My Revision Notes: OCR AS/A-level History: Britain 1930-1997 - Mike Wells 2017-05-02

Target success in OCR AS/A-level History with this proven formula for effective, structured revision; key content coverage is combined with exam preparation activities and exam-style questions to create a revision guide that students can rely on to review, strengthen and test their knowledge. - Enables students to plan and manage a successful revision programme using the topic-by-topic planner - Consolidates knowledge with clear and focused content coverage, organised into easy-to-revise chunks - Encourages active revision by closely combining historical content with related activities - Helps students build, practise and enhance their exam skills as they progress through activities set at three different levels - Improves exam technique through exam-style questions with sample answers and commentary from expert authors and teachers - Boosts historical knowledge with a useful glossary and timeline

Economy and Society in 19th Century Britain - Richard Tames 2013-11-05

First Published in 2005. Routledge is an imprint of Taylor & Francis, an informa company.

The Cambridge Illustrated History of the British Empire - P. J. Marshall 2001-08-02

A superbly illustrated and richly informative history of the British empire.

Society and Economy in Modern Britain 1700-1850 - Richard Brown 2002-11-01

For both contemporaries and later historians the Industrial Revolution is viewed as a turning point' in modern British history. There is no doubt that change occurred, but what was the nature of that change and how did affect rural and urban society? Beginning with an examination of the nature of history and Britain in 1700, this volume focuses on the economic and social aspects of the Industrial Revolution. Unlike many previous textbooks on the same period, it emphasizes British history, and deals with developments in Wales, Scotland, and Ireland in their own right. It is the emphasis on the diversity, not the uniformity of experience, on continuities as well as change in this crucial period of development, which makes this volume distinctive. In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations.

British Civilization - John Oakland 2013-10-31

British Civilization: A Student's Dictionary is an invaluable reference guide to the British way of life. It explains the often puzzling and confusing terms and phrases used routinely in Britain and by British people. This easy-reference alphabetical guide sheds light on a comprehensive selection of words, phrases, organizations and institutions. All these are fundamental features of British civilization and society, and include aspects of: * politics and government * the Law, economics and industry * education * the media * religion and social welfare * health and housing * leisure and transport.

Access to History: Britain and the American Colonies 1740-89 - Alan Farmer 2008-08-29

The Access to History series is the most popular and trusted series for AS and A level history students. This title is written specifically for the 2008 AS specifications for AQA and Edexcel. It investigates the events which led to the British domination of the North American colonies during its conflict with France, and the resulting tensions which followed this success. It goes on to examine the British policies towards the colonies and how these laid the path to American independence and ultimately, the Constitution. The extent to which a revolution occurred is analysed and the narrative concludes by looking at the impact of this independence on Britain and America.

A History of Water in Modern England and Wales - John Hassan 1998

Examines the changing way in which water has been used in England and Wales since the industrial revolution, through the Victorian period and up to the present day.

Academic Cooperation with Africa - Eike W. Schamp 2008

The British National Bibliography - Arthur James Wells 2009

Key Controversies in European Integration - Hubert Zimmermann 2021-03-03

Is the EU a success or a failure? Should It Stay or Should It Go? Britain and the EU The Big Waste or Essential to Feed Europe? The Common Agricultural Policy Observers of the European Union could be forgiven in thinking that since its inception the EU project has been under threat from near constant crises. In recent years, controversial issues such as EU enlargement, the fallout from the Eurozone crisis, migration policies, Brexit and the Corona pandemic have tested the EU to its limits and divided public opinion in the process. The major third edition of this comprehensive textbook on the EU seeks to introduce the integration project by looking at the thorny debates politicians, European citizens and the media contend with on a daily basis. Well known for its unique and pedagogically-innovative key debates format, the editors have invited top names in the field to contribute a stirring contribution either 'for' or 'against' each of the toughest political questions the EU faces. In doing so, not only does it offer a broad introduction to all the key concerns of the Union, but it does so in a way that is contemporary, engaging and designed to spark controversy. New to this Edition: - All chapters fully revised and updated New chapter on the transatlantic partnership - All chapters now with key takeaway points - Across all controversies, more inclusion of mainstream gender and feminist approaches

Making Identity Count - Ted Hopf 2016-04-06

Constructivism, despite being one of the three main streams of IR theory, along with realism and liberalism, is rarely, if ever, tested in large-n quantitative work. Constructivists almost unanimously eschew quantitative approaches, assuming that variables of interest to constructivists, defy quantification. Quantitative scholars mostly ignore constructivist variables as too fuzzy and vague. And the rare instances in which quantitative scholars have operationalized identity as a variable, they have unfortunately realized all the constructivists' worst fears about reducing national identity to a single measure, such as language, religion, or ethnicity, thereby violating one of the foundational assumptions of constructivism: intersubjectivity. Making Identity Count presents a new method for the recovery of national identity, applies the method in 9 country cases, and draws conclusions from the empirical evidence for hegemonic transitions and a variety of quantitative theories of identity. Ted Hopf and Bentley B. Allan make the constructivist variable of national identity a valid measure that can be used by large-n International Relations scholars in a variety of ways. They lay out what is wrong with how identity has been conceptualized, operationalized and measured in quantitative IR so far and specify a methodological approach that allows scholars to recover the predominant national identities of states in a more valid and systematic fashion. The book includes "national identity reports" on China, the US, UK, Germany, France, Brazil, Japan, and India to both test the authors' method and demonstrate the promise of the approach.

Hopf and Allan use these data to test a constructivist hypothesis about the future of Western neoliberal democratic hegemony. Finally, the book concludes with an assessment of the method, including areas of possible improvement, as well as a description of what an intersubjective national identity data base of great powers from 1810-2010 could mean for IR scholarship.

Programmed Inequality - Mar Hicks 2018-02-23

This “sobering tale of the real consequences of gender bias” explores how Britain lost its early dominance in computing by systematically discriminating against its most qualified workers: women (Harvard Magazine) In 1944, Britain led the world in electronic computing. By 1974, the British computer industry was all but extinct. What happened in the intervening thirty years holds lessons for all postindustrial superpowers. As Britain struggled to use technology to retain its global power, the nation’s inability to manage its technical labor force hobbled its transition into the information age. In *Programmed Inequality*, Mar Hicks explores the story of labor feminization and gendered technocracy that undercut British efforts to computerize. That failure sprang from the government’s systematic neglect of its largest trained technical workforce simply because they were women. Women were a hidden engine of growth in high technology from World War II to the 1960s. As computing experienced a gender flip, becoming male-identified in the 1960s and 1970s, labor problems grew into structural ones and gender discrimination caused the nation’s largest computer user—the civil service and sprawling public sector—to make decisions that were disastrous for the British computer industry and the nation as a whole. Drawing on recently opened government files, personal interviews, and the archives of major British computer companies, *Programmed Inequality* takes aim at the fiction of technological meritocracy. Hicks explains why, even today, possessing technical skill is not enough to ensure that women will rise to the top in science and technology fields. *Programmed Inequality* shows how the disappearance of women from the field had grave macroeconomic consequences for Britain, and why the United States risks repeating those errors in the twenty-first century.

Britain - Robert D. Pearce 1992

An account of the problems that beset Britain, from 1918 to 1939, the policies adopted to combat them and of the personalities of the leading political figures. Designed to meet the needs of A/AS-level, Higher Grade and undergraduate students, the book covers popular examination question topics.

Victorian Studies - Sharon W. Propas 2016-06-17

First published in 2006, this work is a valuable guide for the researcher in Victorian Studies. Updated to include electronic resources, this book provides guides to catalogs, archives, museums, collections and databases containing material on the Victorian period. It organises the vast array of reference sources by discipline to help researchers tailor their investigations.

Access to History: Britain 1945-2007 - Michael Lynch 2008-10-31

The Access to History series is the most popular and trusted series for AS and A level history students. This title combines all the strengths of this well-loved series with a features that allow all students access to the content and study skills needed to achieve exam success. This title is written specifically for the 2008 AS and A2 specifications for all exam boards. It charts the key changes in the social, political and cultural development of Britain across this period. It looks at key individuals throughout these years, from Churchill and Wilson to Thatcher and Blair, assessing each of their periods in office and charting the rise and fall of political consensus. Finally, in assessing the changes that have taken place, the book enables students to gain a clearer perspective on the cultural and political Britain that they live in today. Throughout the book, key dates, terms, and issues are highlighted, and historical interpretations of key debates are outlined. Summary diagrams are included to consolidate knowledge and understanding of the period, and exam-style questions and tips written by examiners for the OCR and Edexcel exam specifications provide the opportunity to develop exam skills.

The Building Society Promise - Antoninus Samy 2016

The permanent building societies of England grew from humble beginnings as a multitude of small and localized institutions in the nineteenth century to become the dominant players in the house mortgage market by the inter-war period. Throughout the nineteenth and early-twentieth centuries, the movement cultivated an image of being a champion of home ownership for the working classes, but housing historians

have questioned whether building societies really lived up to this claim. This study fills a major gap in the historiography of the movement by investigating the class profile of building society members, and how the design of different building societies affected their accessibility, efficiency, and risk-taking practices between 1880 and 1939. These themes are explored using case studies of several building societies from this period and drawing upon extensive archival records. The Building Society Promise shows that building societies did lend to working-class households before the First and Second World Wars, with some societies showing a greater commitment to working-class home ownership than others. What ultimately affected the outreach of individual societies was the quality of information they possessed, which in turn was largely determined by the types of agency networks they used to find and select borrowers. The phenomenal growth of some of these institutions in the inter-war period, however, and the ensuing competition which emerged between them, brought about profound changes in their firm structure which impaired their ability to reach out to lower-income households as efficiently as before. The findings of this research are relevant to both past and present debates about the optimal design of financial institutions in overcoming social exclusion in credit markets, and the deleterious effects that firm growth, market competition, and managerial self-interest can have on their performance and stability.

The Industrial Age - Charles More 1989-01

This survey of the British economy and industrial development from 1750-1985 begins with the move from an agricultural to an industrial economic base, and records the changes in society, transport, finance, government policy, business management and labour economics. It is designed for upper school students and undergraduates and features thematically arranged chapters which enable the reader to follow a topic through all its phases.

The Medieval Economy and Society - Michael M. Postan 1984

The Industrial Age - Charles More 1997

This is a new edition of the popular single volume survey of the British economy from the industrialisation to the present day. It contains chapters on the industrial revolution which have been revised to incorporate new thinking.

Adapting to Capitalism - Pamela Sharpe 2016-07-27

This book considers patterns of women's employment in the period 1700-1850. Focusing on the county of Essex, material on the worsted industry, agriculture, fashion trades, service, prostitution, and marriage and family life will shed light on contemporary debates in history such as the sexual division of labour, controversy over continuity or change in women's employment, the importance of ideas of 'separate spheres' and 'domestic ideology', and the overall effects of capitalism on women's employment.

Power and Political Economy from Thatcher to Blair - Robert Ledger 2021-03-05

This book investigates the policies of the Thatcher, Major and Blair governments and their approaches towards concentration of economic and political power. The 1979–2007 British governments have variously been described as liberal or, to use a political insult and a favourite academic label, neoliberal. One of the stated objectives of the Thatcher, Major and Blair governments—albeit with differing focal points—was to disperse power and to empower the individual. This was also a consistent theme of the first generation of neoliberals, who saw monopolies, vested interests and concentration more generally as the ‘great enemy of democracy’. Under Thatcher and Major, Conservatives sought to liberalize the economy and spread ownership through policies like Right to Buy and privatisation. New Labour dispersed political power with its devolution agenda, granted operational independence to the Bank of England and put in place a seemingly robust antitrust framework. All governments during the 1979–2007 period pursued choice in public services. Yet our modern discourse characterises Britain as beset by endemic power concentration, in markets and politics. What went wrong? How did so-called neoliberal governments, which invoked liberty and empowerment, fail to disperse power and allow concentration to continue, recur or arise? The book will be of interest to students and scholars of contemporary British history, political economy and politics, as well as specific areas of study such as Thatcherism and New Labour.

Britain - Robert D. Pearce 2002

This new edition revises *Britain: Industrial Relations and the Economy*, but also adds to the first edition.

There is a wide-ranging and yet detailed account of the General Strike of 1926, assessing responsibility for the conflict, explaining why it was so short-lived and examining its effects. There is also an analysis of British economic fortunes during the period.

A Social Geography of England and Wales - Richard Dennis 2013-10-22

A Social Geography of England and Wales considers the theoretical concepts of the social geography of England and Wales. This book is composed of 11 chapters that discuss the theories of industrialization and urbanization. The opening chapters deal with the origins and settlement of English people, as well as the workings of feudal society with its hierarchy of groups of different legal status, ranging from the king through the base of the system. The succeeding chapters examine the vital formative phase in British social history. Other chapters explore the strengths and weaknesses of several ecological and economic models of urban structure that are transported from North America to Great Britain. A chapter looks into the variations in housing type and quality form intriguing reflections of fundamental differences in British Society based on a theory of housing classes. This text also surveys residents of the inner areas of many British cities now experience substantial social problems, which are compounded in areas of multiple deprivation. The final chapters cover the dispersion of urbanism into the countryside where it has provoked fundamental social and spatial changes related to commuting, retirement migration and tourism. This book is of value to historians, sociologists, researchers, and undergraduate students.

[Access to History: Britain 1951-2007 Second Edition](#) - Michael Lynch 2015-08-14

Exam Board: AQA, Edexcel, OCR & WJEC Level: A-level Subject: History First Teaching: September 2015 First Exam: June 2016 Give your students the best chance of success with this tried and tested series, combining in-depth analysis, engaging narrative and accessibility. Access to History is the most popular, trusted and wide-ranging series for A-level History students. This title: - Supports the content and assessment requirements of the 2015 A-level History specifications - Contains authoritative and engaging content - Includes thought-provoking key debates that examine the opposing views and approaches of historians - Provides exam-style questions and guidance for each relevant specification to help students understand how to apply what they have learnt This title is suitable for a variety of courses including: - AQA: The Making of Modern Britain, 1951-2007 - OCR: Britain 1930-1997

Britain 1740 - 1950 - Richard Lawton 2021-12-02

Originally published in 1992, this book provides students with a well-illustrated, clearly written text which offers a coherent overview of Britain's development from a pre-modern to a modern economy and society. The key processes that have shaped the geography of modern Britain are rooted in the significant demographic, economic, technological and social transitions of the early eighteenth century, the impact of which was not fully diffused through the nation until the mid-20th Century. This country-wide survey examines the nature of this transformation. The material in the book is accessible because the book is clearly structured into 3 phases: 1740 to the 1830s; the 1830s to the 1890s and the 1890s to 1950. For each period, the principal aspects of change in population, industry, the countryside and urban life are examined, and regional examples given to support the analysis.

[Access to History: Britain 1783-1885](#) - Benjamin Armstrong 2020-06-22

Exam board: AQA; Pearson Edexcel; OCR Level: AS/A-level Subject: History First teaching: September 2015 First exams: Summer 2016 (AS); Summer 2017 (A-level) Put your trust in the textbook series that has given thousands of A-level History students deeper knowledge and better grades for over 30 years. Updated to meet the demands of today's A-level specifications, this new generation of Access to History titles includes accurate exam guidance based on examiners' reports, free online activity worksheets and contextual information that underpins students' understanding of the period. - Develop strong historical knowledge: in-depth analysis of each topic is both authoritative and accessible - Build historical skills and understanding: downloadable activity worksheets can be used independently by students or edited by teachers for classwork and homework - Learn, remember and connect important events and people: an introduction to the period, summary diagrams, timelines and links to additional online resources support lessons, revision and coursework - Achieve exam success: practical advice matched to the requirements of your A-level

specification incorporates the lessons learnt from previous exams - Engage with sources, interpretations and the latest historical research: students will evaluate a rich collection of visual and written materials, plus key debates that examine the views of different historians

[A History of the Modern Fact](#) - Mary Poovey 1998-11-15

How did the fact become modernity's most favored unit of knowledge? How did description come to seem separable from theory in the precursors of economics and the social sciences? Mary Poovey explores these questions in A History of the Modern Fact, ranging across an astonishing array of texts and ideas from the publication of the first British manual on double-entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s. She shows how the production of systematic knowledge from descriptions of observed particulars influenced government, how numerical representation became the privileged vehicle for generating useful facts, and how belief—whether figured as credit, credibility, or credulity—remained essential to the production of knowledge. Illuminating the epistemological conditions that have made modern social and economic knowledge possible, A History of the Modern Fact provides important contributions to the history of political thought, economics, science, and philosophy, as well as to literary and cultural criticism.

International Human Rights Law and Destitution - Luke D. Graham 2022-08-12

This book explores destitution from the perspective of International Human Rights Law and, more specifically, Economic, Social and Cultural Rights. The experience of destitution correlates to the non-realisation of a range of economic, social and cultural rights. However, destitution has not been defined from this perspective. Consequently, the nexus between destitution and the denial of economic, social and cultural rights remains unrecognised within academia and policy and practice. This book expressly addresses this issue and in so doing renders the nexus between destitution and the non-realisation of these rights visible. The book proposes a new human-rights-based definition of destitution, composed of two parts. The rights which must be realised— the component rights - and the level of realisation of these rights which must be met - the destitution threshold - to avoid destitution. This human rights-based understanding of destitution is then applied to a UK case study to highlight the relationship between government policy and destitution, to illustrate how destitution manifests itself, and to make recommendations - founded upon engendering the realisation of economic, social and cultural rights - aimed towards addressing destitution. This book will have global and cross-sectoral appeal to anti-poverty advocates, policy makers, as well as to researchers, academics and students in the fields of human rights law, poverty studies, and social policy.

[Change, Conflict, and Crisis](#) - Michael A. R. Graves 1996

Examines the politics and government of Tudor and Stuart monarchies and the social and economic realities of the period. Suggested level: senior secondary.

[After the Black Death](#) - Mark Bailey 2021-02-11

The Black Death of 1348-9 is the most catastrophic event and worst pandemic in recorded history. After the Black Death offers a major reinterpretation of its immediate impact and longer-term consequences in England. After the Black Death reassesses the established scholarship on the impact of plague on fourteenth-century England and draws upon original research into primary sources to offer a major re-interpretation of the subject. It studies how the government reacted to the crisis, and how communities adapted in its wake. It places the pandemic within the wider context of extreme weather and epidemiological events, the institutional framework of markets and serfdom, and the role of law in reducing risks and conditioning behaviour. The government's response to the Black Death is reconsidered in order to cast new light on the Peasants' Revolt of 1381. By 1400, the effects of plague had resulted in major changes to the structure of society and the economy, creating the pre-conditions for England's role in the Little Divergence (whereby economic performance in parts of north western Europe began to move decisively ahead of the rest of the continent). After the Black Death explores in detail how a major pandemic transformed society, and, in doing so, elevates the third quarter of the fourteenth century from a little-understood paradox to a critical period of profound and irreversible change in English and global history.

[A History of the Global Economy](#) - Joerg Baten 2016-03-10

"In co-operation with the International Economic History Association."

Grocery Story - Jon Steinman 2019-05-07

Hungry for change? Put the power of food co-ops on your plate and grow your local food economy. Food has become ground-zero in our efforts to increase awareness of how our choices impact the world. Yet while we have begun to transform our communities and dinner plates, the most authoritative strand of the food web has received surprisingly little attention: the grocery store—the epicenter of our food-gathering ritual. Through penetrating analysis and inspiring stories and examples of American and Canadian food co-ops, *Grocery Story* makes a compelling case for the transformation of the grocery store aisles as the emerging frontier in the local and good food movements. Author Jon Steinman: Deconstructs the food retail sector and the shadows cast by corporate giants Makes the case for food co-ops as an alternative Shows how co-ops spur the creation of local food-based economies and enhance low-income food access. *Grocery Story* is for everyone who eats. Whether you strive to eat more local and sustainable food, or are in support of community economic development, *Grocery Story* will leave you hungry to join the food co-op movement in your own community.

Women's History, Britain 1700–1850 - Hannah Barker 2004-11-15

Placing women's experiences in the context of the major social, economic and cultural shifts that accompanied the industrial and commercial transformations of this period, Hannah Barker and Elaine Chalus paint a fascinating picture of the change, revolution, and continuity that were encountered by women of this time. A thorough and well-balanced selection of individual chapters by leading field experts and dynamic new scholars, combine original research with a discussion of current secondary literature, and the contributors examine areas as diverse as the Enlightenment, politics, religion, education, sexuality, family, work, poverty, and consumption. The authors most importantly realise that female historical experience is not generic, and that it can be significantly affected by factors such as social status, location, age, race and religion. Providing a captivating overview of women and their lives, this book is an essential purchase for the study of women's history, and, providing delightful little gems of knowledge and insight, it will also appeal to any reader with an interest in this fascinating topic.

Political Economy and Imperial Governance in Eighteenth-Century Britain - Heather Welland 2021-06-16

This book examines the relationship between imperial governance and political economy in eighteenth-century Britain, particularly in Canada and Ireland. It is concerned with the way economic ideology and party politics were mutually constitutive; and with the way extra-parliamentary interests both facilitated, and were co-opted into, strategies of governance and commercial regulation. Rather than treat political economy as a pre-existing intellectual orthodoxy that shaped imperial policymaking, it focuses on the ways in which economic thought was generated in moments of imperial crisis – especially those where politicians, commercial interest groups, and pamphleteer economists were forced to wrestle with the tensions between economic growth, political authority, and social stability. By rooting economic discourse and debate in specific problems of imperial commerce and administration, and by highlighting the many different actors and negotiations that produced economic policy, it argues that the transition from mercantilism to liberalism – the shift from protectionism to free trade – is a flawed description of eighteenth-century developments in economic thought.

Britain - Robert D. Pearce 1993

This volume provides an account of the history of industrial relations in Britain in the first half of the 20th

century. Suitable for mainstream history students rather than just specialists in economic history, it provides an introduction and overview to this area of study.

The Oxford Dictionary of Family Names in Britain and Ireland - Patrick Hanks 2016-11-17

Containing entries for more than 45,000 English, Scottish, Welsh, Irish, Cornish, and immigrant surnames, *The Oxford Dictionary of Family Names in Britain and Ireland* is the ultimate reference work on family names of the UK. The Dictionary includes every surname that currently has more than 100 bearers. Each entry contains lists of variant spellings of the name, an explanation of its origins (including the etymology), lists of early bearers showing evidence for formation and continuity from the date of formation down to the 19th century, geographical distribution, and, where relevant, genealogical and bibliographical notes, making this a fully comprehensive work on family names. This authoritative guide also includes an introductory essay explaining the historical background, formation, and typology of surnames and a guide to surnames research and family history research. Additional material also includes a list of published and unpublished lists of surnames from the Middle Ages to the present day.
