherapy (SIRP), advocating for the integration of relational, self, and physical intimacy needs in the conceptualization and treatment of psychological problems, placing human needs at the center of treatment. This marks a shift in how psychological and relational problems are understood, currently being perceived in terms of affects, cognitive processes and behaviors. Using numerous illustrations from their own clinical practice, Meier and Boivin contend that this understanding overlooks the pivotal role that needs play in all aspects of peoples' personal lives and relationships. Children, adolescents, and adults do not live primarily from feelings and thoughts, but from basic psychological and relational, needs such as wanting to be in a meaningful relationship, having the autonomy and freedom to make decisions about their lives, experiencing being competent, being regarded as a significant and important person, and experiencing emotional, intimate, and sensual and/or sexual connections. By taking such an approach this book stands out among other books on psychotherapy theories. Authored by two seasoned psychologists who have provided therapeutic services to children, adolescents, and adults for 40 years, this book comprises the foundational theory for practicing Self-in-Relationship Psychotherapy, making it of interest to graduate students, clinicians in training, and practicing psychologists, social workers, and psychotherapists alike.

Global Slump - David McNally 2010-12-09

Global Slump analyzes the global financial meltdown as the first systemic crisis of the neoliberal stage of capitalism. It argues that—far from having ended—the crisis has ushered in a whole period of worldwide economic and political turbulence. In developing an account of the crisis as rooted in fundamental features of capitalism, Global Slump challenges the view that its source lies in financial deregulation. The book locates the recent meltdown in the intense economic restructuring that marked the recessions of the mid-1970s and early 1980s. Through this lens, it highlights the emergence of new patterns of world inequality and new centers of accumulation, particularly in East Asia, and the profound economic instabilities these produced. Global Slump offers an original account of the "financialization" of the world economy during this period, and explores the intricate connections between international financial markets and new forms of debt and dispossession, particularly in the Global South. Analyzing the massive intervention of the world's central banks to stave off another Great Depression, Global Slump shows that, while averting a complete meltdown, this intervention also laid the basis for recurring crises for poor and working class people: job loss, increased poverty and inequality, and deep cuts to social programs. The book takes a global view of these processes, exposing the damage

inflicted on countries in the Global South, as well as the intensification of racism and attacks on migrant workers. At the same time, Global Slump also traces new patterns of social and political resistance—from housing activism and education struggles, to mass strikes and protests in Martinique, Guadeloupe, France and Puerto Rico—as indicators of the potential for building anti-capitalist opposition to the damage that neoliberal capitalism is inflicting on the lives of millions.

Freud's Theory and Its Use in Literary and Cultural Studies - Henk de Berg 2004

Rarely has a single figure had as much influence on Western thought as Sigmund Freud. His ideas permeate our culture to such a degree that an understanding of them is indispensable. Yet many otherwise well-informed students in the humanities labor under misconceptions or lack of knowledge about Freudian theory. There are countless introductions to Freudian psychoanalysis but, surprisingly, none that combine a genuinely accessible account of Freud's ideas with an introduction to their use in literary and cultural studies, as this book does. It is written specifically for use by advanced undergraduate and graduate students in courses dealing with literary and cultural criticism, yet will also be of interest to the general reader. The book consists of two parts. Part one explains Freud's key ideas, focusing on the role his theories of repression, conscious and unconscious mental processes, sexuality, dreams, free associations, "Freudian slips," resistance, and transference play in psychoanalysis, and on the relationship between ego, superego, and id. Here de Berg refutes many popular misconceptions, using examples throughout. The assumption underlying this account is that Freud offers not simply a model of the mind, but an analysis of the relation between the individual and society. Part two discusses the implications of Freudian psychoanalysis for the study of literature and culture. Among the topics analyzed are Hamlet, Heinrich Heine's Lore-Ley, Freud's Totem and Taboo and its influence on literature, the German student movement of the late 1960s, and the case of the Belgian pedophile Marc Dutroux and the public reactions to it. Existing books focus either on Freudian psychoanalysis in general or on psychoanalytic literary or cultural criticism; those in the latter category tend to be abstract and theoretical in nature. None of them are suitable for readers who are interested in psychoanalysis as a tool for literary and cultural criticism but have no firm knowledge of Freud's ideas. **Freud's Psychodynamic Theory for Therapeutic Practice** - Juliet Higdon 2011-10-31

This engaging and accessible textbook introduces psychodynamic theory in a way that helps readers better understand complex theories and how these can enrich their practice. Five chapters on classic theorists explore their life stories and the ideas, and are illustrated with captivating case studies. Contemporary developments relating to psychodynamic theory are explored, such as the links with neurobiology and how attachment shapes a baby's brain, and how to make sense of the anxieties contained in the organisations of hospitals and day care nurseries. It also examines psychodynamic evidence based theory and practice. An insightful introduction to core psychodynamic theory, this refreshingly clear book is invaluable reading for all students, trainees and practitioners in counselling and psychotherapy, and of interest to those studying and working in the fields of nursing, social work and counselling psychology.

Psychosocial Conceptual Practice Models in Occupational Therapy - Moses N. Ikiugu 2007-01-01

This book examines the occupational therapy paradigm (its focal viewpoint, core constructs, and values) as well as the role of complexity/chaos theory as a scientific framework for occupational therapy research and practice. Unlike other current OT texts, this book uses clinical case examples to illustrate application of proposed changes to make procedures consistent with the latest Occupational Therapy Practice Framework. The reader walks away with a clear grasp of the theoretical principles guiding his or her treatment interventions, the explanations behind those principles, and the applicable intervention for said techniques and procedures. An emphasis on clinical-reasoning skills, including information on different types of reasoning skills as well as the MAPP model of teaching helps the student and clinician translate theoretical principles into practice. The section on specific interventions addresses each of the conceptual practice models according to a consistent chapter template, which enables the reader to apply conceptual practice models in real-world contexts. Preview questions at the beginning of each chapter alert the reader to important concepts in the upcoming text. Critical analysis of the theoretical core provides suggested modifications to increase consistency with the new occupational therapy paradigm.

Bibliography - Jacques Waardenburg 2015-08-31

Since its founding by Jacques Waardenburg in 1971, Religion and Reason has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include (among others) category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism, and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline.

Death, Desire and Loss in Western Culture - Jonathan Dollimore 2013-07-04

Death, Desire and Loss in Western Culture is a rich testament to our ubiquitous preoccupation with the tangled web of death and desire. In these pages we find nuanced analysis that blends Plato with Shelley, Hölderlin with Foucault. Dollimore, a gifted thinker, is not content to summarize these texts from afar; instead, he weaves a thread through each to tell the magnificent story of the making of the modern individual.

Intercultural Encounters - Wim M. J. van Binsbergen 2003

This book includes fifteen essays that investigate aspects of interculturality. As such, it focuses on the borderline between social anthropology and intercultural philosophy. The author seeks to make a contribution to intercultural philosophy by formulating with great precision and painful honesty the lessons derived from extensive intercultural experiences as an anthropologist. The volume's culminating section presents an intercultural philosophy revolving on the tenet "Cultures do not exist." The kaleidoscopic nature of intercultural experiences is reflected in the diversity of these texts. Many belong to a field that could be described as "meta-anthropology," others are more clearly philosophical; occasionally the essays spill over into belles lettres, ancient history, and comparative cultural and religious studies. The ethnographic specifics supporting the arguments are diverse, deriving from various African situations in which the author has conducted participatory field research, in countries including Tunisia, Zambia, Botswana, and South Africa. Wim van Binsbergen is professor of Foundations of Intercultural Philosophy, Philosophical Faculty, Erasmus University, Rotterdam, and chair of the theme group on globalization, African Studies Centre, Leiden.

Religion, Identity and Change - Simon Coleman 2017-03-02

Religion is of enduring importance in the lives of many people, yet the religious landscape has been dramatically transformed in recent decades. Established churches have been challenged by eastern faiths, revivals of Christian and Islamic fundamentalism, and the eclectic spiritualities of the New Age. Religion has long been regarded by social scientists and psychologists as a key source of identity formation, ranging from personal conversion experiences to collective association with fellow believers. This book addresses the need for a reassessment of issues relating to identity in the light of current transformations in society as a whole and religion in particular. Drawing together case-studies from many different expressions of faith and belief - Hindu, Muslim, Roman Catholic, Anglican, New Age - leading scholars ask how contemporary religions or spiritualities respond to the challenge of forming individual and collective identities in a nation context marked by secularisation and postmodern decentring of culture, as well as religious revitalisation. The book focuses on Britain as a context for religious change, but asks important questions that are of universal significance for those studying religion: How is personal and collective identity constructed in a world of multiple social and cultural influences? What role can religion play in creating, reinforcing or even transforming such identity?

From the Erotic to the Demonic - Derek B. Scott 2003

This text should prove useful as a model for musicologists who want to take a postmodern approach to their inquiries. It demonstrates how different musical styles construct ideas of class, sexuality, and ethnic identity.

Musical Style and Social Meaning - Derek B. Scott 2017-07-05

Why do we feel justified in using adjectives such as romantic, erotic, heroic, melancholic, and a hundred others when speaking about music? How do we locate these meanings within particular musical styles? These are questions that have occupied Derek Scott's thoughts and driven his critical musicological research for many years. In this selection of essays, dating from 1995-2010, he returns time and again to examining how conventions of representation arise and how they become established. Among the themes of the collection are social class, ideology, national identity, imperialism, Orientalism, race, the sacred and profane, modernity and postmodernity, and the vexed relationship of art and

entertainment. A wide variety of musical styles is discussed, ranging from jazz and popular song to the symphonic repertoire and opera.

Integrative Therapy - Maja O'Brien 2007-01-24

"The book is comprehensive, and extensively researched and referenced. ...[The] last chapter contains some excellent training resources for trainers of counsellors/psychotherapists. I would therefore endorse it as a useful textbook, especially as there is an excellent in-depth example of an assessment form, and guidance on how this can be used for trainees. These were useful revision points to me as an experienced counsellor" - The Independent Practitioner "The book would be useful to practitioners who want to start thinking 'outside the box' of a particular orientation. It is also aimed at students and trainers - the last 40 pages in particular are full of practical training exercises. Overall, I would recommend it as a well-reasoned argument for therapy to be rooted in an integrative base" - Therapy Today "Throughout the book it is assumed that we can learn from each other and that we need to, whatever orientation we were trained in, in the service of the client. I find this pragmatic approach open and refreshing in a period when some of us have polarised around the 'what works best' debate. Both authors are experienced practitioners and trainers and their commitment to integrative counselling and psychotherapy shines through" - AUCC Journal Integration rather than a single theory has become accepted and widely recommended as a way forward in psychotherapy and counselling. Integrative Therapy, Second Edition, a timely and innovative guide for practitioners, is based on the view that training and practice methods should be evaluated for their usefulness to the client instead of their adherence to a particular model. Drawing from research on therapy process and outcome, and on human development respectively, the authors highlight striking similarities between the change processes involved in these two areas of study. The findings provide a basis for an adaptable framework for integrative practice. The authors pinpoint what is common as well as what is different in various approaches, using case illustrations to make comparisons throughout between the three major models: psychodynamic, humanistic-existential and cognitive-behavioural. What emerges is the central importance of the therapeutic relationship in the process of change - 'how to be with clients' as opposed to 'what to do'. Fully revised and updated, this Second Edition includes new material on neuroscience and practitioner-oriented research methodology showing how the processes of doing research and doing therapy have many things in common. The book aims to cultivate a spirit of willingness amongst therapists trained in one model to learn from colleagues trained in others. It also features exercises to support its use on courses and will thus be invaluable to trainees of counselling, psychotherapy and counselling psychology. Maja O'Brien is a chartered counselling psychologist and psychotherapist, supervisor and trainer based in Oxford and a Principal Lecturer on the Doctorate in Psychotherapy by Professional Studies run jointly by the Metanoia Institute and Middlesex University. Gaie Houston is a writer, UKCP-registered psychotherapist and senior lecturer at The Gestalt Centre, London.

Ghosts - P. Buse 1999-01-28

Did you know that the father of psychoanalysis believed in ghosts, or that Frederick Engels attended seances? Ghosts: Deconstruction, Psychoanalysis, History is the first collection of theoretical essays to evaluate these facts and consider the importance of the metaphor of haunting as it has appeared in literature, culture, and philosophy. Haunting is considered as both a literal and figurative term that encapsulates social anxieties and concerns. The collection includes discussions of nineteenth-century spiritualism, gothic and postcolonial ghost stories, and popular film, with essays on important theoretical writers including Freud, Derrida, Adorno, and Walter Benjamin.

New Soviet Man - John Haynes 2003

This is the first full-length study of masculinity in Stalinist Soviet cinema. A detailed analysis of Stalinist discourse examines the imagined relationship between the patriarch Stalin and his "model sons" in the key genre cycles of the era: from the capital to the collective farms, and ultimately to the very borders of the Soviet state. Informed by contemporary and present day debates over the social and cultural significance of cinema and masculinity, this book draws on a range of theoretical and comparative material to produce engaging and accessible readings accounting for both the appeal of--and the inherent potential for subversion within--films produced by the Stalinist culture industry.

Understanding Psychoanalysis - Matthew Sharpe 2014-12-05

"Understanding Psychoanalysis" presents a broad introduction to the key concepts and developments in psychoanalysis and its impact on modern thought. Charting pivotal moments in the theorization and reception of

psychoanalysis, the book provides a comprehensive account of the concerns and development of Freud's work, as well as his most prominent successors, Melanie Klein and Jacques Lacan. The work of these leading psychoanalytic theorists has greatly influenced thinking across other disciplines, notably feminism, film studies, poststructuralism, social and cultural theory, the philosophy of science and the emerging discipline of neuropsychology. Analysing this engagement with other disciplines and their key theorists, "Understanding Psychoanalysis" argues for a reconsideration of psychoanalysis as a resource for philosophy, science, and cultural studies.

The Origin and development of psychoanalysis 1910 - Sigmund Freud 1910

Presocratic Reflexivity: The Construction of Philosophical Discourse c. 600-450 B.C. - Barry Sandywell 2002-11-01

In this third Volume of Logological Investigations Sandywell continues his sociological reconstruction of the origins of reflexive thought and discourse with special reference to pre-Socratic philosophy and science and their socio-political context.

Classical Approaches to the Study of Religion - Jean Jacques Waardenburg 1973

Literature, Psychoanalysis and the New Sciences of Mind - Leonard Jackson 2014-09-11

At a time when psychoanalysis is attacked by biologists, psychologists and literary critics alike, this book offers a radical defence. *Literature, Psychoanalysis and the New Sciences of Mind* gives a clear introduction to the theories of Freud and Jung, the strange linguistic rewriting of Freud by Jacques Lacan. It explores the extraordinary variety of ways in which these writings have been applied to literature and literary theory. But for the first time, they are put in the context of recent biological theories of mind and sexuality.

Proceedings of the 5th Rocky Mountain Region Disaster Mental Health Conference - George W. Doherty 2007-01-01

Recent years have seen an extraordinary number of major disasters, critical incidents and other events that have had major impacts on our world. The 2004 tsunami, hurricanes Rita and Katrina, and the wars in Iraq and Afghanistan affect millions of lives daily. Potential events such as Avian Flu pandemic, global warming and the increasing threats of spreading unrest in the Middle East are concerns that weigh heavily on us all. November 8-11, 2006, the Rocky Mountain Region Disaster Mental Health Institute held their Annual four-day Disaster Mental Health Conference. The theme of the conference was "TAKING CHARGE IN TROUBLED TIMES: Response, Resilience, Recovery and Follow-up." This edition contains the major papers presented at the conference and summaries of additional presentations. They address some of the major crisis events confronting our societies in recent years, namely, large disasters such as hurricanes Katrina and Rita; case studies such as Abu Ghraib, and traumatic events such as a night club suicide bombing, the role of cultural sensitivity and ethics in disaster settings, resilience, and the importance of planning, education and taking care of our first responders and mental health professionals. An additional concern with information includes information about preparation of communities and families for deployment and return of military personnel. The importance of planning for how mental health personnel can respond in the event of an Avian Flu Pandemic is also discussed. Presenters are drawn from researchers and responders from Wyoming, the United States, and the United Kingdom. <http://www.rmrinstitute.org> The Rocky Mountain Region Disaster Mental Health Institute is a 501(c)3 Non-profit Organization

Toying with Childhood - Usha Mudiganti 2022-02-28

This book studies the dialectic relationship between the image of the child and the toy in literary depictions of childhood in 19th- and 20th-century Anglo-American fiction. Drawing from the psychoanalytic

theories of Sigmund Freud, Anna Freud, D.W. Winnicott, and Sudhir Kakar, it analyses themes such as the heterogeneity of childhood and the construction of the ideals of childhood. It explores the linkages between the ideals of childhood in Britain and its travel to America and further dissemination in British India. It discusses the established tropes of childhood such as innocence, a formative period, the centrality of play, and the presence of a toy to argue that the mores of childhood are culturally constructed and lead to the reification of a child into an image of perfection. The author problematises the notion of essential innocence and discusses the repercussions of such stereotypes about childhood. The work also highlights parallels between the ideals of childhood established in 19th-century Britain and the portrayals of postcolonial Indian childhoods in 20th-century Indian English literature. *Toying with Childhood* will be useful for students and researchers of education, childhood studies, psychology, sociology, literature, gender studies, and development studies. It will also appeal to general readers interested in cultural perceptions of childhood, literary depictions of children, and the works of Sigmund Freud.

Real Cities - Steve Pile 2005-03-18

'...this is a book with an interesting thesis, and a welcome contribution to the literature. Pile has opened up a productive theoretical and empirical space for further study and exploration' - RGS-IBG Urban Geography Research Group What is real about city life? *Real Cities* shows why it is necessary to take seriously the more imaginary, fantastic and emotional aspects of city life. Drawing inspiration from the work of Walter Benjamin, Sigmund Freud and Georg Simmel, Pile explores the dream-like and ghost-like experiences of the city. Such experiences are, he argues, best described as phantasmagorias. The phantasmagorias of city life, though commonplace, are far from self-evident and little understood. This book is a path-breaking exploration of urban phantasmagorias, grounded empirically in a series of unusual and exciting case studies. In this study, four substantial phantasmagorias are identified: dreams, magic, vampires and ghosts. The investigation of each phantasmagoria is developed using a wide variety of clear examples. Thus, voodoo in New York and New Orleans shows how ideas about magic are forged within cities. Meanwhile vampires reveal how specific fears about sex and death are expressed within, and circulate between, cities such as London and Singapore. Taken together, such examples build a unique picture of the diverse roles of the imaginary, fantastic and the emotional in modern city life. What is "real" about the city has radical consequences for how we think about improving city life, for all too often these are over-looked in utopian schemes for the city. *Real Cities* forcefully argues that an appreciation of urban phantasmagorias must be central to what is considered real about city life.

Therapy - Don Feasey 2017-03-11

In this frank and compelling account of psychotherapy today, Feasey focuses on some of the central concepts of psychoanalytic psychotherapy, examining them with a critical and appraising eye. The book is based on 25 years of experience as a therapist and is illustrated throughout with engaging vignettes which bring a sense of drama and reality to a life in therapy.

Introductory Lectures on Psychoanalysis - Sigmund Freud 1977

In reasoned progression he outlined core psychoanalytic concepts, such as repression, free association and libido. Of the various English translations of Freud's major works to appear in his lifetime, only one was authorized by Freud himself: The Standard Edition of the Complete Psychological Works of Sigmund Freud under the general editorship of James Strachey. Freud approved the overall editorial plan, specific renderings of key words and phrases, and the addition of valuable notes, from bibliographical and explanatory. Many of the translations were done by Strachey himself; the rest were prepared under his supervision. The result was to place the Standard Edition in a position of unquestioned supremacy over all other existing versions. Newly designed in a uniform format, each new paperback in the Standard Edition opens with a biographical essay on Freud's life and work --along with a note on the individual volume--by Peter Gay, Sterling Professor of History at Yale.
