Greening the Economy - John Magne Skjelvik 2011-06
After the recent financial and economic crisis, greening the economy has become a major focus for international and national discussions: How to combine forceful and effective action to meet climate change and other environmental challenges with stronger and more sustainable economic development, in both developed and developing countries. This synthesis report on the Nordic countries' environmental policy experiences, focuses on the use of economic instruments and how this policy has contributed to the integration of environmental concerns into economic growth and development policies. The report demonstrates that the Nordic countries have been successful in achieving substantial reductions in several major pollutants and clear improvements in local and regional environmental quality, while maintaining an internationally respectable rate of economic growth. This decoupling of economic development from growth in emissions has been achieved through a range of policy instruments, with a strong and increasing element of economic, market-based instruments. The challenge, and the opportunity, for the Nordic countries is to strengthen and deepen such policies, with even more effective design of and combination of policy instruments, to deal with new and remaining threats to the local, national and international environment.

Advances in Invertebrates and Fish Telemetry - Jean Paul Lagardere 2012-12-06
This volume provides a selection of the most significant papers presented at the Second Conference on Fish Telemetry in Europe in La Rochelle, France, in April 1997. The conference was attended by 100 scientists

from 18 countries. The contributions are grouped under the following headings: Methodology and New Developments, Tagging Procedures, Behavioural and Physiological Ecology, Fish Migration, Stock Management and Conservation. Particular emphasis was put on tag miniaturisation, multiple functions and sampling strategies. Papers concerned the effects of tags on fish for consolidating behavioural or original physiological investigations noticeably more open to the marine environment. Methods were essentially applied to study the relationships between fish and their natural environment. Besides providing up-to-date information on the state of fish telemetry, the book illustrates the increase in spatial and temporal scales and the number of tracked fish which gives a statistical basis for field study in behavioural ecology.
Teen Little Black Book #sadfishing Talk to Kids - Patrice M Foster 2020-02-15
Teens over-shares a lot about themselves on social media more so than we think. Likes are powerful and for a teen this gives a sense of an acceptance. They feel like someone care and is finally listening. It's not easy for parents to monitor their child ever moves. How hard it is to be a teenager. Dealing with physical changes, peer pressure, bullying, uncertainty can take its toll on the youth. The increased role that the internet plays in teen's lives, doesn't make it any easier.
The Influence of Computers, the Internet and Computer-Mediated Communication on Everyday English - Sandra Greiffenstern 2010
Computers and the Internet gave rise to the emergence of computer-mediated communication (CMC). The Influence of Computers, the Internet and Computer-Mediated Communication on Everyday English focuses on the use of English in connection with computers and the Internet and on its influences on everyday English by analysing the dispersal of new meanings of words, neologisms, features of CMC and new metaphors. The intention is to show the computer- and Internet-related impact on the English language from several perspectives and to take several ways into consideration in which the Internet and CMC are changing language use and to evaluate this influence -- at least as far as this is possible.
Creativity at Work - Jeff DeGraff 2002-10-10
Although many leaders acknowledge and invest in creativity, we seldom see it hold a credible place in the business development process. Creativity at Work takes a practical approach to creativity, showing how to select practices to produce results and add value. The authors explain how to: * Understand the creative preferences of organizations, departments, work groups, and individuals * Identify and compare the different creativity profiles that describe specific purposes, practices, and people * Produce the desired results by developing the right practices * Blend creativity practices to meet the complex needs that characterize most work situations o Develop required creative abilities in a team and in oneself
The Use of Economic Instruments in Nordic Environmental Policy 2006-2009 - Henrik Lindhjem 2009
The Nordic Council of Ministers publishes regular overview reports on the use of economic instruments in Nordic environmental policy. In this report, Part I presents an overview of the use of economic instruments with the main focus on changes during the years 2006 - 2009. Part II gives a brief overview of mixes of policy instruments (also other than economic instruments) and presents two case studies. There are generally few changes in the use of economic instruments since 2006, except for the introduction of the emissions trading system, EU ETS, and changes in vehicle registration tax systems to become more based on specific fuel use or CO_2 emissions. In general, the tax systems could be made more effective and efficient by treating different sectors and fuels more equally.

Geoinformatics for Marine and Coastal Management - Darius Bartlett 2016-12-19
Geoinformatics for Marine and Coastal Management provides a timely and valuable assessment of the current state of the art geoinformatics tools and methods for the management of marine systems. This book focuses on the cutting-edge coverage of a wide spectrum of activities and topics such as GIS-based application of drainage basin analysis, contribution of ontology to marine management, geoinformatics in relation to fisheries management, hydrography, indigenous knowledge systems, and marine law enforcement. The authors present a comprehensive overview of the field of Geoinformatic Applications in Marine Management covering key issues and debates with specific case studies illustrating real-world applications of the GIS technology. This "box of tools" serves as a long-term resource for coastal zone managers, professionals, practitioners, and students alike on the management of oceans and the coastal fringe, promoting the approach of allowing sustainable and integrated use of oceans to maximize opportunities while keeping risks and hazards to a minimum.
The British National Bibliography - Arthur James Wells 2005

Technobiophilia - Sue Thomas 2013-09-26
Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In Technobiophilia: Nature and Cyberspace, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. Technobiophilia: Nature and Cyberspace offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

Hunting Fish - Jay Greenspan 2007-04-01
If you want to prove you're a good poker player, you don't have to battle against the best. Nobody really cares if you ever bluffed Phil Ivey or got Daniel Negreanu to make a bad call. You're at the table for the money, not stories of conquest. A disciplined player, one who's playing for the right reasons, would rather sit with the worst, those he's sure to outplay. He's looking for donkeys and donors. He's hunting fish. In Hunting Fish author Jay Greenspan sets out on a cross-country drive---from Connecticut to Los Angeles---looking for players he can outclass. In casinos, underground clubs, and home games throughout the country,

Jay shared tables with the most inept gamblers America has to offer. In South Carolina he wiped out some racial-epithet-spewing good ole boys; in Houston he fleeced the country club set; and in Vegas he happily pounded drunken tourists. Hunting Fish is, however, not merely the story of a hustler's travels. In addition to fleecing suckers, Jay was convinced he could beat the very best and make it as a full-time pro. This trip gave him the opportunity to build his bankroll to the point where he could test his mettle in high-stakes games when he reached Los Angeles. Although to play in the high-limit rooms at Commerce Casino he needed a steady nerve---and a fatter bankroll. In his three months on the road, he needed to pad his roll with an additional twenty thousand dollars. That's a lot of fish to hunt.

A Hacker, I Am - Craig Ford 2019-09-07
This book is not your normal cybersecurity book, it's not meant to be read from front to back chapter by chapter, you open it up and pick which chapter piques your interest the most and read that one first. Then choose your next one and read that and continue the process until you have finally read all of them. You may have enjoyed them enough to go back and read your favourites again or you may prefer the last two fantasy chapters at the end of the book.These were created to introduce you to the future hacker fantasy series that is currently being written and give you my readers a bit of a fun finish to "A Hacker, I Am". By all means though if you want to stick to the old fashioned method of reading a book, knock yourself out and read it from the front to the back, hey you bought the book you should be able to read it however you want too.This book is a collation of previous work, rewritten and adapted for this book. I have then written a lot of new content just for the book, including those fantasy book teasers which I hope you all enjoy. The book as you would have probably guessed it by now is all about Cyber Security but it's not written to be overly technical, it's written so that it can be understood by anyone who wants to learn more about how to better protect themselves.It covers many topics in cybersecurity including IoT, autonomous cars, hackers and many more that I have an opinion on. This book will be great at helping introduce individuals to the area and help them get a better understanding of what to look out for, what problems we are all going to face in the future but also have a bit of fun while we are at it. Or if you are already in the industry then it will be still an entertaining read that can help give you a different perspective on a few things.

Recreation, Event, and Tourism Businesses - Robert E. Pfister 2009
"Recreation, Event, and Tourism Businesses: Start-Up and Sustainable Operations reveals the keys to business success in the commercial recreation, event, and tourism sector. Until now, students, professors, and professionals interested in this growing industry have been limited to general business or basic recreation texts. In this book the authors have combined their expertise as both business owners and professors to offer a comprehensive and industry-specific course textbook and step-by-step guide for business start-up." "Recreation, Event, and Tourism

Businesses presents new professionals and potential business owners with clear, easy-to-read directions for developing and writing a business plan. The book's business profiles and case studies serve as examples to follow when working on the plan and help readers gain insight into how businesses are planned, started, and funded. It also lays out important strategies for starting a business and shares best practices based on successful recreation businesses."--BOOK JACKET.

Fishing for Praise - Paul Poulton 2008-01-01
Praise is a hidden doorway in the world that enables us to see things outside of the universe. But it's a doorway that is easily missed; people walk past it, thinking nothing of it, not realizing the value of it. But God has placed it there for us to walk through and see where he lives. This look at praise takes some surprising turns and gives us insight into heaven, hell, the world we live in, and our own souls. People praise all sorts of things. I find myself praising my wife--or praising children, footballers, or chefs. I even praise my dog. When we praise God, it is a natural extension of what we normally do every day. And praise isn't one way, because God praises us, too. When we are patient, praise will come our way from the most unexpected source, and it will come just when our enemies have turned up to see it. God intervenes on our behalf when we leave the task of being praised to him. Contrary to popular belief, praise comes to those who wait. We don't have to fish for it.
