Memories of the Future - Siri Hustvedt 2019-03-19
Longlisted for the 2020 Andrew Carnegie

Medals for Excellence A provocative, exuberant novel about time, memory, desire, and the imagination from the internationally bestselling and prizewinning author of *The Blazing World*, *Memories of the Future* tells the story of a young Midwestern woman's first year in New York City

in the late 1970s and her obsession with her mysterious neighbor, Lucy Brite. As she listens to Lucy through the thin walls of her dilapidated building, S.H., aka "Minnesota," transcribes her neighbor's bizarre and increasingly ominous monologues in a notebook, along with sundry other adventures, until one frightening night when Lucy bursts into her apartment on a rescue mission. Forty years later, S.H., now a veteran author, discovers her old notebook, as well as early drafts of a never-completed novel while moving her aging mother from one facility to another. Ingeniously juxtaposing the various texts, S.H. measures what she remembers against what she wrote that year and has since forgotten to create a dialogue between selves across decades. The encounter both collapses time and reframes its meanings in the present. Elaborately structured, intellectually rigorous, urgently paced, poignant, and often wildly funny, *Memories of the Future* brings together themes that have made Hustvedt among the most

celebrated novelists working today: the fallibility of memory; gender mutability; the violence of patriarchy; the vagaries of perception; the ambiguous borders between sensation and thought, sanity and madness; and our dependence on primal drives such as sex, love, hunger, and rage.

Benvenuti nel Pornocene - Davide Navarra
2020-09-29

Dilagante e invadente, il porno 2.0 è uno dei prodotti più peculiari del tecnocapitalismo ipermediale, e si pone come chiave d'accesso privilegiata per intendere il passaggio d'epoca in cui siamo immersi. La metamorfosi antropologica oggi in atto passa anche e soprattutto dall'interazione con dispositivi rivoluzionari quali Google, Amazon e Facebook, servizi che stanno lentamente ma efficacemente trasformando le nostre esistenze. La pornografia online è qui interpretata come macroapparato al cui interno si giocano e ridefiniscono le identità dei soggetti, le metamorfosi relazionali, la

percezione della corporeità, l'investimento dei desideri e le nuove pratiche sociali. Sex robot e food porn, Black Mirror e Miss Keta, Lady Gaga e Rick e Morty, YouTube Anche Io e la Madonna di Medjugorje: attingendo al vasto immaginario della cultura pop e in costante dialogo con autori come Baudrillard, Pasolini, Heidegger e Foucault, l'autore ci fornisce una prima, provvisoria ma preziosa mappa per orientarci nelle affollate strade del neonato Pornocene.

The Vagrant Mood - W. Somerset Maugham
2011-01-11

The Vagrant Mood is a brilliantly varied and colourful collection of essays. From Kant to Raymond Chandler; from the legend of Zurbaran to the art of the detective story; from Burke to Augustus Hare, Somerset Maugham brings his inimitable mastery of the incisive character sketch to the genre of literary criticism

Territori dell'umano - Franco Rella
2022-02-19T00:00:00+01:00

Le tecnoscienze dominano la nostra vita. Si parla

sempre più di un superamento dell'umano, del mito del superamento delle malattie e persino della morte. Siamo ormai prossimi, è stato scritto, al postumano: al momento in cui uno deciderà come, quando e addirittura se morire. Il libro discute questa mitologia, confrontandola con i territori in cui l'umano si manifesta nella complessità del quotidiano, faccia a faccia con il mondo e con i problemi che investono uomini e donne nella profondità della loro esistenza, nella profondità del loro rapporto con il dolore, con la morte e con una diversa consapevolezza di sé. Il libro si chiude nel luogo misterioso dell'infanzia in cui i bambini disegnano la mappa di un altro territorio: il territorio spesso ignorato di un altro umano con cui confrontarci.

Filosofia del digitale - AA. VV.
2020-09-29T00:00:00+02:00

La cifra della "rivoluzione digitale" non sta semplicemente nel promuovere grandi cambiamenti, bensì nell'aprire a inedite concezioni del mondo e dell'essere umano. La

sfida intellettuale e scientifica alla base di questo volume è, dunque, indagare le implicazioni delle attuali tecnologie digitali (reti telematiche, piattaforme, intelligenza artificiale, big data, Internet delle cose, realtà virtuale ecc.) adottando una prospettiva critica e globale. Ciò corrisponde a superare una visione “tecnocentrica”, che troppo spesso si focalizza sul potenziale delle tecnologie sottovalutando il contesto culturale, sociale e politico, oltre che i valori e i modelli ideali degli individui e delle comunità con cui le innovazioni si devono necessariamente confrontare. I contributi all’interno di questo volume esaminano, con gli strumenti tipici delle discipline umanistiche, le diverse modalità in cui gli esseri umani possono rapportarsi al digitale, modificando se stessi e le tecnologie in un intreccio di azioni e retroazioni dinamiche e complesse.

Resistance, Liberation Technology and Human Rights in the Digital Age - Giovanni Ziccardi
2012-09-29

This book explains strategies, techniques, legal issues and the relationships between digital resistance activities, information warfare actions, liberation technology and human rights. It studies the concept of authority in the digital era and focuses in particular on the actions of so-called digital dissidents. Moving from the difference between hacking and computer crimes, the book explains concepts of hacktivism, the information war between states, a new form of politics (such as open data movements, radical transparency, crowd sourcing and “Twitter Revolutions”), and the hacking of political systems and of state technologies. The book focuses on the protection of human rights in countries with oppressive regimes.

The Leopard - Giuseppe Di Lampedusa
2007-11-06

Set in the 1860s, The Leopard tells the spellbinding story of a decadent, dying Sicilian aristocracy threatened by the approaching

forces of democracy and revolution. The dramatic sweep and richness of observation, the seamless intertwining of public and private worlds, and the grasp of human frailty imbue *The Leopard* with its particular melancholy beauty and power, and place it among the greatest historical novels of our time. Although Giuseppe di Lampedusa had long had the book in mind, he began writing it only in his late fifties; he died at age sixty, soon after the manuscript was rejected as unpublishable. In his introduction, Gioacchino Lanza Tomasi, Lampedusa's nephew, gives us a detailed history of the initial publication and the various editions that followed. And he includes passages Lampedusa wrote for the book that were omitted by the original Italian editors. Here, finally, is the definitive edition of this brilliant and timeless novel. (Translated from the Italian by Archibald Colquhoun.)

Handbook of Research on Applying Emerging Technologies Across Multiple Disciplines - Marchisio, Emiliano 2022-04-08

In recent decades, there has been a groundbreaking evolution in technology. Every year, technology not only advances, but it also spreads throughout industries. Many fields such as law, education, business, engineering, and more have adopted these advanced technologies into their toolset. These technologies have a vastly different effect ranging from these different industries. The Handbook of Research on Applying Emerging Technologies Across Multiple Disciplines examines how technologies impact many different areas of knowledge. This book combines a solid theoretical approach with many practical applications of new technologies within many disciplines. Covering topics such as computer-supported collaborative learning, machine learning algorithms, and blockchain, this text is essential for technologists, IT specialists, programmers, computer scientists,

engineers, managers, administrators, academicians, students, policymakers, and researchers.

Italian Democracy - Gianfranco Pasquino
2019-11-27

This textbook, from one of Italy's most eminent scholars, provides broad coverage and critique of Italian politics and society. Providing the readers with the knowledge necessary to understand the working of the Italian political system, it also offers answers to some of the most important challenges facing the country - and other contemporary democracies - today, such as populism, anti-politics and corruption. Critical but underpinned by thorough data and analysis, it presents alternative views alongside the author's interpretation. Crucially, the book uses a comparative framework to explain Italy's transformation and evaluate its performance. Comparing the rules, institutions, parties and actors at work in the most important European political systems - France, Germany, Great

Britain - with those in Italy, the Italian context is better understood and assessed in contrast. This text will be essential reading for students and scholars of Italian politics and European politics, and more broadly for comparative politics and democracy.

Why Are You Afraid? Have You No Faith? - Pope Francis 2021-02-10

The COVID-19 pandemic has left an indelible mark on our lives, and the same is true for the Church. Masses were suspended for months, people could not receive the sacraments, and during that time Pope Francis celebrated Mass alone every day. Why are you afraid? Have you no faith? collects some of the words from the pope's daily homilies when the world was in isolation during the "long Lent" in the spring of 2020, as well as Angelus messages and prayers he delivered. This book is filled with poignant photos that bring to life Pope Francis' words of support and encouragement, especially from his extraordinary blessing "Urbi et Orbi" in an

empty St. Peter's Square at the Vatican on March 27, 2020. The dozens of photos in this book illustrate the themes often evoked by the Holy Father during the pandemic, including fraternal love, solidarity, the common good, and the virtue of hope. Commemorating an historically important chapter in both the papacy of Francis and the history of the modern world, this book is another avenue by which the Holy Father shares his uplifting message of wisdom, hope, and love with those who have suffered in pain, loneliness, and fear. Despite the dire challenges we have faced during this pandemic, Pope Francis reminds us that evil does not destroy confidence in God, and it does not break the solidarity of humanity.

Their Language of Love - Bapsi Sidhwa
2013-02-15

In this brand-new collection of stories, Bapsi Sidhwa returns to chronicling the lives and loves of those on both sides of the Indo-Pak border. A wife worries for her family's survival during the

1965 Indo-Pak war. A mother is horrified when she learns that her daughter wants to marry her American boyfriend. An American housewife living in Lahore has a tempestuous affair with a Pakistani minister. An aged matriarch travels to the USA to discover she must confront a traumatic memory from her past. Finely nuanced, and laced with Sidhwa's sharply comic observations, this is a stellar collection of tales from one of the subcontinent's most important and beloved writers.

Religioni & Media - AA. VV.

2021-01-28T00:00:00+01:00

Con l'impegno a essere più preparati a confrontarci con le credenze altrui e avere più strumenti per capire il nostro rapporto con le "realità religiose", questo libro, nella sua prima parte, si rivolge a non specialisti per provare a suggerire come non sia affatto facile parlare "non religiosamente" di religione. Non è facile e tuttavia è urgente. Sono così offerte rapide ricognizioni sul concetto stesso di "religione" e

su quello di “sacro”, sulla possibilità di uno studio laico e scientifico. Nella seconda parte del libro, a partire da casi di studio, si è cercato di approfondire il rapporto tra media e religioni andando oltre al solo reperimento di temi e immaginari religiosi presenti nei mezzi di comunicazione. Dal momento che questi ultimi sono produttori in se stessi di immaginario, dal momento che l’esperienza che facciamo dei nuovi media - pervasivi, avvolgenti e ontofanici come non mai - è per molti aspetti sempre più religiosa, diventa forse opportuno provare a leggere la contemporaneità non col passato, ma al contrario sforzarsi di vedere tutto con uno sguardo nuovo. Ed è quindi evidente come il tema “religioni e media” ci spinga a ripensare differenzialmente cosa siano le religioni e cosa siano i media.

Online Afterlives - Davide Sisto 2020-09-01
How digital technology—from Facebook tributes to QR codes on headstones—is changing our relationship to death. Facebook is the biggest

cemetery in the world, with countless acres of cyberspace occupied by snapshots, videos, thoughts, and memories of people who have shared their last status updates. Modern society usually hides death from sight, as if it were a character flaw and not an ineluctable fact. But on Facebook and elsewhere on the internet, we can't avoid death; digital ghosts—electronic traces of the dead—appear at our click or touch. On the Internet at least, death has once again become a topic for public discourse. In *Online Afterlives*, Davide Sisto considers how digital technology is changing our relationship to death. Sisto describes the various modes of digital survival after biological death—including Facebook tributes, chatbots programmed to speak in the voice of a dead person, and QR codes on headstones—and discusses their philosophical ramifications. Sisto reports on such phenomena as the Tweet Hereafter, a website that collects people's last tweets; the intimacy of sending a WhatsApp message to

someone who has died; and digital cremation, the deactivation of a dead person's account. Because we can mingle with the dead online almost as we mingle with the living, he warns, we may find it difficult to distinguish communication at a distance from communication with the dead. The digital afterlife has restored the communal dimension of death, rescuing both mourners and the mourned from social isolation. A society willing to engage with death and mortality, Sisto argues, is a more balanced and mature society. *Museum Skepticism* - David Carrier 2006-05-31

Metamorphoses - Ovid 1960

Ovid's magnificent panorama of the Greek and Roman myths--presented by a noted poet, scholar, and critic. Prized through the ages for its splendor and its savage, sophisticated wit, *The Metamorphoses* is a masterpiece of Western culture--the first attempt to link all the Greek myths, before and after Homer, in a cohesive whole, to the Roman myths of Ovid's day. Horace Gregory, in this modern translation, turns his own poetic gifts toward a deft reconstruction of Ovid's ancient themes, using contemporary idiom to bring to today's reader all the ageless drama and psychological truths vividly intact. *Arturo's Island* - Elsa Morante 1959

Cyber Law in Italy - Giovanni Ziccardi
2020-01-14

Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this practical guide to cyber law - the law affecting information and communication technology (ICT)

- in Italy covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and

related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

I riflessi di Black Mirror - Mario Tirino
2020-03-27

"Black Mirror" è una serie televisiva antologica in grado di interrogare in maniera radicale il senso del rapporto tra l'uomo, la società e le tecnologie nel tempo presente. Questo volume si propone quale glossario a più voci, con l'obiettivo di interpretare, nelle trame dell'angosciante distopia messa in scena, il

mutamento delle culture, dei media e degli immaginari nella società digitale globalizzata in cui viviamo.

Born Liquid - Zygmunt Bauman 2018-11-26

Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body - tattoos, cosmetic surgery, hipsters - aggression, bullying, the Internet, online dating,

gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

Blockchain. Guida all'ecosistema. Tecnologia, business, società - Nicola Attico 2018-12-11
"L'impatto economico e sociale di una tecnologia rivoluzionaria" Oltre Bitcoin e al di là del mondo delle cripto valute, la blockchain è una tecnologia che sta rivelando sorprendenti capacità trasformative in molteplici ambiti, con un potenziale cambio di paradigma sul piano sociale oltre che economico. In queste pagine si offre al lettore una rappresentazione dell'intero ecosistema blockchain utilizzando un punto di vista concreto, analizzandone le applicazioni e raccontando casi reali di organizzazioni, aziende e comunità che stanno oggi lavorando intensamente alle sue realizzazioni pratiche. Per comprendere un ecosistema così mutevole e

frammentato e non perdersi nella sua complessità, diviene importante mantenere un fil rouge: l'impatto sulla vita di ognuno di noi. Una nuova piattaforma finanziaria, un nuovo modo di vendere e distribuire beni e servizi, nuovi media e social media, un nuovo mercato per l'arte, una nuova identità digitale e una nuova governance (anche politica): questi sono gli ambiti che il libro analizza in dettaglio. Infine, come chiave di lettura trasversale alle varie applicazioni, si considera l'impatto della blockchain sul mondo del lavoro sia per le aziende tradizionali che cercano di incorporare la tecnologia nel proprio modello di business sia per le organizzazioni e comunità native blockchain, che si stanno affacciando oggi sul mercato.

The Path to the Spiders' Nests - Italo Calvino
2013-04-04

Pin is a bawdy, adolescent cobbler's assistant, both arrogant and insecure who - while the Second World War rages - sings songs and tells jokes to endear himself to the grown-ups of his

town - particularly jokes about his sister, who they all know as the town's 'mattress'. Among those his sister sleeps with is a German sailor, and Pin dares to steal his pistol, hiding it among the spiders' nests in an act of rebellion that entangles him in the adults' war.

The IT Revolution and its Impact on State, Constitutionalism and Public Law - Martin Below
2021-02-25

What is the future of constitutionalism, state and law in the new technological age? This edited collection explores the different aspects of the impact of information and technology revolution on state, constitutionalism and public law. Leading European scholars in the fields of constitutional, administrative, financial and EU law provide answers to fascinating conceptual questions including: - What are the challenges of information and technological revolution to

sovereignty? - How will information and technology revolution impact democracy and the public sphere? - What are the disruptive effects of social media platforms on democratic will-formation processes and how can we regulate the democratic process in the digital age? - What are the main challenges to courts and administrations in the algorithmic society? - What is the impact of artificial intelligence on administrative law and social and health services? - What is the impact of information and technology revolution on data protection, privacy and human rights?

Online Political Hate Speech in Europe -

Giovanni Ziccardi 2020-08-28

Thought-provoking and timely, this book addresses the increasingly widespread issue of online political hatred in Europe. Taking an interdisciplinary approach, it examines both the contributions of new technologies, in particular social networks, to the rise of this phenomenon, and the legal and political contexts in which it is taking place. Giovanni Ziccardi also evaluates possible remedies for the situation, including both legal and technological solutions, and outlines the potential for a unified European framework to counter the spread of hatred

online.

Black Mirror - Fausto Lammoglia

2019-03-14T00:00:00+01:00

L'espressione black mirror allude a ogni strumento tecnologico che, spento o inattivo, si trasforma in un'oscura superficie riflettente. I black mirrors sono parte integrante della nostra quotidianità, in una maniera così pervasiva da rendere difficile, soprattutto per i cosiddetti nativi digitali, una riflessione sulle implicazioni e le conseguenze di questo dominio. In questo contesto, la serie Black Mirror costituisce un'autentica narrazione filosofica che si impone ai propri spettatori come una domanda di senso: nella relazione con la tecnologia, chi è il vero strumento? Siamo noi a incidere sulla realtà, utilizzando gli schermi, o sono loro ad aver strumentalizzato la nostra realtà, a partire da quella identitaria, passando per le relazioni, fino a giungere al grande agone della politica? Il filo di queste riflessioni ci trae in un labirinto filosofico che scava dentro di noi, svelando,

dietro gli spettatori, gli umani che non possono più fare a meno dei loro specchi neri.

Remember Me - Davide Sisto 2021-04-13

As the end of December draws near, Facebook routinely sends users a short video entitled 'Your Year on Facebook'. It lasts about a minute and brings together the images and posts that received the highest number of comments and likes over the last year. The video is rounded off with a message from Facebook that reads: 'Sometimes, looking back helps us remember what matters most. Thanks for being here.' It is this 'looking back', increasingly the focus of social networks, that is the inspiration behind Davide Sisto's brilliant reflection on how our relationship with remembering and forgetting is changing in the digital era. The past does not really exist: it is only a story we tell ourselves. But what happens when we tell this story not only to ourselves but also to our followers, when it is recorded not only on our social media pages but also on the pages of hundreds or thousands

of others, making it something that can be viewed and referenced forever? Social media networks are becoming vast digital archives in which the past merges seamlessly with the present, slowly erasing our capacity to forget. And yet at the same time, our memory is being outsourced to systems that we don't control and that could become obsolete at any time, cutting us off from our memories and risking total oblivion. This timely and thoughtful reflection on memory and forgetting in the digital age will be of interest to students and scholars in media studies and to anyone concerned with the ways our social and personal lives are changing in a world increasingly shaped by social media and the internet.

Sulle soglie dell'irrapresentabile - AA. VV.
2020-10-01T00:00:00+02:00

Si presentano qui gli atti del convegno tenutosi al Collegio Ghislieri di Pavia nel maggio 2019. Otto studiosi si confrontano sul tema del tabù e dell'osceno nell'immaginario artistico fra

letteratura, teatro, cinema e nuovi media. Dal medioevo romanzo al muto, dal mondo dello spettacolo a Facebook, la messa in scena dei grandi contenuti paradossalmente "irrapresentabili" (il sesso, il sacro e la morte) costituisce una questione di interesse dal punto di vista storico, culturale ma anche squisitamente estetico. Un approccio programmaticamente eclettico e diacronico porta alla luce non solo l'evoluzione di tali concetti nel tempo, ma anche le diverse sfaccettature di volta in volta implicate nell'uso che ne fanno gli artisti e nella ricezione da parte del pubblico. Alla prospettiva degli studiosi si unisce anche quella di due autori contemporanei, Patrizia Valduga e Walter Siti, tra le personalità più rilevanti del panorama italiano ma anche tra le più controverse per la loro poetica.

Data Protection and Privacy - Ronald Leenes
2018-12-13

The subjects of Privacy and Data Protection are more relevant than ever, and especially since 25 May 2018, when the European General Data Protection Regulation became enforceable. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the eleventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2018, held in Brussels in January 2018. The book explores the following topics: biometrics and data protection in criminal justice processing, privacy, discrimination and platforms for men who have

sex with men, mitigation through data protection instruments of unfair inequalities as a result of machine learning, privacy and human-robot interaction in robotized healthcare, privacy-by-design, personal data protection of deceased data subjects, large-scale face databases and the GDPR, the new Europol regulation, rethinking trust in the Internet of Things, fines under the GDPR, data analytics and the GDPR, and the essence of the right to the protection of personal data. This interdisciplinary book was written while the reality of the General Data Protection Regulation 2016/679 was becoming clear. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in computers, privacy and data protection.

Betty - Tiffany McDaniel 2021-07-13

A stunning, lyrical novel set in the rolling foothills of the Appalachians about a young girl and the family truths that will haunt her for the rest of her life. "A girl comes of age against the

knife.” So begins the story of Betty Carpenter. Born in a bathtub in 1954 to a white mother and a Cherokee father, Betty is the sixth of eight siblings. The world they inhabit in the rural town of Breathed, Ohio, is one of poverty and violence—both from outside the family and, devastatingly, from within. But despite the hardships she faces, Betty is resilient. Her curiosity about the natural world, her fierce love for her sisters, and her father’s brilliant stories are kindling for the fire of her own imagination, and in the face of all to which she bears witness, Betty discovers an escape: she begins to write. Inspired by generations of her family, Tiffany McDaniel sets out to free the past by delivering this heartbreaking yet magical story—a remarkable novel that establishes her as one of the most important voices in American fiction. Novella Campagnoli 2020-11-01

I media digitali e i social network, in questi anni, hanno concorso a intensificare le comunicazioni. Per un verso, queste piattaforme sembrano realizzare una liberalizzazione dei processi informativi, per l’altro, possono diventare l’habitat più congeniale alla diffusione delle fake news e/o fungere da volano all’hate speech. Coniugando l’analisi teorico-giuridica con la disamina della normativa, il volume costituisce un utile strumento per chiunque voglia approcciarsi allo studio di tali fenomeni.

INDELEBILI TRACCE - Antonella Napoli 2017-11-29

La relazione dell'uomo con la morte è stata sempre intrecciata con l'immaginario collettivo, con le forme di riappropriazione e rielaborazione simbolica dell'indicibile. I media rappresentano in tale ambito uno spazio privilegiato in cui osservare la simbolizzazione della morte. Si tratta di una zona liminale in cui vita e morte si affrontano, confrontano e fondono. A partire da

queste riflessioni e dalle suggestioni emerse nel corso di anni di ricerca, Antonella Napoli e Alessandra Santoro hanno raccolto in questo volume i contributi di alcuni studiosi particolarmente sensibili al tema della rappresentazione della morte nella cultura contemporanea

You Will Not Have My Hate - Antoine Leiris
2017-10-03

INTERNATIONAL BESTSELLER - "On Friday night you stole the life of an exceptional person, the love of my life, the mother of my son, but you will not have my hate." On November 13, 2015, Antoine Leiris's wife, H el ene Muyal-Leiris, was killed by terrorists while attending a rock concert at the Bataclan Theater in Paris, in the deadliest attack on France since World War II. Three days later, Leiris wrote an open letter addressed directly to his wife's killers, which he posted on Facebook. He refused to be cowed or to let his seventeen-month-old son's life be defined by H el ene's murder. He refused to let

the killers have their way: "For as long as he lives, this little boy will insult you with his happiness and freedom." Instantly, that short Facebook post caught fire, and was reported on by newspapers and television stations all over the world. In his determination to honor the memory of his wife, he became an international hero to everyone searching desperately for a way to deal with the horror of the Paris attacks and the grim shadow cast today by the threat of terrorism. Now Leiris tells the full story of his grief and struggle. *You Will Not Have My Hate* is a remarkable, heartbreaking, and, indeed, beautiful memoir of how he and his baby son, Melvil, endured in the days and weeks after H el ene's murder. With absolute emotional courage and openness, he somehow finds a way to answer that impossible question: how can I go on? He visits H el ene's body at the morgue, has to tell Melvil that Mommy will not be coming home, and buries the woman he had planned to spend the rest of his life with. Leiris's grief is

terrible, but his love for his family is indomitable. This is the rare and unforgettable testimony of a survivor, and a universal message of hope and resilience. Leiris confronts an incomprehensible pain with a humbling generosity and grandeur of spirit. He is a guiding star for us all in these perilous times. His message—hate will be vanquished by love—is eternal.

In Cold Blood - Truman Capote 2013-02-19
Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first

published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the “new journalism.” Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. “I thought he was a very nice gentleman,” he says of Herb Clutter. “Soft-spoken. I thought so right up to the moment I cut his throat.” Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.
