Dust Bowls of Empire - Hannah Holleman 2018-11-20

A profound reinterpretation of both the Dust Bowl on the U.S. southern plains and its relevance for today The 1930s witnessed a harrowing social and ecological disaster, defined by the severe nexus of drought, erosion, and economic depression that ravaged the U.S. southern plains. Known as the Dust Bowl, this crisis has become a major referent of the climate change era, and has long served as a warning of the dire consequences of unchecked environmental despoliation. Through innovative research and a fresh theoretical lens, Hannah Holleman reexamines the global socioecological and economic forces of settler colonialism and imperialism precipitating this disaster, explaining critical antecedents to the acceleration of ecological degradation in our time. Holleman draws lessons from this period that point a way forward for environmental politics as we confront the growing global crises of climate change, freshwater scarcity, extreme energy, and soil degradation.

Picturing a Nation: The Great Depression's Finest Photographers Introduce America to Itself - Martin W. Sandler 2021-11-23

A National Book Award winner mines photographic gold to show—and tell—the story of the Great Depression. In an exquisitely curated volume of 140 full-color and black-and-white photographs, Martin W. Sandler unpacks the United States Farm Security Administration's sweeping visual record of the Great Depression. In 1935, with the nation bent under unprecedented unemployment and economic hardship, the FSA sent ten photographers, including Walker Evans, Dorothea Lange, and Gordon Parks, on the road trip of a lifetime. The images they logged revealed the daily lives of Southern sharecroppers, Dust Bowl farmers in the Midwest, Western migrant workers, and families scraping by in Northeast cities. Using their cameras as weapons against poverty and racism—and in service of hope, courage, and human dignity—these talented photographers created not only a collective work of art, but a national treasure. Grouped into four geographical regions and locked in focus by rich historical commentary, these images—many now iconic—are history at its most powerful and immediate. Extensive back matter includes photographer profiles and a bibliography.

The Dust Bowl Through the Lens - Martin W. Sandler 2009-10-13

The Dust Bowl was a time of hardship and disaster. The worst ecological disaster in our nation's history turned more than 100 million acres of fertile land almost completely to dust. Hundreds of thousands of people were forced to seek new homes and opportunities thousands of miles away, while millions more chose to stay and battle nature to save their land. These terrible repercussions from the Dust Bowl contributed to the Great Depression, which impacted the entire country. FDR's New Deal army of photographers took to the roads during this national crisis to document the human struggle of the proud people of the plains. Their pictures spoke a thousand words, and a new form of storytelling—photojournalism—was born. These talented cameramen and women used photographs to inform the rest of the nation and bring about much-needed change. With the help of iconic images from Dorothea Lange, Walker Evans, Arthur Rothstein, and many more, Martin W. Sandler tells the story of this man-made natural disaster and these troubling economic times, ultimately showing how a nation can endure its darkest days through extraordinary courage and human spirit.

The Four Winds - Kristin Hannah 2021-02-02

"The Bestselling Hardcover Novel of the Year."--Publishers Weekly From the number-one bestselling author of *The Nightingale* and *The Great Alone* comes a powerful American epic about love and heroism and hope, set during the Great Depression, a time when the country was in crisis and at war with itself, when millions were out of work and even the land seemed to have turned against them. "My land tells its story if you listen. The story of our family." Texas, 1921. A time of abundance. The Great War is over, the bounty of the land is plentiful, and America is on the brink of a new and optimistic era. But for Elsa Wolcott, deemed too old to marry in a time when marriage is a woman's only option, the future seems bleak. Until the night she meets Rafe Martinelli and decides to change the direction of her life. With her reputation in ruin, there is only one respectable choice: marriage to a man she barely knows. By 1934, the world has changed; millions are out of work and drought has devastated the Great Plains. Farmers are fighting to keep their land and their livelihoods as crops fail and water dries up and the earth cracks open. Dust storms roll relentlessly

across the plains. Everything on the Martinelli farm is dying, including Elsa's tenuous marriage; each day is a desperate battle against nature and a fight to keep her children alive. In this uncertain and perilous time, Elsa—like so many of her neighbors—must make an agonizing choice: fight for the land she loves or leave it behind and go west, to California, in search of a better life for her family. *The Four Winds* is a rich, sweeping novel that stunningly brings to life the Great Depression and the people who lived through it—the harsh realities that divided us as a nation and the enduring battle between the haves and the have-nots. A testament to hope, resilience, and the strength of the human spirit to survive adversity, *The Four Winds* is an indelible portrait of America and the American dream, as seen through the eyes of one indomitable woman whose courage and sacrifice will come to define a generation.

Overcoming Textbook Fatigue - ReLeah Cossett Lent 2012-11-14

Overcoming textbook fatigue means reaching within and beyond the textbook to access all sorts of 21st century tools, the same ones that students will be using in college, careers, and daily life. -ReLeah Cossett Lent Textbook fatigue is a malaise that negatively affects teachers and students. It is the result of scripted programs and step-by-step teachers' manuals that dismiss the individualization of schools, teachers, and students. Because textbooks provide a one-way distillation of information aimed at a broad, generic population, they offer little to engage or pique the interest of the 30 individuals in a classroom. In this example-packed book, ReLeah Cossett Lent shows how educators can reclaim the curriculum by shifting the textbook from sole source to resource. She also gives advice on using Common Core State Standards throughout the school and in the classroom. Teachers, coaches, curriculum coordinators, and administrators will discover proven techniques that will revitalize teaching and learning in every content area: *Discipline-specific writing activities that extend and deepen lessons. *Strategies for using content-specific materials that encourage students to "read to learn." *Effective vocabulary strategies that work throughout the curriculum. *Methods to tap into and build background knowledge. *Fun activities that use relevant life skills to involve and engage students in learning. Lent highlights what's to be gained from loosening the grip on textbooks and provides practical guidance on how to accomplish that goal, using real-life examples from schools that have made the change. *Overcoming Textbook Fatigue* is brimming with ideas to restore the joy of teaching and learning and, in the process, boost student achievement. Lent is a 20-year teaching veteran, an award-winning author, and an experienced international consultant specializing in literacy and communities of practice.

Prelude to the Dust Bowl - Kevin Z. Sweeney 2022-10-11

Before the drought of the early twenty-first century, the dry benchmark in the American plains was the Dust Bowl of the 1930s. But in this eye-opening work, Kevin Z. Sweeney reveals that the Dust Bowl was only one cycle in a series of droughts on the U.S. southern plains. Reinterpreting our nation's nineteenth-century history through paleoclimatological data and firsthand accounts of four dry periods in the 1800s, *Prelude to the Dust Bowl* demonstrates the dramatic and little-known role drought played in settlement, migration, and war on the plains. Stephen H. Long's famed military expedition coincided with the drought of the 1820s, which prompted Long to label the southern plains a "Great American Desert"--a destination many Anglo-Americans thought ideal for removing Southeastern Indian tribes to in the 1830s. The second dry trend, from 1854 to 1865, drove bison herds northeastward, fomenting tribal warfare, and deprived Civil War armies in Indian Territory of vital commissary. In the late 1880s and mid-1890s, two more periods of drought triggered massive outmigration from the southern plains as well as appeals from farmers and congressmen for federal famine relief, pleas quickly denied by President Grover Cleveland. Sweeney's interpretation of familiar events through the lens of drought lays the groundwork for understanding why the U.S. government's reaction to the Dust Bowl of the 1930s was such a radical departure from previous federal responses. *Prelude to the Dust Bowl* provides new insights into pivotal moments in the settlement of the southern plains and stands as a timely reminder that drought, as part of a natural climatic cycle, will continue to figure in the unfolding history of this region.

Apollo 8 - Martin W. Sandler 2018-10-09

A nation in need of hope, the most powerful rocket ever launched, and the first three men to break the bounds of Earth: Apollo 8 was headed to the moon. In 1957, when the USSR launched Sputnik I, the first man-made satellite to orbit Earth, America's rival in the Cold War claimed victory on a new frontier. The Space Race had begun, and the United States was losing. Closer to home, a decade of turbulence would soon have Americans reeling, with the year 1968 alone seeing the assassinations of Martin Luther King Jr. and Robert F. Kennedy as well as many violent clashes between police and protesters. Americans desperately needed something good to believe in, and NASA's mission to orbit Earth in Apollo 8 and test a lunar landing module was being planned for the end of the year. But with four months to go and the module behind schedule, the CIA discovered that the USSR was preparing to send its own mission around the moon -- another crucial victory in the Space Race -- and it was clearly time for a change of plan. In a volume full of astonishing full-color photographs, including the iconic Earthrise photo, Martin W. Sandler unfolds an incredible chapter in U.S. history: Apollo 8 wouldn't just orbit Earth, it would take American astronauts to see the dark side of the moon.

Island of Hope - Martin W. Sandler 2004

The moving story of immigration to America as told through the passionate voices and stories of those who passed through Ellis Island. On January 1, 1892, a fifteen-year-old Irish girl named Annie Moore made history when she became the first person to be processed at a new immigrant station at Ellis Island in New York Harbor. In the next 62 years more than 12 million other immigrants would follow. Many of these newcomers would be "pushed" into America--fleeing religious persecution, political oppression, or economic hardships in their native lands. Millions of others would be "pulled" into the United States by the promise of new opportunities. Once they arrived at Ellis, they were put through the traumatic experience

A Bit about This and That - Terry Dashner 2018-11-03

The two generations before me knew nothing about prosperity seminars and self-help books but yet they survived a "Dust Bowl," the "Dirty Thirties," two world wars, the Great Depression, and abject poverty. To America and the world at large they are remembered for their sacrifices, steadfastness, and survivability. But to me they were my parents and grandparents. To them I owe a great debt of gratitude because they taught me many things about commitment, community, and caring for my fellow man. Through the lens they gave me, I have watched and learned about the world around me. This book is about having lived just long enough to learn a bit about this and that. It's about relationships and family. For example, in every relationship where vows are exchanged someone has to take on the role of grown up to keep those vows intact. It's about downturn seasons and surviving life's unanticipated events. It's about listening to the inner voice that's never audible but always present. The book has one objective: To encourage the reader to stay the course. If past generations endured the gates of hell, how much more should we as a generation that has been given more than any other in the history of mankind.

Race Through the Skies - Martin W. Sandler 2020-07-28

From National Book Award winner Martin W. Sandler, a fascinating look at the week that brought aviation

fever to the world In 1903, the Wright brothers made three brief flights, and no one was there to watch them. Six years later, Wilbur Wright traveled to Europe to evangelize about aviation and raise money for patents--and the world got aviation fever. That summer, a group of champagne companies organized the

first ever international air meet in Rheims, France. They knew they could throw a great party and sell a lot of champagne. They didn't know that this single week would change the course of aviation history. Through remarkable photographs, firsthand accounts, and lively narrative, Marty Sandler tells the story of how the Grande Semaine d'Aviation de la Champagne marked the public introduction to flight.
