Global Trends 2030 - Office of the Director of National Intelligence Council 2017-03-11

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role

in the international system and the possible the impact on future international relations. Creativity is a highly-prized quality in any modern endeavor, whether artistic, scientific or professional. Though a much-studied subject, and the topic of a great many case-studies, the field of creativity research is still very much an open one. Creativity remains a field where absolute definitions hold very little water, and where true insight can only emerge when we properly appreciate - from a nuanced, multi-disciplinary perspective - the crucial distinction between the producer's perspective and the consumer's perspective. Theories that afford us a critical appreciation of a creative work do not similarly afford a explanatory insight into the origins and development of the work. As researchers, we must approach creativity both as producers - to consider the vast search-spaces that a producer encounters, and to appreciate the need for heuristic strategies for negotiating this space - and as consumers, to appreciate the levels of shared knowledge (foreground and background) that is exploited by the producer to achieve a knowingly creative effect in the mind of the consumer. This volume thus brings together both producers and consumers in a cross-disciplinary exploration of this

complex, many-faceted phenomenon.
Hello World - Hannah Fry 2019-03-28

'One of the best books yet written on data and algorithms. . .deserves a place on the bestseller charts.' (The Times) You are accused of a crime. Who would you rather determined your fate - a human or an algorithm? An algorithm is more consistent and less prone to error of judgement. Yet a human can look you in the eye before passing sentence. Welcome to the age of the algorithm, the story of a not-too-distant future where machines rule supreme, making important decisions - in healthcare, transport, finance, security, what we watch, where we go even who we send to prison. So how much should we rely on them? What kind of future do we want? Hannah Fry takes us on a tour of the good, the bad and the downright ugly of the algorithms that surround us. In *Hello World* she lifts the lid on their inner workings, demonstrates their power, exposes their limitations, and examines whether they really are an improvement on the humans they are replacing. Women Writing War - Katharina von Hammerstein 2018-08-06
Recent scholarship has broadened definitions of war and shifted from the narrow focus on battles and power struggles to include narratives of the homefront and private sphere. To expand scholarship on textual representations of war means to shed light on the multiple theaters of war, and on the many voices who contributed to, were affected by, and/or critiqued German war efforts. Engaged women writers and artists commented on their nations' imperial and colonial ambitions and the events of the tumultuous beginning of the twentieth century. In an interdisciplinary investigation, this volume explores select female-authored, German-language texts focusing on German colonial wars and World War I and the discourses that promoted or critiqued their premises. They examine how colonial conflicts contributed to a persistent atmosphere of *Kriegsbegeisterung* (war enthusiasm) that eventually culminated in the outbreak of World War I, or a *Kriegskritik* (criticism of war) that resisted it. The span from German colonialism to World War I

brings these explosive periods into relief and challenges readers to think about the intersection of nationalism, violence and gender and about the historical continuities and disruptions that shape such events.

Design Activism - Alastair Fuad-Luke 2013-06-17

Design academics and practitioners are facing a multiplicity of challenges in a dynamic, complex, world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise. Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students, teachers and professionals for the near-future. New approaches, methods and tools are urgently required as sustainability expands the context for design and what it means to be a 'designer'. Design activists, who comprise a diverse range of designers, teachers and other actors, are setting new ambitions for design. They seek to fundamentally challenge how, where and when design can catalyse positive impacts to address sustainability. They are also challenging who can utilise the power of the design process. To date, examination of contemporary and emergent design activism is poorly represented in the literature. This book will provide a rigorous exploration of design activism that will re-vitalise the design debate and provide a solid platform for students, teachers, design professionals and other disciplines interested in transformative (design) activism. Design Activism provides a comprehensive study of contemporary and emergent design activism. This activism has a dual aim - to make positive impacts towards more sustainable ways of living and working; and to challenge and reinvigorate design praxis. It will collate, synthesise and analyse

design activist approaches, processes, methods, tools and inspirational examples/outcomes from disparate sources and, in doing so, will create a specific canon of work to illuminate contemporary design discourse. Design Activism reveals the power of design for positive social and environmental change, design with a central activist role in the sustainability challenge. Inspired by past design activists and set against the context of global-local tensions, expressions of design activism are mapped. The nature of contemporary design activism is explored, from individual/collective action to the infrastructure that supports it generating powerful participatory design approaches, a diverse toolbox and inspirational outcomes. This is design as a political and social act, design to enable adaptive societal capacity for co-futuring.

Random Selection in Politics - Lyn Carson 1999

How might the entire citizenry of a country make the decisions that affect them? Carson and Martin provide the first accessible and comprehensive overview of "random selection" as a possible process for transforming our modern political systems. Random selection, they show, can and has been used in community participation in short-term decision making and long-term planning. It can be a powerful tool in the development of local, federal, and international policy.

The Tipping Point - Malcolm Gladwell 2006-11-01

From the bestselling author of *The Bomber Mafia*: discover Malcolm Gladwell's breakthrough debut and explore the science behind viral trends in business, marketing, and human behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. "A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world." —Michael Lewis

Practical Terrorism Prevention - Jackson 2019-02-15

Researchers examined past U.S. countering violent extremism and terrorism prevention efforts and explored policy options to strengthen terrorism prevention in the future. They found that current terrorism prevention capabilities are relatively limited and that there is a perceived need for federal efforts to help strengthen local capacity. However, any federal efforts will need to focus on building community trust to be successful.

Justice - Michael J. Sandel 2009-09-15

A renowned Harvard professor's brilliant, sweeping, inspiring account of the role of justice in our society--and of the moral dilemmas we face as citizens What are our obligations to others as people in a free society? Should government tax the rich to help the poor? Is the free market fair? Is it sometimes wrong to tell the truth? Is killing sometimes morally required? Is it possible, or desirable, to legislate morality? Do individual rights and the common good conflict? Michael J. Sandel's "Justice" course is one of the most popular and influential at Harvard. Up to a thousand students pack the campus theater to hear Sandel relate the big questions of political philosophy to the most vexing issues of the day, and this fall, public television will air a series based on the course. Justice offers readers the same exhilarating journey that captivates Harvard students. This book is a searching, lyrical exploration of the meaning of justice, one that invites readers of all political persuasions to consider familiar controversies in fresh and illuminating ways. Affirmative action, same-sex marriage, physician-assisted suicide, abortion, national service, patriotism and dissent, the moral limits of markets—Sandel dramatizes the challenge of thinking through these conflicts, and shows how a surer grasp of philosophy can help us make sense of politics, morality, and our own convictions as well. Justice is lively, thought-provoking, and wise—an essential new addition to the small shelf of books that speak convincingly to the hard questions of our civic life.

Technological Slavery (Large Print 16pt) - Theodore J. Kaczynski 2011-02

Theodore Kaczynski saw violent collapse as the only way to bring down

the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski's critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

Swahili Language Handbook - Edgar C. Polomé 1967

Science and Anti-science - Gerald James Holton 1993

What is good science? What goal--if any--is the proper end of scientific activity? Is there a legitimating authority that scientists may claim? How serious a threat are the anti-science movements? These questions have long been debated but, as Gerald Holton points out, every era must offer its own responses. This book examines these questions not in the abstract but shows their historic roots and the answers emerging from the scientific and political controversies of this century. Employing the case-study method and the concept of scientific themes that he has pioneered, Holton displays the broad scope of his insight into the workings of science: from the influence of Ernst Mach on twentieth-century physicists, biologists, psychologists, and other thinkers to the rhetorical strategies used in the work of Albert Einstein, Niels Bohr, and others; from the bickering between Thomas Jefferson and the U.S. Congress over the proper form of federal sponsorship of scientific research to philosophical debates since Oswald Spengler over whether our scientific knowledge will ever be "complete." In a masterful final chapter, Holton scrutinizes the "anti-science phenomenon," the increasingly common opposition to science as practiced today. He approaches this contentious issue by examining the world views and political ambitions of the proponents of science as well as those of its opponents--the critics of "establishment science" (including even those who fear that science threatens to overwhelm the individual in the

postmodern world) and the adherents of "alternative science" (Creationists, New Age "healers," astrologers). Through it all runs the thread of the author's deep historical knowledge and his humanistic understanding of science in modern culture. Science and Anti-Science will be of great interest not only to scientists and scholars in the field of science studies but also to educators, policymakers, and all those who wish to gain a fuller understanding of challenges to and doubts about the role of science in our lives today.

Global Trends 2030 - National Intelligence Council (U.S.) 2012

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Building Shanghai - Edward Denison 2013-12-20

Shanghai's illustrious history and phenomenal future is celebrated in this book, which examines the evolution of the city's architecture and urban form in order to contextualise the challenges facing the city today. The physical legacies that reflect Shanghai's uniqueness historically and contemporarily are examined chronologically using specific case studies of exemplary architecture interwoven in a compelling narrative that unlocks the many mysteries surrounding this amazing metropolis. Some of the most influential colonial architecture in the world, outstanding examples of Modernism and Art Deco, and an exceptional selection of eclectic and vernacular architecture reflecting Shanghai's many adopted cultures are revealed. This is the first book ever to examine this remarkable subject in a manner that is both comprehensive and captivating in its written content and stunningly illustrated with over 300 archive and contemporary photographs and maps.

The Four Prohibitions of Acts 15 and Their Common Background in Genesis 1-3 - Elena Butova 2018-11-27

In the past 2000 years the followers of Jesus have been debating the

standards of Christian living. Did the Jerusalem Council in Acts 15 make the law obsolete? Do we need to keep the old dietary and other laws we find in the Old Testament? Modern Christianity seems to be divided between those who still believe in Ten Commandments and the so-called antinomians who believe the "new covenant" Christians no longer need them. What could look like a minor theological disagreement could have profound influence on churches in the western world, which in turn set the moral standards for the community at large. Often religious dogmas and preconceived ideas are imposed on the meaning of the biblical text. The modern seekers of truth are looking for the clear exposition of scriptures that would be unbiased and presented with scholarly integrity. This thesis is a feeble but passionate attempt to look at the statements of the apostles in Acts 15 with their own eyes. It aims at opening a new horizon of understanding how the early Christians understood and implemented their new faith, how they endeavored to build unity and good relationships between the Jewish "fathers" of the church and the converts from the Gentiles who would later become a majority in Christendom.

Virtual Geography - McKenzie Wark 1994-11-22

"The author's capacity to grasp and interpret these [world media] events is astounding, and her ability to provide insights into a world where unbounded information is circling the earth with the speed of light is startling." -- Choice "... a wide-ranging, quirky and dextrous mix of description, theory and analysis, that documents the perils of the global telecommunications network..." -- Times Literary Supplement "... this is a stimulating, even moving, book, dense with ideas and with many quotable lines." -- The New Statesman "Wark is one of the most original and interesting cultural critics writing today." -- Lawrence Grossberg McKenzie Wark writes about the experience of everyday life under the impact of increasingly global media vectors. We no longer have roots, we have aeriels. We no longer have origins, we have terminals.

Manipulative Therapy - Karel Lewit 2009-09-16

Manipulative Therapy provides a systematic overview of chain reactions which are the basis of a rational holistic approach. These reactions are closely related to the upright human posture and to the "deep stabilisation system" as shown in the work of Richardson et al in *Therapeutic Exercise for Spinal Stabilisation in Low Back Pain*. This approach has meant a considerable advance in the therapy and rehabilitation of patients. It gives a balanced picture of the importance of muscles, joints and soft tissues, under the control of the nervous system, the textbook aims to treat disturbance of function, the most common cause of pain in the motor system, in the most effective way. Locomotor system dysfunctions are shown to be treated very effectively using manual medicine techniques. Spinal column and joint mobility can be restored, and pain triggered by the autonomic nervous system can be positively influenced. This is a comprehensive source of information relating to pathogenesis, diagnosis, indications and treatment methods, incorporating the latest research findings. Radiological diagnosis is is

shown as laying the foundation for successful diagnosis and treatment with manual medicine techniques. Typical conditions associated with pain in the locomotor system is presented and described in functional terms for the first time. The book concludes with chapters covering preventative aspects and expert assessment. Manipulative Therapy: Musculoskeletal Medicine is the follow on from: Manipulative Therapy in Rehabilitation of the Locomotor System, published by Butterworth Heinemann, 1985.

Language, Culture, and Community in Teacher Education - Maria Estela Brisk 2013-09-13

Published by Routledge for the American Association of Colleges for Teacher Education This volume addresses the pressing reality in teacher education that all teachers need to be prepared to work effectively with linguistically and culturally diverse student populations. Every classroom in the country is already, or will soon be, deeply affected by the changing demographics of America's students. Marilyn Cochran-Smith's Foreword and Donaldo Macedo's Introductory Essay set the context with respect to teacher education and student demographics, followed by a series of chapters presented in three sections: knowledge, practice, and policy. The literature on language education has typically been discussed in relation to preparing ESL or bilingual teachers. Typically, needs of culturally and linguistically diverse students, including immigrants, refugees, language minority populations, African Americans, and deaf students, have been addressed separately. This volume emphasizes that these children have both common educational needs and needs that are culturally and linguistically specific. It is directed to the preparation of ALL teachers who work with culturally and linguistically diverse students. It not only focuses on how teachers need to change but how faculty and curriculum need to be transformed, and how to better train teacher education candidates to understand and work efficaciously with the communities in which culturally and linguistically diverse students tend to be predominant. The American Association of Colleges for Teacher Education (AACTE) is a national, voluntary association of higher education institutions and related organizations. Our mission is to

promote the learning of all PK-12 students through high-quality, evidence-based preparation and continuing education for all school personnel. For more information on our publications, visit our website at: www.aacte.org.

Anti-Tech Revolution - Theodore Kaczynski 2020-03-16

"There are many people today who see that modern society is heading toward disaster in one form or another, and who moreover recognize technology as the common thread linking the principal dangers that hang over us... The purpose of this book is to show people how to begin thinking in practical, grand-strategic terms about what must be done in order to get our society off the road to destruction that it is now on." -- from the Preface In *Anti-Tech Revolution: Why and How*, Kaczynski argues why the rational prediction and control of the development of society is impossible while expounding on the existence of a process fundamental to technological growth that inevitably leads to disaster: a universal process akin to biological natural selection operating autonomously on all dynamic systems and determining the long-term outcome of all significant social developments. Taking a highly logical, fact-based, and intellectually rigorous approach, Kaczynski seamlessly systematizes a vast breadth of knowledge and elegantly reconciles the social sciences with biology to illustrate how technological growth in and of itself necessarily leads to disastrous disruption of global biological systems. Together with this new understanding of social and biological change, and by way of an extensive examination of the dynamics of social movements, Kaczynski argues why there is only one route available to avoid the disaster that technological growth entails: a revolution against technology and industrial society. Through critical and comprehensive analysis of the principles of social revolutions and by carefully developing an exacting theory of successful revolution, Kaczynski offers a practical, rational, and realistic guide for preventing the fast-

approaching technology-induced catastrophe. This new second edition (2020) contains various updates and improvements over the first edition (2016), including two new appendices.

On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy - G. A. Cohen 2011-01-03

G. A. Cohen was one of the most gifted, influential, and progressive voices in contemporary political philosophy. At the time of his death in 2009, he had plans to bring together a number of his most significant papers. This is the first of three volumes to realize those plans. Drawing on three decades of work, it contains previously uncollected articles that have shaped many of the central debates in political philosophy, as well as papers published here for the first time. In these pieces, Cohen asks what egalitarians have most reason to equalize, he considers the relationship between freedom and property, and he reflects upon ideal theory and political practice. Included here are classic essays such as "Equality of What?" and "Capitalism, Freedom, and the Proletariat," along with more recent contributions such as "Fairness and Legitimacy in Justice," "Freedom and Money," and the previously unpublished "How to Do Political Philosophy." On ample display throughout are the clarity, rigor, conviction, and wit for which Cohen was renowned. Together, these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin, John Rawls, Amartya

Sen, and Isaiah Berlin.

Participatory Research - Jo Aldridge 2015-02-11

This book examines the nature of participatory research in the social sciences and its role in increasing participation among vulnerable or marginalised populations. Drawing on engaging in-depth case studies, it examines the ways in which inclusion and collaboration in research can be enhanced among vulnerable participants, such as those with profound learning difficulties, victims of abuse and trauma and multiply vulnerable children and young people, and shows how useful it can be with these groups. The book will be an invaluable resource for students, researchers and academics in many countries who want to put participatory research methods into practice.
