A productive and highly important branch of Nevari literature is poetry. The songs reflect the thought of the Nevars, their way of life, religious belief, their history and folklore. The greatest possible variety of genres and styles have been included in the present anthology. Most of the songs included, religious hymns as well as folksongs and ballads, are still very popular among Nevars. In order to facilitate reading and consultation, the whole corpus of the songs collected has been grouped into four principle sections, namely Religious Poetry, Songs about Love and Marriage, Epic Poetry, Didactic and Enigmatic Verses. The book contains two appendices. While the first lists the talas and ragas, as they are given in the various anthologies published in Nepal, the Second makes an attempt to transpose two songs into the European system of music. The translations are quite faithful and every effort has been made to preserve the spirit and flavour of the original. Contents Preface, Introduction, Translation, I. Religious Poetry: 1. The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality.

Critical Studies in Indian Grammarians I - Madhav Deshpande 2020-08-06

In the historical study of the Indian grammarian tradition, a line of demarcation can often be drawn between the conformity of a system with the well-known grammar of Pāṇini and the explanatory effectiveness of that system. One element of Pāṇini's grammar that scholars have sometimes struggled to bring across this line of demarcation is the theory of homogeneity, or sāvarṇya, which concerns the final consonants in Pāṇini's reference catalog, as well as phonetic similarities between sounds. While modern Sanskrit scholars understand how to interpret and apply Pāṇini's homogeneity, they still find it necessary to unravel the history of varying interpretations of the theory in subsequent grammars. Madhav Deshpande's *The Theory of Homogeneity* provides a thorough account of the historical development of the theory. Proceeding first to study this conception in the Pāṇinian tradition, Deshpande then passes on to other grammatical systems. Deshpande gives attention not only to the definitions of homogeneity in these systems but also the implementation of the theory in those respective systems. Even where definitions are identical, the concept may be applied quite differently, in which cases Deshpande examines by considering the historical relationships among the various systems.

[A Reader on the Sanskrit Grammarians](#) - J. F. Staal 2003-01-01

The achievements of Pānini and the Indian grammarians, beginning nearly 2500 years ago, have never been fully appreciated by Western scholars—partly because of the great technical difficulties presented by such an inquiry, and partly because relevant tutorial articles have been confined to obscure and inaccessible publications. This book makes available to linguists and Sanskritists a collection of the most important articles on the Sanskrit grammarians, and provides a connected historical outline of their activities. It covers studies and fragments ranging from early 7th-century accounts of the grammarians—recorded by Buddhist pilgrims from China and Tibet, by Muslim travelers from the Near East, and by Christian missionaries—to some of the best articles that have appeared during the last century and a half. Chapters in the book cover the foundation of Sanskrit studies in the West laid by British scholars working in India and including the detailed and accurate information provided by Henry Thomas Colebrooke; the linguistic evaluations of Pānini by von Schlegel and von Humboldt; the work of Bhandarkar and of Kielhorn; William Dwight Whitney's low evaluation of the "native" grammarians; and the philological work of modern Western, Indian, and Japanese scholars. The editor observes that materials in the Reader reveal problems tackled by the Sanskrit grammarians which closely parallel developments in contemporary linguistics. He has provided historical and linguistic commentary and bibliographic data in the introductions and notes that accompany each selection. Articles are in their original English, German, and French. Texts or passages in Chinese, Tibetan, Arabic, Sanskrit, Latin, and Greek have, for the most part, been translated into English, and all Sanskrit passages have been translated into the Latin alphabet.

[The Admonitions of Seh Bari](#) - Pangerang Bonan 2012-12-06

The Javanese text being published here is not appearing in print for the first time: more than half a century ago it was published by B.J.O. Schrieke in his doctor's thesis *Ret Boek van Bonang* ("The Book of Bonang") (1916). In Schrieke's work, however, the emphasis fell on the historical introduction to the text rather than on the text itself, the edition of which is now free of shortcomings. Moreover, the analysis of the contents of the text appended to it could not make up for a complete translation. For the lack of a new edition and complete translation of this old and important text has not been made before now is due to the small number of scholars of Javanese - and the even smaller number of those among them who concern themselves with the Muslim works of Javanese literature. In short, it is the pioneering character which the study of Indonesian literatures still largely possesses that has caused people to be contented with preliminary surveys of this extensive field of study. It is true that a number of welcome milestones have been erected, but it can in no way be said that the charting of the whole field is yet complete. After the

first publication of a text and summary of its contents people are only too readily inclined to proceed to other projects, more attractive because of their novelty.

This Dictionary includes the vocabulary of Post-Vedic literature with emphasis on philosophical, grammatical and rhetorical terms. Further this is the only handy dictionary of its kind which breaks a word into its component parts and refers to the roots deducible from Sanskrit derivatives alone by way of comparative derivatives alone by way of comparative philological analysis. The work is therefore highly useful for the etymological analysis and linguistic training.

Course in Nepali - David Matthews 2013-01-11

Nepali has also been adopted by peoples of the Himalayan region who belong to different linguistic groups, and is now understood throughout the whole of Nepal, the Darjeeling region of West Bengal, Sikkim, Bhutan and parts of Tibet, where it has functioned as a language of trade and commerce for well over two centuries. The aim of this course, which covers the whole grammar and all the constructions of modern Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali, and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style, and the conversation passages whilst the later lessons concern religious, political and literary topics. Nepal is a land which already provides great enjoyment to the increasing number of visitors from the west. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of *A Course in Nepali* is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader.

How to Kill a Dragon - Calvert Watkins 1995

In *How to Kill a Dragon* Calvert Watkins follows the continuum of poetic formulae in Indo-European languages, from Old Hittite to medieval Irish. He uses the comparative method to reconstruct traditional poetic formulae of considerable complexity that stretch as far back as the original common language. Thus, Watkins reveals the antiquity and tenacity of the Indo-European poetic tradition. Watkins begins this study with an introduction to the field of comparative Indo-European poetics; he explores the Saussurian notions of synchrony and diachrony, and locates the various Indo-European traditions and ideologies of the spoken word. Further, his overview presents case studies on the forms of verbal art, with selected texts drawn from Indic, Iranian, Greek, Latin, Hittite, Armenian, Celtic, and Germanic languages. In the remainder of the book, Watkins examines in detail the structure of the dragon/serpent-slaying myths, which recur in various guises throughout the Indo-European poetic tradition. He finds the "signature" formula for the myth--the divine hero who slays the serpent or overcomes adversaries--occurs in the same linguistic form in a wide range of sources and over millennia, including Old and Middle Iranian holy books, Greek epic, Celtic and Germanic sagas, down to Armenian oral folk epic of the last century. Watkins argues that this formula is the vehicle for the central theme of a proto-text, and a central part of the symbolic culture of speakers of the Proto-Indo-European language: the relation of humans to their universe, the values and expectations of their society. Therefore, he further argues, poetry was a social necessity for Indo-European society, where the poet could confer on patrons what they and their culture valued above all else: "imperishable fame."
